| Manufacture of:—                                                                                                |      |
| (P) Luck and Roberts. (iv, 1885).....                                                                           | 418  |
| (P) Espir. (iv, 1885).....                                                                                      | 417  |
| Blasting, New. (Himly.) (i, 1882).....                                                                          | 467  |
| Blasting, Preparation of, from Nitrated Cellulose. (P) Gedge. From Wolff and von Forster. (iv, 1885).....       | 243  |
| Blasting, with Gun cotton under Water. (P) von Forster. (ii, 1883).....                                         | 390  |
| Caps for Exploding Dynamite, Manufacture of. (P) Paulus. (iv, 1885).....                                        | 754  |
| Caps or Detonators for Dynamite. (P) Johnston and Smith. (vi, 1887).....                                        | 226  |
| Carbo-Dynamite. (vii, 1888).....                                                                                | 401  |
| (Hake.) (viii, 1889).....                                                                                       | 522  |
| Cellulose, Preparation of Blasting Powder from Nitrated. (P) Gedge. From Wolff and von Forster. (iv, 1885)..... | 243  |
| Chronograph for Timing. (Le Boulenger.) (vii, 1888).....                                                        | 659  |
| Combustion of Ballistic. (Vieille.) (xi, 1894).....                                                             | 659  |
| Cresylic Acid and Allied Products. (Allen.) (ix, 1890).....                                                     | 141  |
| Cresylic Acid. (Cresol.) (vii, 1888).....                                                                       | 836  |
| Dangers in Manufacture of. (Guttman.) (xi, 1892).....                                                           | 203  |
| Detonating Point of Determination of. (Beim.) (ix, 1890).....                                                   | 214  |
| Detonator, Composition for Use as a. (P) Ward and Gregory. (ix, 1890).....                                      | 803  |
| Detonators for Dynamite. (P) Johnson and Smith. (vi, 1887).....                                                 | 226  |
| Detonators, Manufacture of. (P) Newton. From Nobel. (vii, 1888).....                                            | 867  |
| Detonators, Railway Fog Signal. (P) Ruston and Beadle. (xi, 1892).....                                          | 257  |
| Dynamite:—                                                                                                      |      |
| (Hake.) (viii, 1889).....                                                                                       | 521  |
| (Meyer.) (x, 1891).....                                                                                         | 793  |
| Dynamite, Analysis of:—                                                                                         |      |
| (Lunge.) (i, 1882).....                                                                                         | 383  |
| (Schelling.) (x, 1891).....                                                                                     | 70   |
| Dynamite Cannon, Experiments with. (iv, 1885).....                                                              | 243  |
| Dynamite-conveying Plant. (xi, 1892).....                                                                       | 839  |
| Dynamite, Determination of Nitroglycerin in. (Leibschütz.) (xii, 1893).....                                     | 470  |
| Dynamite, Expts. to Demonstrate Power of. (vii, 1888).....                                                      | 489  |
| Dynamite, Expts. to Demonstrate Safety of. (vii, 1888).....                                                     | 489  |
| Dynamite, Explosions of. (x, 1891).....                                                                         | 948  |
| Dynamite Factory in Argentina. (T.R.) (viii, 1889).....                                                         | 828  |
| Dynamite in Spain. (T.R.) (ix, 1890).....                                                                       | 224  |
| Dynamite, Manufacture of. (vii, 1888).....                                                                      | 491  |
| (P) Lanfrey and Renard. (iv, 1885).....                                                                         | 366  |
| (P) Lundholm. (viii, 1889).....                                                                                 | 818  |
| (P) von Dahmen. (ix, 1890).....                                                                                 | 195  |
| Dynamite, Manufacture of Caps for Exploding. (P) Paulus. (iv, 1885).....                                        | 754  |
| Dynamite, Manuf. of Kieselguhr. (P) Grune. (xii, 1893).....                                                     | 864  |
| Dynamite, Poisonous Gases from. (Charon.) (xi, 1892).....                                                       | 840  |
| Dynamite, Preparation of Plastic. (Ballabene.) (iv, 1885).....                                                  | 366  |
| Dynamite Rocket. (P) Haddan. From American Carrier Rocket Co. (xii, 1893).....                                  | 179  |
| Dynamite, Testing Glycerin for Manufacture of. (Lewkowitsch.) (xiv, 1895).....                                  | 1073 |
| Dynamite, Treatment of. (P) Howett. (i, 1882).....                                                              | 425  |
| Dynamite Works, Visit to Nobel's. (vii, 1888).....                                                              | 488  |
| Electricity Generated during Manufacture of. (Reid.) (viii, 1889).....                                          | 60   |
| Employment of, in Presence of Fire-damp. (ix, 1890).....                                                        | 214  |
| Experiments in Blasting with. (vii, 1888).....                                                                  | 342  |
| Experiments on Velocity of. (Berthelot.) (iv, 1885).....                                                        | 569  |
| Exploder, Electro-Magnetic. (Zettler.) (viii, 1889).....                                                        | 60   |
| Exploders for Projectiles. (P) Brookes. From Smith. (xiv, 1895).....                                            | 65   |
| Firing Points of, Determination of. (Munroe.) (ix, 1890).....                                                   | 1063 |
| Fireworks, Composition for. (P) Gillischewski. (xii, 1893).....                                                 | 756  |
| Fireworks, Manufacture of:—                                                                                     |      |
| (P) Huelser. From Gillischewski. (xi, 1892).....                                                                | 939  |
| (P) Pinder. (xii, 1893).....                                                                                    | 786  |
| (P) Pinder and Ford. (xiv, 1895).....                                                                           | 187  |
| (P) Stephenson. (ix, 1890).....                                                                                 | 863  |
| For Blasting, &c. (P) Hamman. (ii, 1883).....                                                                   | 427  |
| For Mines. (P) Kulbin and Siersch. (vii, 1888).....                                                             | 768  |
| For Use in Fire-Arms. (P) Hart. (viii, 1889).....                                                               | 568  |
| Fortis. (vii, 1888).....                                                                                        | 401  |
| From Nitrate of Ammonia and Resins, Manufacture of. (P) Abel. From König. (xiii, 1894).....                     | 543  |
| From Picric Acid. (P) Emmens. (vii, 1888).....                                                                  | 858  |
| Fuse and Igniting Apparatus not affected by Fire-Damp. (P) Müller. (viii, 1889).....                            | 420  |

EXPLOSIVES, VARIOUS—*cont.*

| Fuses for Explosive Shells. (P) Zahuski. (v, 1886).....                                    | 679      |
| Fuses for Projectiles. (P) Brookes. From Smith. (xiv, 1895).....                           | 65       |
| Fuses for Shell Projectiles. (P) Nordenfelt. (iv, 1885).....                               | 417      |
| Fuses Ignited by Fuse. (P) McEvoy. (viii, 1889).....                                       | 420      |
| Fuses, Manufacture of Safety. (P) Newton. From Nobel. (viii, 1889).....                    | 153      |
| Fuses, Percussion:—                                                                        |          |
| (P) Low. (x, 1891).....                                                                    | 184      |
| (P) Martin. (x, 1891).....                                                                 | 161      |
| (P) Schmid. (x, 1891).....                                                                 | 161      |
| Gelatin. (Sanford.) (xii, 1894).....                                                       | 276      |
| Gelatin and Bellite, Blasting. (Kerr.) (xiii, 1889).....                                   | 213      |
| Gelatin Compounds, Analysis of. (Sanford.) (xii, 1893).....                                | 61       |
| Gelatin, Experiments to Demonstrate Power of Blasting. (vii, 1888).....                    | 489      |
| German Trade in. (T.R.) (xiii, 1894).....                                                  | 1113     |
| Granulating and Glazing. (P) Murray. From Glaser. (ix, 1890).....                          | 215      |
| Gun cotton, Analysis of. (Sanford.) (xii, 1893).....                                       | 62       |
| Gun cotton, Blasting with, under Water. (P) von Forster. (ii, 1883).....                   | 390      |
| Gun cotton, Coating Compressed. (P) Glaser. From Wolf and von Forster. (iii, 1884).....    | 378      |
| Gun cotton, Determination of Lime and Magnesia in. (Schjermine.) (xii, 1893).....          | 62       |
| Gun cotton, Examination of. (Wisser.) (vi, 1887).....                                      | 841      |
| Gun cotton, Experiments with Compressed. (Forster.) (Guttman.) (iii, 1884).....            | 329, 330 |
| Gun cotton, Jute as a Substitute for. (Mühlhauser.) (xi, 1892).....                        | 537      |
| Gun cotton, Manufacture of:—                                                               |          |
| (P) Hesketh and Marzet. (xiv, 1895).....                                                   | 187      |
| (P) Johnson. From Zellstoff Fabrik Waldhof. (xi, 1892).....                                | 159      |
| Gun cotton, Varnishing Compressed. (P) Wolff and von Forster. (ii, 1883).....              | 545      |
| Gunpowder:—                                                                                |          |
| (Himly.) (ii, 1883).....                                                                   | 249      |
| (Nickel.) (xii, 1893).....                                                                 | 62       |
| Gunpowder, Action of Fatty Substances on. (Beim.) (ix, 1890).....                          | 762      |
| Gunpowder, Apparatus for Compressing:—                                                     |          |
| (P) Flint and Mitchell. (x, 1891).....                                                     | 270      |
| (P) Robb. (ix, 1890).....                                                                  | 764      |
| Gunpowder, Apparatus for Manufacture of:—                                                  |          |
| (P) Andre and Curtis. (xi, 1892).....                                                      | 180      |
| (P) Taylor and Challen. (ix, 1890).....                                                    | 1064     |
| Gunpowder, Apparatus for Manufacture of Compressed. (P) Lake. From Gruson. (iv, 1885)..... | 509      |
| Gunpowder, Apparatus for Mixing. (P) Barker. From Oliver. (ix, 1890).....                  | 765      |
| Gunpowder Case, Production of. (P) Taylor and Challen. (x, 1891).....                      | 854      |
| Gunpowder, Chemical Theory of. (Hubs.) (x, 1891).....                                      | 947      |
| Gunpowder, Dangers of Manufacture of. (Guttman.) (xi, 1892).....                           | 204      |
| Gunpowder, Explosions of. (x, 1891).....                                                   | 948      |

| (P) Samuel. (x, 1891) .....                                                                                  | 363  |
| Apparatus for Printing on Textile. (P) Bolet. (xiv, 1895) .....                                              | 34   |
| Apparatus for Printing on Woven. (P) Hudme. (xi, 1892) .....                                                 | 160  |
| App. for Scouring and Dyeing Piled. (P) Worrall. (i, 1882) .....                                             | 148  |
| Apparatus for Sizing and Printing. (P) Boul. From Page and Bird. (ix, 1890) .....                            | 612  |
| Apparatus for Softening and Cleaning Textile. (P) Monforts. (xii, 1893) .....                                | 757  |
| Apparatus for Treating:                                                                                      |      |
| (P) Clay. (ix, 1890) .....                                                                                   | 1034 |
| (P) Farmer. From Lalanc. (iii, 1884) .....                                                                   | 170  |
| (P) Glaser. From Rummelin. (iii, 1884) .....                                                                 | 170  |
| (P) Menzers. (i, 1882) .....                                                                                 | 450  |
| Apparatus for Treating Textile. (P) Abel. From Obermaier. (v, 1886) .....                                    | 259  |
| Apparatus for Treating Waterproofed. (P) Frankenburg. (v, 1886) .....                                        | 321  |
| Apparatus for Treating with Steam or Gases. (P) Reiny. (x, 1891) .....                                       | 135  |
| Apparatus for Treating Woven. (P) Campbell. (x, 1891) .....                                                  | 696  |
| Apparatus for Treatment of Mixed. (P) Woodcock and Webster. (iii, 1884) .....                                | 443  |
| Apparatus for Washing and Treating:                                                                          |      |
| (P) Birch. (v, 1886) .....                                                                                   | 230  |
| (P) Roberts. (xi, 1892) .....                                                                                | 810  |
| (P) Thompson. From Douleoron and Meerbeek. (viii, 1889) .....                                                | 282  |
| Apparatus for Waterproofing:                                                                                 |      |
| (P) Birley and Williams. (ix, 1890) .....                                                                    | 814  |
| (P) Doller and Wollenstein. (xii, 1893) .....                                                                | 166  |
| (P) Miller. (x, 1891) .....                                                                                  | 937  |
| Apparatus to Destroy Vegetable Matter in Woollen or Silk. (P) Tolson. (iii, 1884) .....                      | 443  |
| Application of Sodium Silicate to Dyeing of. (i, 1882) .....                                                 | 279  |
| Arsenic in, Estimation of. (Fresenius and Hintz. (vii, 1888) .....                                           | 456  |
| Azo-colours on Indigo-dyed. (P) Luray. From Färlwerke vormals Meister, Lucius, and Brüning. (xi, 1892) ..... | 160  |
| Behaviour of Coloured, to Water and Air. (Boubnoff. (iii, 1884) .....                                        | 476  |
| Black Dyeing. (P) North. (x, 1891) .....                                                                     | 541  |
| Bleaching of:                                                                                                |      |
| (P) Abel. From Delaboue. (i, 1882) .....                                                                     | 148  |
| (P) Johnson. (iii, 1884) .....                                                                               | 495  |
| (Jousselin. (i, 1882) .....                                                                                  | 318  |
| (P) La Comp. des Procédés Raoul-Pictet. (i, 1882) .....                                                      | 186  |
| (P) Webb. (x, 1891) .....                                                                                    | 923  |
| Bleaching Textile, without Chlorine. (P) Thomas. (i, 1882) .....                                             | 501  |
| (ii, 1883) .....                                                                                             | 244  |
| Bleaching Vegetable:                                                                                         |      |
| (P) Holmes. (i, 1882) .....                                                                                  | 451  |
| (P) Riley and The Thorndiebank Co. Ltd. (xiii, 1894) .....                                                   | 728  |
| (P) Townsend. (iv, 1885) .....                                                                               | 208  |
| Bleaching Woven. (Thompson and Ruckman. (iv, 1885) .....                                                     | 342  |
| Calendering Textile, and Apparatus therefor. (P) Haddow. (x, 1891) .....                                     | 359  |
| Chroming. (P) Simpson. (iii, 1884) .....                                                                     | 41   |
| Cleaning, Mordanting, and Dyeing. (P) Gardner. From Anderson. (xii, 1893) .....                              | 1028 |
| Cleansing Fibrous. (P) Hamilton. (ix, 1890) .....                                                            | 211  |
| Coated with Celluloid, Varnish, &c. (P) Gray. (xiv, 1895) .....                                              | 862  |
| Coated with Indiarubber or Gutta-percha, Manufacture of. (P) Lake. From White. (iii, 1884) .....             | 443  |
| Coated with Xylonite or Pyroxylin. (P) Lake. From Edson. (iii, 1884) .....                                   | 477  |
| Coloured Waterproof, Manufacture of. (P) Birnbaum. (xiv, 1895) .....                                         | 151  |

| Compound for Cleansing. (P) Hanford. (iv, 1885) .....                                              | 602  |
| Comp. for Cleansing and Bleaching. (P) Parker. (ix, 1890) .....                                    | 174  |
| Compound for Cleansing Cotton. (P) Hodgkinson. (vi, 1887) .....                                    | 727  |
| Compound for Producing Designs on. (P) Lake. From Whitfield. (vi, 1887) .....                      | 508  |
| Compound for Washing:                                                                              |      |
| (P) MacArthur. (vi, 1887) .....                                                                    | 112  |
| (P) Portella. (ix, 1890) .....                                                                     | 174  |
| Compound for Waterproofing Woven. (P) Knowlton. (xiv, 1895) .....                                  | 662  |
| Conditioning of Textile in France. (T.R.) (x, 1891) .....                                          | 495  |
| Detection of Indigo in Dyed. (Lenz.) (vi, 1887) .....                                              | 739  |
| Determining Colours in Textile. (Joffre.) (i, 1882) .....                                          | 447  |
| Disinfecting. (P) Vigerie. (xiii, 1894) .....                                                      | 168  |
| Doctors for Printing. (P) Archer. (ix, 1890) .....                                                 | 590  |
| Dyeing and Soaping. (P) Yates and Kay. (ix, 1890) .....                                            | 289  |
| Dyed, Manufacture of. (Laudenberger.) (i, 1882) .....                                              | 451  |
| Dyeing:                                                                                            |      |
| (P) Foster and Frost. (xi, 1892) .....                                                             | 237  |
| (P) Gatty. (vii, 1888) .....                                                                       | 321  |
| Dyeing, and Apparatus therefor:                                                                    |      |
| (P) Boursier. (vi, 1887) .....                                                                     | 819  |
| (P) White. (vi, 1887) .....                                                                        | 280  |
| Dyeing and Bleaching. (P) Clapham and others. (xiv, 1895) .....                                    | 903  |
| Dyeing and Finishing Textile. (P) Heys. From Danzer, Simian, and De Marcin. (vi, 1887) .....       | 544  |
| Dyeing, Aniline Black. (P) Thompson. From Desroix. (iv, 1885) .....                                | 592  |
| Dyeing Colours on. (P) Wythe and Morton. (xiv, 1895) .....                                         | 749  |
| Dyeing Cotton. (P) Gatty. (iv, 1885) .....                                                         | 184  |
| (iv, 1887) .....                                                                                   | 727  |
| Dyeing Cotton and Silk. (P) Clarke and Tamsley. (iii, 1884) .....                                  | 505  |
| Dyeing, Method and Apparatus for. (P) Hepworth. (viii, 1889) .....                                 | 78   |
| Dyeing, Mixed. (P) Ingham. (ix, 1890) .....                                                        | 174  |
| (xiv, 1895) .....                                                                                  | 34   |
| Dyeing, Mordanting, and Treating. (P) Relitt. (xii, 1891) .....                                    | 513  |
| Dyeing or Painting on, and Apparatus employed. (P) Dratz. (vii, 1889) .....                        | 703  |
| Dyeing or Printing, in Black. (P) Mewburn. From "Société Jeannole et Compagnie." (vii, 1888) ..... | 747  |
| Dyeing, Tanning, and Mordanting Teazled. (P) Goldschmidt. (xi, 1892) .....                         | 321  |
| Dyeing Textile. (P) Hoyle and Neill. (xii, 1893) .....                                             | 261  |
| Dyeing Woollen and other. (P) Bannister. (viii, 1889) .....                                        | 190  |
| Finishing with Alkaline Solutions of Silk, Wool, or Feathers. (P) Hoseman. (i, 1882) .....         | 27   |
| For Sacks or Bags. (P) Hollick. (xi, 1892) .....                                                   | 158  |
| From Wood &c., Manufacture of. (P) de Pass. From McLauchlin and Hand. (xiv, 1895) .....            | 183  |
| Imparting Silk-like Lustre to. (P) Green. (ix, 1890) .....                                         | 936  |
| Imparting Silky Appearance to. (P) Brodbeck. (x, 1891) .....                                       | 540  |
| Indelibly Marking. (P) Cross and Bevan. From Beadle. (xiii, 1894) .....                            | 1191 |
| Indiarubber, Manufacture of. (P) Maudeberg and Rothband. (vii, 1888) .....                         | 33   |
| Indiarubber Waterproof, Manufacture of. (P) Matthew. (vi, 1887) .....                              | 549  |
| Iridescent, Manufacture of. (P) Voland. (xii, 1893) .....                                          | 757  |
| Machine for Cleaning Silk. (P) Grube. (ii, 1883) .....                                             | 244  |

| Prevention of Foaming. (Honic.) (viii, 1889).....                                                      | 390      |
| Treatment of Boiling (Foaming). (Hesse.) (xiii, 1894).....                                             | 967      |
| Fermented Liquors, Manufacture of. (P) Thompson. From Lawton. (xi, 1892).....                          | 628, 629 |
| Fermenting Vessels. (P) Leaker and Howell. (x, 1891).....                                              | 843      |
| Ferric Alginate. (Stanford.) (v, 1886).....                                                            | 220      |
| Chloride, Action of Steam on. (Rousseau.) (xii, 1893).....                                             | 601      |
| Chloride, Additive Compound of, with Nitric Oxide. (Thomas.) (xiv, 1895).....                          | 832      |
| Chloride and Antipyrine, Production of Compound of. (P) Knoll. (xiv, 1895).....                        | 505      |
| Chloride for Copper Etching. (Weissenberger.) (ix, 1890).....                                          | 892      |

## Ferric—cont.

|                                                                                                              |                                 |
|--------------------------------------------------------------------------------------------------------------|---------------------------------|
| Chloride, Manufacture of:                                                                                    |                                 |
| (P) Buisine. (xii, 1893).....                                                                                | 354                             |
| (P) Kidd. (xii, 1893).....                                                                                   | 603                             |
| Chloride Preparation for Treatment of Sewage Water. (P) Burghardt. (xii, 1893).....                          | 778, 779                        |
| Chloride Solution, Arsenic in. (Buehner.) (vi, 1887).....                                                    | 522                             |
| Chloride, Treating Galvanising Waste Liquors to Obtain. (P) Wilson and Harvey. (xi, 1892).....               | 433                             |
| Compounds, Treatment of Sewage by. (P) Tanner. (xiii, 1894).....                                             | 538                             |
| Hydrate, Action of, on Alizarin and Calcium Acetate. (Liechti and Suida.) (v, 1886).....                     | 524                             |
| Hydrate, Action of, on Cane Sugar. (Schachtrupp and Spunt.) (xii, 1893).....                                 | 940                             |
| Hydrate as an Indicator in Determining Zinc. (Minor.) (ix, 1890).....                                        | 109                             |
| Hydroxide, Behaviour of Tricalcium Phosphate towards. (Georgievics.) (xi, 1892).....                         | 254                             |
| Hydroxide, Precipitation of Clay by. (Leeds.) (x, 1891).....                                                 | 721                             |
| Oxalate as a Reducer. (Belitski.) (ix, 1890).....                                                            | 413                             |
| Oxide, Action of, on Cane-Sugar. (Schachtrupp and Spunt.) (xii, 1893).....                                   | 940                             |
| Oxide, Action of, on Sulphates at a High Temperature. (Scheurer-Kestner.) (iv, 1885).....                    | 281                             |
| Oxide, App. for Prod. of. (P) Crossley and Jones. (x, 1891).....                                             | 472                             |
| Oxide, Dissolution of Anhydrous. (Storch.) (xii, 1893).....                                                  | 868                             |
| Oxide, Estimation of, by Nitroso- $\beta$ -Naphthol. (Breutel.) (vi, 1887).....                              | 151                             |
| Oxide for Extracting Colours from Wine. (Cazeneuve.) (v, 1886).....                                          | 179                             |
| Oxide in Iron Ores, Estimation of. (Blum.) (vii, 1888).....                                                  | 456                             |
| Oxide in Mineral Phosphates, Estimation of. (Hess.) (xiv, 1895).....                                         | 511                             |
| Oxide, Production of:                                                                                        |                                 |
| (P) Lunze and Maxwell-Lyte. (xiii, 1894).....                                                                | 734                             |
| (P) Mawdsley and Macfarlane. (v, 1886).....                                                                  | 536                             |
| Oxide, Recovery of, from Ferrous Chloride. (P) d'Andria. (xii, 1893).....                                    | 263                             |
| Oxide, Relative Affinities of Hydrochloric and Oxalic Acids for. (Lemoine.) (xii, 1893).....                 | 760                             |
| Oxide, Separation of, from Alumina. (Borntrager.) (xii, 1893).....                                           | 712                             |
| Oxides, Apparatus for Producing. (P) Crossley. (xi, 1892).....                                               | 614                             |
| Phosphate, Dissociation of. (Lachowicz.) (xii, 1893).....                                                    | 167                             |
| Salts, Purification of Water by. (Buisine.) (xii, 1893).....                                                 | 1052                            |
| Salts, Reduction of. (Storch.) (xii, 1893).....                                                              | 866                             |
| Sulphate, Danger to Steam Boilers from. (List.) (iii, 1884).....                                             | 469                             |
| Sulphate for Detection of Iodides. (Cavazzi.) (iii, 1884).....                                               | 331                             |
| Sulphate, Utilisation of Liquors containing. (P) Tralls and Burnmeister. (xii, 1893).....                    | 928                             |
| See also under Iron.                                                                                         |                                 |
| Ferricyanide Salts, Preparation of. (Kassner.) (xiii, 1894).....                                             | 392                             |
| Ferricyanides, Fixing of Artificial Dyestuffs by. (Reber.) (iv, 1885).....                                   | 342                             |
| New Class of. (Muller.) (vi, 1887).....                                                                      | 545                             |
| Ferricyanogen Salts, Production of. (P) Clark. From Deutsche Gold und Silber-scheideanstalt. (xi, 1892)..... | 1005                            |
| Ferro-Aluminium, Analysis of. (Ziegler.) (x, 1891).....                                                      | 388                             |
| Manufacture of. (P) Faure. (ix, 1890).....                                                                   | 1041                            |
| Specific Gravity of Pure. (Hogg.) (xii, 1893).....                                                           | 239                             |
| Valuation of. (Regelsberger.) (x, 1891).....                                                                 | 1633                            |
| Ferroboreon, Manufacture of. (P) Leffler. (xiii, 1894).....                                                  | 1201                            |
| Ferrobrown, Manufacture of. (P) Bott. (xi, 1892).....                                                        | 693                             |
| Ferrocchrome, Decomp. and Analysis of. (Warren.) (xi, 1892).....                                             | 460                             |
| Determination of Chromium in. (Spuller and Kalman.) (xii, 1893).....                                         | 950                             |
| Ferrocchromium Alloys. (Schneider.) (iv, 1885).....                                                          | 678                             |

| Utilisation of Waste Residues of. (P) (iv, 1885).....                                    | 201      |
| Utilising Oils or Gases as. (P) Welch. (vi, 1887).....                                   | 538      |
| Utilising Waste of Distilleries, &c., for Preparation of. (P) Parks. (x, 1891).....      | 814      |
| Value of Coal-Tar Pitch for Patent. (Muck.) (ix, 1890).....                              | 47       |
| Value of Gases as. (Payne.) (xii, 1893).....                                             | 1016     |
| Value of Straw as. (xii, 1893).....                                                      | 251      |
| Fuels, Apparatus for Gasification of. (P) Wise. From Solvay and Semet. (x, 1891).....    | 243      |
| Chemistry of Mineral. (Boussingault.) (ii, 1884).....                                    | 159      |
| Estimation of Caloric Value of. (Rowan.) (vii, 1888) 195, 308                            |          |
| Estimation of Thermal Effects of. (Hempel.) (xii, 1893).....                             | 179      |
| Investigation of. (Lunge.) (i, 1882).....                                                | 13       |
| Nitrogen in, and Yield of Ammonia therefrom. (Tichauer.) (xiv, 1895).....                | 143      |
| Valuation of. (Fischer.) (vii, 1888, 690; (xiii, 1894).....                              | 420      |
| Fuller's Earth, Apparatus for Washing, &c. (P) Sheppard. (ix, 1890).....                 | 273      |
| Earth at Dunning. (T.R.) (xii, 1893).....                                                | 477      |
| Earth, Preparation of, for Manufactures:                                                 |          |
| (P) Candy. (xi, 1887).....                                                               | 660      |
| (P) Dames. (vii, 1888).....                                                              | 324      |
| Spiral Slide Rule for Chemical Calculations. (Watson.) (xi, 1892).....                   | 321      |
| Fumaric Acid, Alkaloids of. (Battandier.) (xiv, 1895).....                               | 883      |
| Fumaric Acid, Conversion of Maleic Acid into. (Skraup.) (x, 1891).....                   | 215      |
| Fume in Lead Works, Treatment of. (P) Warwick. (vi, 1887).....                           | 218      |
| Or Smoke, Collecting Solids from. (P) Thompson. From Dewey. (ix, 1890).....              | 48       |
| Fumes, Absorbing and Utilising Sulphuric and Sulphurous Acid. (P) Thorp. (ix, 1890)..... | 623      |
| App. for Purif. of Gaseous. (P) Purcell. (xi, 1892).....                                 | 1025     |
| Arrangements for Treating. (P) Salmon. (xii, 1893).....                                  | 437      |
| Condensers for Acid. (P) Boulton and Sanceau. (xiv, 1895).....                           | 658      |
| Condensing Metallic. (P) Elliott. (xi, 1892).....                                        | 822      |
| From Electric Batteries, Preventing Escape of. (P) Bailey and Warner. (vi, 1887).....    | 379, 379 |
| From Kilns, Deodorising. (P) Ashby. (iv, 1885).....                                      | 415      |
| In Lead Works, Treatment of. (P) Warwick. (xiv, 1895).....                               | 490      |
| Poisoning by Coal-Gas and Charcoal. (Poleck.) (iv, 1885).....                            | 608      |
| Fumigant for Horticultural Buildings. (P) Smithson. (xiii, 1894).....                    | 900      |
| Fumigants. (P) McDougall. (xiii, 1894).....                                              | 657      |
| Manufacture of. (P) McDougall. (xiii, 1894).....                                         | 833      |
| Fumigating and Disinfecting Compound, Combined. (P) Stoner and Turton. (iv, 1885).....   | 547      |
| Fumigation, Preserving Perishable Substances by. (P) Wheaton. (ix, 1890).....            | 98, 98   |
| Fungi, Importance of Edible, as Human Food. (Saltet.) (v, 1886).....                     | 171      |
| Nutritious Value of Edible. (Moerner.) (vi, 1887).....                                   | 297      |
| Saccharine Bodies in. (Bouquetot.) (x, 1891).....                                        | 56       |
| Funnel, A Dropping. (Neumann.) (vii, 1888).....                                          | 643      |
| A Measuring. (P) Dalmo. (vii, 1888).....                                                 | 315      |
| An Improved. (P) Howcroft. (viii, 1889).....                                             | 648      |
| And Measure for Liquids. (P) Brown. (ix, 1890).....                                      | 43       |
| Condensing. (Meyer.) (ii, 1884).....                                                     | 650      |
| For Filtration in Absence of Air. (Allihn.) (iv, 1885).....                              | 308      |
| Laboratory Dropping. (Pollack.) (vi, 1887).....                                          | 606      |
| Or Tin-Dish, Indicating. (P) Fitter and Buxley. (xiv, 1895).....                         | 792      |
| Separating. (Carrier.) (ii, 1884).....                                                   | 620      |

## Funnels:

|                                                                    |     |
|--------------------------------------------------------------------|-----|
| (P) Blakely. (viii, 1889).....                                     | 808 |
| (P) Gersdorff. (vi, 1887).....                                     | 364 |
| (P) Hartle. (xii, 1893).....                                       | 181 |
| Filtering. (Nickels).....(vi, 1887) 134, 327; (P) (vii, 1888)..... | 596 |

|--------------------------------------------------------------------------------------------------------|----------|
| For Filling Bottles. (P) Ebert and Loewenstein. (xiv, 1895).....                                       | 792      |
| For Filtering Liquids. (P) Kroecker. (xii, 1893).....                                                  | 915      |
| For Fluids. (P) Howard. (xii, 1893).....                                                               | 1014     |
| For Liquids. (P) Payne. (ix, 1890).....                                                                | 167      |
| For Measuring Liquids. (P) Richardson. (xi, 1892).....                                                 | 596      |
| Fur and Wool, Modes of Cleansing. (Smith.) (viii, 1889).....                                           | 24       |
| And Wool, Origin, Properties, &c. of. (Smith.) (viii, 1889).....                                       | 17       |
| Charming, from Lime. (P) Nesbit. (vi, 1887).....                                                       | 601      |
| Furs, Dyeing. (Erdmann.) (xiv, 1895).....                                                              | 802      |
| Or Skins, Dyeing. (P) Hermann. (vii, 1888).....                                                        | 747      |
| Furfuralcohol. (Schiff.) (v, 1886).....                                                                | 598      |
| And Derivatives. (Wisell and Tollens.) (xii, 1893).....                                                | 788      |
| Furfuraldehyde, Col. Matters from. (Schiff.) (v, 1886).....                                            | 377, 558 |
| Estimation of. (Guthrie and Tollens.) (ix, 1890).....                                                  | 903      |
| Presence of, in Commercial Alcohols. (Lindet.) (ix, 1890).....                                         | 1155     |
| Reactions for Detecting Fusel Oil. (Neumann-Wender.) (x, 1891).....                                    | 487      |
| Furfural-yielding Bodies from Wheat and Rye-Chaff. (Steizer and Schulze.) (ix, 1890).....              | 1143     |
| Furfural. (Guyard.) (iii, 1884).....                                                                   | 514      |
| Colour Reactions of. (Laves.) (xi, 1892).....                                                          | 848      |
| Formation of, for Detection of Arabinose. (Gans and others.) (vii, 1888).....                          | 335      |
| Quant. Determin. of. (Well and Zeisel.) (xiv, 1895).....                                               | 689      |
| Reactions of Alkaloids. (Wender.) (xii, 1893).....                                                     | 869      |
| Use of, for Detection of Sesame Oil. (Villavecchia and Fabris.) (xii, 1894).....                       | 69       |
| Furfuralhydrazone, Gravimetric Estimation of. (Krug.) (xii, 1893).....                                 | 551      |
| Furfuryl Derivatives and Sugars, New Relations Between. (Maquenne.) (ix, 1890).....                    | 202      |
| Furnace, A Hydrocarbon, for Assaying. (Ellis.) (viii, 1889).....                                       | 956      |
| An Improved. (P) Dempster. (xiii, 1894).....                                                           | 871      |
| And Apparatus for Treating Town Refuse. (P) Henley and Thwaite. (iv, 1885).....                        | 545      |
| App. for Combustion of Fuel. (P) Marshall. (xi, 1892).....                                             | 733      |
| Assay. (Wood.) (x, 1891).....                                                                          | 701      |
| Black Ash, New. (Smith.) (vi, 1887).....                                                               | 416      |
| Basic Siemens-Martin. (Leo.) (x, 1891).....                                                            | 772      |
| Blast and Cupola, Extraction of Lead in. (Williger.) (i, 1882).....                                    | 154      |
| Charges, Slide-rule for Calculating. (Wingham.) (xi, 1892).....                                        | 821      |
| Coal in the Lead Blast. (Dwight.) (x, 1891).....                                                       | 933      |
| Coal Smelting and Carbonisation. (P) Hiltawski. (ii, 1883).....                                        | 205      |
| Combined Gas and Coke. (P) Schomburg. (xii, 1893).....                                                 | 589      |
| Combustion. (Vollhard.) (xiv, 1895).....                                                               | 290      |
| Cowles' Aluminium. (Thompson.) (v, 1886).....                                                          | 206      |
| Crucible. (P) Mills. From Fischer. (ii, 1884).....                                                     | 321      |
| Destructor, Experiments at Berlin. (xiv, 1895).....                                                    | 881      |
| Desulphurising and Oxidising Ore. (P) Browne. (i, 1882).....                                           | 311      |
| Double-puddling. (P) Springer. (ii, 1883).....                                                         | 135      |
| Economic Position of Open-Hearth Steel. (Campbell.) (T.R.) (xiii, 1894).....                           | 82       |
| Electric for Laboratory Use. (Readman.) (xiii, 1894).....                                              | 375      |
| Electric Melting and Reducing. (P) Urbanitzky. (xiv, 1895).....                                        | 661      |
| Fires. (P) Murray. From Mannesmann. (x, 1891).....                                                     | 448      |
| For Annealing Glass. (P) Tondur. (i, 1882).....                                                        | 280      |
| For Annealing Plate Glass with Gas. (P) Gilles. (viii, 1889).....                                      | 393      |
| For Burning Earthware. (P) Dumachie. (i, 1882).....                                                    | 591      |
| For Burning Lime, &c. (P) Justice. From Dietzsch. (v, 1886).....                                       | 298      |
| For Burning Petroleum. (Crane.) (xiii, 1894).....                                                      | 21       |
| For Charcoal. (P) Gütler. (viii, 1889).....                                                            | 60       |
| For Chemical Operations:                                                                               |          |
| (P) Davis. (x, 1891).....                                                                              | 528      |
| (Weldon.) (iv, 1885).....                                                                              | 171      |
| For Cinnabar "Fines" at Almaden. (viii, 1889).....                                                     | 709      |
| For Continuously Reducing Iron Ore. (P) Siemens. (v, 1886).....                                        | 608      |
| For Decomposition of Bicarbonate of Soda. (P) Solvay. (vii, 1888).....                                 | 628      |
| For Deodorising and Consuming Excrement. (P) Kozloff. (xii, 1893).....                                 | 617      |
| For Evaporating and Calcining. (P) Siemens. (vi, 1887).....                                            | 649      |
| For Glass Melting:                                                                                     |          |
| (P) Frank. (ii, 1883).....                                                                             | 43       |
| (P) Leuffgen. (ii, 1883).....                                                                          | 178      |
| (P) Smith. (i, 1882).....                                                                              | 503      |
| For Lead Smelting. (Clenhall.) (i, 1882).....                                                          | 234      |
| For Manufacture of Sulphate of Soda, &c., or for Calcining Ores. (P) Black and Larkin. (iv, 1885)..... | 212      |
| For Obtaining Crude Copper direct from Ore. (P) Clark. From Garnier. (iv, 1885).....                   | 225      |
| For Preparation of Carbonic Acid. (Meyer-Mülser.) (iii, 1884).....                                     | 568      |
| For Preparing Crude Glass by Leuffgen's Method. (P) Quaglio. (ix, 1890).....                           | 393      |
| For Producing Chlorine. (P) Solvay. (vi, 1887).....                                                    | 661      |
| For Production of Gas from Oil. (P) Schwarz. (i, 1882).....                                            | 314      |
| For Prod. of Sulphates, &c. (P) Mackenzie. (ii, 1883).....                                             | 477      |
| For Production of Zinc. (P) Kleemann. (iv, 1885).....                                                  | 56       |
| For Recovering Salts from Lyes. (P) Dahl. (vi, 1887).....                                              | 442      |

## Furnace—cont.

|                                                                                                                                              | PAGE |
|----------------------------------------------------------------------------------------------------------------------------------------------|------|
| For Recovering Soda Ash. (P) Hitchen. (iv, 1885) .....                                                                                       | 116  |
| For Reducing or Smelting Ores. (P) Smethers. (xii, 1893) ..                                                                                  | 48   |
| For Reducing Zinc, &c. (P) Nawrocki. From Quaglio, Pintsch, and Lentz. (iii, 1884) .....                                                     | 639  |
| For Refining Metals and Alloys. (P) Alzugaray. (ix, 1890) ..                                                                                 | 950  |
| For Revivifying Bone Black. (P) Weber. (i, 1882) .....                                                                                       | 463  |
| For Roasting Ores. (P) Lake. From Walker and Carter. (iii, 1884) .....                                                                       | 320  |
| For Smelting or Fusing Metals. (P) Quaglio, Pintsch, and Lentz. (iv, 1885) .....                                                             | 503  |
| For Tempering Malleable Cast Iron. (Neshe.) (i, 1882) ..                                                                                     | 234  |
| For Treating Copper and its Alloys. (P) Keys. (ix, 1890) ..                                                                                  | 1041 |
| For Treating Ingots, &c. (P) Allen. (xiv, 1895) .....                                                                                        | 275  |
| For Treating Sulphur Ores. (P) McDougall. (iii, 1884) ..                                                                                     | 320  |
| For Treatment of Refractory Ores. (P) Fauvel. (xi, 1892) .....                                                                               | 613  |
| For Working Ores. (P) Allison. From Storer and others. (xiii, 1894) .....                                                                    | 816  |
| For Zinc Ores. (P) Neundahl. (iv, 1885) .....                                                                                                | 55   |
| Fumes, Condensing Metallic. (P) Elliott. (xi, 1892) ..                                                                                       | 822  |
| Fumes, Extraction of Sulphurous Acid from. (P) Brydges. From Hanisch and Schroder. (iii, 1884) .....                                         | 107  |
| Gas, for Laboratory Purposes. (iii, 1884) .....                                                                                              | 512  |
| Gas, with Continuous Action. (P) Langdon. (i, 1882) ..                                                                                       | 491  |
| Gases, Composition of. (Juris'h.) (xii, 1893) .....                                                                                          | 813  |
| Gases, Obtaining Ammonia from. (P) Main and Galbraith. (iv, 1885) .....                                                                      | 111  |
| Gases, Separation of Carbonic Oxide from. (P) Huntington. (iv, 1885) .....                                                                   | 737  |
| Gases, Utilisation of Blast-. (Schraeder and Macco: Lurmann, Belani, Alexander, Korting, Young and Beilby, and Ehrenwerth.) (iv, 1885) ..... | 217  |
| "Godillot," for Inferior Fuels. (Brull.) (ix, 1890) .....                                                                                    | 44   |
| Grate in the Form of Steps. (P) Randach. (ii, 1883) ..                                                                                       | 254  |
| Heated by Generator Gases. (P) Book. (i, 1882) .....                                                                                         | 505  |
| Lining, Basic. (P) Alzugaray. (ix, 1890) .....                                                                                               | 922  |
| Linings, Mannf. of. (P) Fould and Genreau. (vi, 1887) ..                                                                                     | 43   |
| Linings, Use of Limestone for. (P) (i, 1882) .....                                                                                           | 370  |
| Mechanical Decomposing. (Larkin.) (iv, 1885) .....                                                                                           | 33   |
| Metallurgical and Chemical. (P) Wilkinson. (xiv, 1895) ..                                                                                    | 736  |
| Modified Combustion. (Fuchs.) (xii, 1893) .....                                                                                              | 151  |
| Oil Flame. (P) Lucien Light Company, Limited, and Jarman. (x, 1891) .....                                                                    | 533  |
| "Ore Process" in the Basic Open-Hearth. (Leo.) (xi, 1892) .....                                                                              | 243  |
| Pan and Concentrator for Boiling Fish Livers. (P) Lotherington and Spencer. (xiii, 1894) .....                                               | 162  |
| Recuperative Gas. (Bigot.) (xiii, 1894) .....                                                                                                | 174  |
| Refuse, and Apparatus for Manufacturing Gas, Combined. (P) Lomax. (xii, 1893) .....                                                          | 31   |
| Regenerative Coke. (P) Hoffmann. (i, 1882) .....                                                                                             | 492  |
| Regenerative, for Lead Smelting. (P) Miskev. (iv, 1885) ..                                                                                   | 51   |
| Regenerative, for Manufacture of Gas. (P) Walsh. From Ryex. (iii, 1884) .....                                                                | 565  |
| Regenerative Gas, for Reduction of Zinc Ores. (P) Dor. (xi, 1892) .....                                                                      | 615  |
| Results from Springer's Double Puddling. (iii, 1884) ..                                                                                      | 174  |
| Reverberatory. (P) Fenwick and Cochrane. (i, 1882) ..                                                                                        | 177  |
| St. Bede Patent Decomposing. (Renoldson.) (iv, 1885) ..                                                                                      | 316  |
| Scaffolding in the Blast-. (Van Ustlen.) (xii, 1893) .....                                                                                   | 927  |
| Siemens, Construction of the. (Addie.) (v, 1891) .....                                                                                       | 934  |
| Siemens, Study of the New. (Dunour.) (xii, 1893) .....                                                                                       | 662  |
| Siemens, to Recover Waste Gases and Heat. (Head and Pouff.) (viii, 1889) .....                                                               | 764  |
| Smelting. (P) Bramhall. (iv, 1885) .....                                                                                                     | 223  |
| Smelting, Construction of: (P) Bliss. (i, 1882) .....                                                                                        | 192  |
| (P) Ferrie. (i, 1882) .....                                                                                                                  | 457  |
| Smoke-Consuming Arrangements. (P) Michalk. (xiv, 1895) .....                                                                                 | 956  |
| Smoke-Consuming, Construction of. (P) Heiser. (ii, 1883) ..                                                                                  | 406  |
| Use of Hempel's, to Demonstrate Manufacturing Processes. (Lüpke.) (xii, 1893) .....                                                          | 865  |
| Water-Oil Gas in the Steel. (viii, 1889) .....                                                                                               | 51   |
| With Self-acting Stoker. (P) Unger. (xiv, 1895) .....                                                                                        | 857  |
| Working of Blast-. (Dujtner.) (iv, 1885) .....                                                                                               | 677  |

|-------------------------------------------------------------------------------------------------------------------|------|
| Apparatus for Utilising Waste Heat from. (P) Kingsford. (iv, 1885) .....                                          | 582  |
| Apparatus for Withdrawing Metals, &c. from. (P) Rylands and Homer. (x, 1891) .....                                | 36   |
| Appliances for Recording Temperature of. (Roberts-Austen.) (xi, 1892) .....                                       | 840  |
| Application of Water-Gas to. (P) Fox. (v, 1891) .....                                                             | 552  |
| Arrangement for Charging Connected. (P) Sachs. (i, 1882) .....                                                    | 440  |
| Arsenical Bottoms in Basic-lined Treatment of, in Copper Smelting. (Glehnst.) (x, 1891) .....                     | 4    |
| Bagasse-. (P) Fairweather. From The Babcock and Wilcox Co. (viii, 1889) .....                                     | 910  |
| Basic-lined. (P) Darby. (xi, 1892) .....                                                                          | 614  |
| Basic Linings for Steel and Iron. (P) Batho. (iv, 1885) ..                                                        | 224  |
| Blast-: (P) Evans. (viii, 1889) .....                                                                             | 287  |
| (P) Hawdon and Howson. (xii, 1893) .....                                                                          | 161  |
| Blast and Cupola. (P) Swain. (iv, 1885) .....                                                                     | 121  |
| Blast, Construction of. (P) Rushforth. (xii, 1893) ..                                                             | 350  |
| Blast, Processes for Recovery of Tar and Ammonia from. (Jones.) (iv, 1885) .....                                  | 737  |
| Blast, Production of Antimony in. (Ballinz.) (v, 1886) ..                                                         | 328  |
| Boiler and other. (P) Newton. (xiv, 1895) .....                                                                   | 643  |
| Bricks for Production of. (P) Bird. (xi, 1892) .....                                                              | 634  |
| Burning Hydrocarbon Fluids as Fuel in. (P) Lyle. (vii, 1888) .....                                                | 381  |
| Burning Liquid Fuel in Boiler. (P) Haddan. From Amoroso. (ix, 1890) .....                                         | 596  |
| Calcining. (P) Dauber. (xii, 1893) .....                                                                          | 811  |
| Capacity and Form of Blast-. (Hawdon.) (xiii, 1894) ..                                                            | 643  |
| Charging Materials into Blast-. (P) Wise. From Solvay. (x, 1891) .....                                            | 749  |
| Cinder Car for Blast-. (P) Kennedy. (i, 1882) .....                                                               | 508  |
| Coke. (P) Collin. (xii, 1893) .....                                                                               | 438  |
| Coke, for Utilising Distillation Products. (P) Hüssener. (i, 1882) .....                                          | 180  |
| Coke, Modifications in. (P) Muller. (ii, 1883) .....                                                              | 236  |
| Combustion in, Promotion of. (P) Norman and Simpson. (x, 1891) .....                                              | 245  |
| Combustion of Fuel in. (P) Chandler and Kallinas. (xiv, 1895) .....                                               | 642  |
| Combustion of Gaseous Fuel in. (P) Gaseous and Liquid Fuel Supply Co. and Thwaite. (viii, 1889) .....             | 605  |
| Combustion of Gases in. (P) Hargreaves. (vi, 1882) ..                                                             | 806  |
| Condensing Balloons for Zinc. (P) Mielchen. (i, 1882) ..                                                          | 458  |
| Construction of: (P) Cohen and Hermann. (x, 1891) .....                                                           | 245  |
| (P) Meldrum. (xiv, 1895) .....                                                                                    | 855  |
| (P) Sargent. (xi, 1892) .....                                                                                     | 994  |
| (P) Stein. (xii, 1893) .....                                                                                      | 585  |
| (P) Williams. (xi, 1892) .....                                                                                    | 895  |
| Continuous Working Recuperative Gas. (P) Dauber. (xiv, 1895) .....                                                | 586  |
| Converter. (P) Boulton. From Bookwalter. (ix, 1890) ..                                                            | 950  |
| Crucible: (P) Meichner. (xi, 1892) .....                                                                          | 616  |
| (P) Plat. (viii, 1889) .....                                                                                      | 400  |
| Cupola and Blast-. (P) Ross. (x, 1891) .....                                                                      | 260  |
| Cupola, Construction of. (P) Kerr. (xi, 1892) .....                                                               | 615  |
| Cupola, Modified Form of. (P) Bessan. (i, 1882) .....                                                             | 410  |
| Cuvette, Producing Plate Glass in. (P) Schluder and Verstandig. (xiv, 1895) .....                                 | 806  |
| Destructor. (P) Abell and Essequibo. (xiv, 1895) .....                                                            | 1058 |
| Double Shaft. (P) Ehrenwerth. (viii, 1889) .....                                                                  | 873  |
| Electric: (P) Chaplet. (xiii, 1894) .....                                                                         | 936  |
| (P) Crompton. (xiii, 1894) .....                                                                                  | 901  |
| (P) Justice. From Acheson. (xiv, 1895) .....                                                                      | 585  |
| (P) Kremsen. (xii, 1893) .....                                                                                    | 934  |
| (P) Lake. From Girard and Street. (viii, 1894) .....                                                              | 624  |
| (P) Parker. (ix, 1890) .....                                                                                      | 869  |
| Electric Heating of. (P) Poschinger. (xii, 1893) .....                                                            | 698  |
| Employed in Alkali Manufacture, Mechanical. (Mactear.) (First Proceedings) .....                                  | 26   |
| Employment of Different Kinds of Fuel in Blast-. (Fehland, Bell, Kupelwieser, and Schmidhammer.) (iv, 1885) ..... | 216  |
| Eyepate for Glass. (P) Kane. (i, 1882) .....                                                                      | 455  |
| Fire Gases from Boiler, Treating. (P) Patterson. (xiv, 1895) .....                                                | 791  |
| Fireproof Cement for. (P) Taylor. (xii, 1893) .....                                                               | 355  |
| Flame and Boiler, Modifications in. (P) Wiltmann. (ii, 1883) .....                                                | 161  |
| For Aiding Combustion. (P) Beveridge. (viii, 1889) ..                                                             | 39   |
| For Annealing Glass. (P) Bonth. (xi, 1892) .....                                                                  | 188  |
| For Burning Bone-Black. (P) Weber. (ix, 1890) .....                                                               | 618  |
| For Burning Bricks: (P) Moller. (x, 1891) .....                                                                   | 259  |
| (P) Trevisan. (x, 1891) .....                                                                                     | 259  |
| For Burning Cement, &c. (P) Justice. From Dietzsch. (v, 1886) .....                                               | 100  |
| For Burning Hydrocarbons: (P) Findlay. (ii, 1883) .....                                                           | 264  |
| (P) Mundell and Gordon. (ii, 1883) .....                                                                          | 263  |
| (P) Thompson. From Wright and Williams. (vii, 1888) .....                                                         | 30   |
| For Burning Liquid Fuel: (P) Sahlström and Hill. (x, 1891) .....                                                  | 353  |
| (P) Sahlström, Bromfield, and Hill. (ix, 1890) .....                                                              | 1118 |

|---------------------------------------------------------------------------------------------------------------------------|----------|
| For Burning Pyrites. (P) Mason. (ii, 1883) .....                                                                          | 177      |
| For Burning Refuse. (P) Elliott and Paton. (xii, 1891) ..                                                                 | 898      |
| For Burning Sludge, &c. (P) Bearman and Deas. (xiv, 1895) .....                                                           | 644      |
| For Burning Small or Moist Fuel. (P) Abel. From Godillot. (iv, 1885) .....                                                | 111      |
| For Burning Sulphur. (P) Fish. (x, 1891) .....                                                                            | 768      |
| For Burning Sulphur Ores. (P) McDougall. (xii, 1893) ..                                                                   | 155      |
| For Burning Tin and Refuse. (P) Brown. (x, 1891) .....                                                                    | 239      |
| For Calcining Copper Ore, Regulus, &c. (P) Dahne. (ix, 1890) .....                                                        | 396      |
| For Calcining Limestone, &c. (P) Doughton. (xiv, 1895) ..                                                                 | 966      |
| For Chemical Processes. (P) Maeter. (iv, 1885) .....                                                                      | 533      |
| For Chlorinating Ores. (P) Baugh and Hinkman. (vi, 1887) .....                                                            | 599      |
| For Coal Dust, &c. (P) Pelzer. (xiv, 1895) .....                                                                          | 740      |
| For Coking or Distilling Coal. (P) Senet and Solvay. (i, 1882) .....                                                      | 398      |
| For Concentrating Sulphuric Acid. (P) Nogrier. (x, 1891) .....                                                            | 46       |
| For Concentrating Sulphuric Acid and other Liquids. (P) Bradbury. (xiii, 1894) .....                                      | 251      |
| For Consuming Refuse. (P) Baker. (xiv, 1895) .....                                                                        | 644      |
| For Controlling Combustion of Solid Fuel. (P) Nohel. (xii, 1894) .....                                                    | 874      |
| For Decomposing Metallic Oxichlorides. (P) Heinzenhinz. (vii, 1888) .....                                                 | 628      |
| For Destroying Town Refuse. (P) Horsfall. (xii, 1893) ..                                                                  | 172      |
| For Distilling Mineral Oils. (P) Morton and Fyfe. (v, 1883) .....                                                         | 594      |
| For Distilling Zinc, Cadmium, &c. (P) Golby. From Francis. (xiii, 1894) .....                                             | 402      |
| For Drying Peat Briquettes. (P) Stauber. (xiii, 1894) ..                                                                  | 715      |
| For Electric Smelting. (P) Newerth. (xii, 1894) .....                                                                     | 160      |
| For Extracting Sulphur. (P) Black and Larkin. (i, 1882) ..                                                                | 232      |
| For Firing Pottery. (P) Plant. (xi, 1892) .....                                                                           | 434      |
| For Generation of Heat or Gas. (P) Blum. (xii, 1893) ..                                                                   | 584      |
| For Heating Iron. (P) Felton. (ii, 1883) .....                                                                            | 382      |
| For Heating or Melting Metals. (P) Butler. (xii, 1893) ..                                                                 | 450      |
| For Heating Pots and Crucibles. (P) Foster. (viii, 1889) ..                                                               | 884      |
| For Heating Solids out of Contact with Fuel. (P) Weldon. From Pechiney. (v, 1883) .....                                   | 471      |
| For Heating Steam Generators. (P) Kneen. (xiv, 1895) ..                                                                   | 643      |
| For Making Coke or Charcoal. (P) Armour. (xi, 1892) ..                                                                    | 152, 896 |
| For Making Malleable Iron and Steel. (P) Barch and Allen. (iv, 1882) .....                                                | 223      |
| For Manufacture of Gas. (P) Thompson. From Stettiner Chamotte-Fabrik Aktien-Gesellschaft vormals Didier. (iv, 1883) ..... | 110      |
| For Manufacture of Glass. (P) King and Little. (i, 1882) .....                                                            | 110      |
| For Manufacture of Phosphorus, Electrical. (P) Parker. (xi, 1892) .....                                                   | 827      |
| For Manufacture of Steel. (P) Simonds. (xii, 1893) .....                                                                  | 843      |
| For Melting. (P) Mallabaud. (xii, 1893) .....                                                                             | 309      |
| For Melting Glass, Puddling Iron, &c. (P) Bateson. (xiv, 1895) .....                                                      | 1036     |
| For Melting Metals. (P) Fletcher. (xii, 1893) .....                                                                       | 451      |
| For Production of Glass. (P) Rylands. (xi, 1892) .....                                                                    | 1067     |
| For Puddling and Heating. (P) Haigh. (x, 1891) .....                                                                      | 1011     |
| For Quicksilver. (ix, 1890) .....                                                                                         | 77       |
| For Recovering Tin from Tin Slag. (P) Letcher. (ix, 1890) .....                                                           | 350      |
| For Refining Camphor. (P) Lake. From McKenzie and Braker. (ix, 1890) .....                                                | 762      |
| For Slack and Refuse. (P) Miles. (ix, 1890) .....                                                                         | 728      |
| For Smelting and Refining Copper. (P) Vienna. (xiii, 1894) .....                                                          | 644      |
| For Smelting and Refining Metals. (P) Bennett. (vi, 1887) .....                                                           | 371      |
| For Smelting Copper. (P) Bibby. (xi, 1892) .....                                                                          | 922      |
| For Smelting Copper Ores. (P) Richards. (x, 1891) .....                                                                   | 1010     |
| For Smelting Ores. (P) Hurry. (ii, 1883) .....                                                                            | 285      |
| For Smelting Ores by Electricity. (P) Cowles. (v, 1883) .....                                                             | 331      |
| For Smokeless Combustion of Fuel. (P) Armstrong. (xiii, 1894) .....                                                       | 1051     |
| For Steam Generators. (P) Davies. (viii, 1889) .....                                                                      | 873      |
| For Steel-making. (P) Filassier and Faure. (xi, 1892) ..                                                                  | 695      |
| For Town Refuse. (P) Willoughby. (xiv, 1895) .....                                                                        | 767, 767 |
| For Treating Animal and Vegetable Matters. (P) Ogden. (vi, 1887) .....                                                    | 672      |
| For Treating Bodies at High Temperatures. (P) Pechiney. (vii, 1888) .....                                                 | 837      |
| For Treating Glass. (P) Thompson. (i, 1882) .....                                                                         | 410      |
| For Treating Ores. (P) Parnell. (xi, 1892) .....                                                                          | 822      |
| For Treating Ores and Metals. (P) Swain. (ii, 1883) .....                                                                 | 383      |
| For Treatment of Carbonaceous Substances. (P) Stier. (iv, 1885) .....                                                     | 149      |
| For Utilising Hydrocarbon as Fuel. (P) Dymond. From The Aerated Fuel Company. (ix, 1890) .....                            | 49       |
| From Magnesians Bricks, Construction of. (P) Clausen. (x, 1891) .....                                                     | 395      |
| Gas and Air Reversing Valves for. (P) Jardine and Ferguson. (viii, 1889) .....                                            | 767      |
| Gas, Construction of. (P) Newton. From Oakman. (xi, 1892) .....                                                           | 1013     |
| Gas, for Glass Works. (P) Regnault. (x, 1891) .....                                                                       | 354      |
| Gas Generating. (P) Mond. (iii, 1884) .....                                                                               | 232      |
| Gas Puddling. (P) Newton. From Oakman. (xi, 1892) ..                                                                      | 1013     |
| Gas retort. (P) Hegener. (i, 1882) .....                                                                                  | 144      |
| Gases and Smoke from, Treating. (P) Davy. (xi, 1892) ..                                                                   | 21       |

|----------------------------------------------------------------------------------------|----------|
| Glass:                                                                                 |          |
| (P) Brockunier and Ripley. (ii, 1883) .....                                            | 178      |
| (P) Honchin. (i, 1882) .....                                                           | 158      |
| (P) Lurmann. (i, 1882) .....                                                           | 456, 503 |
| (P) Sievert. (xii, 1893) .....                                                         | 831      |
| (P) Symmott. (v, 1886) .....                                                           | 109      |
| Having Water Jackets. (P) Clenham. (x, 1891) .....                                     | 551      |
| Heating Bed of Cynoph. (P) Winter. (ii, 1883) .....                                    | 416      |
| Heating Regenerative Gas. (Siemens.) (iv, 1885) .....                                  | 459, 620 |
| Hydrocarbon:                                                                           |          |
| (P) Boulé. From Orvis. (iii, 1884) .....                                               | 472      |
| (P) Hadden. From Leet and Neumann. (iv, 1885) ..                                       | 291      |
| (P) Thompson. From Porcelain Dental Art Co. (xiii, 1894) .....                         | 381      |
| In Blast in France in 1887. (Jordan.) (viii, 1889) ..                                  | 798      |
| In Harz Forests, Injurious Effects of Gases from. (Renss.) (i, 1882) .....             | 29       |
| Lining. (P) Siemens. (v, 1886) .....                                                   | 698      |
| Lining for:                                                                            |          |
| (P) Borsig. (i, 1882) .....                                                            | 322      |
| (P) Richards. (xii, 1893) .....                                                        | 332      |
| Linings for Metallurgical. (P) Twyman. (v, 1888) ..                                    | 494      |
| Linings of Copper, Lead, and Steel. (P) Tucker. (vi, 1887) ..                          | 511      |
| Manufacture of Glass and Soluble Silicates in Pitt. (P) Hensser. (iii, 1884) .....     | 105      |
| Manufacture of Iron in Blast. (P) Cochrane. (ii, 1883) ..                              | 285      |
| Manufacture of Steel in Puddling in France. (Jordan.) (viii, 1889) .....               | 739      |
| Melting:                                                                               |          |

| And Vapours, Apparatus for Cooling. (P) Weldon. From Pechiney. (v, 1886).....                   | 525      |
| And Vapours, Pumps for. (P) Bamister. (viii, 1889).....                                         | 111      |
| And Vapours, Relative Densities of. (Rowan.) (viii, 1889).....                                  | 183      |
| Apparatus for Absorption of:                                                                    |          |
| (P) Carlisle and Hoffman. (viii, 1889).....                                                     | 449      |
| (P) Edwards. From Lunge and Rohrmann. (v, 1886), 465; (vi, 1887).....                           | 547      |
| Apparatus for Absorption of, by Liquids:                                                        |          |
| (P) Edwards. From Rohrmann and Hiller. (v, 1886).....                                           | 423      |
| (P) Müller. (xiv, 1895).....                                                                    | 15       |
| Apparatus for Adding Volatile Substances to. (P) Fox and Blass. (viii, 1889).....               | 573      |
| Apparatus for Analysing:                                                                        |          |
| (Pfeiffer.) (xiii, 1894).....                                                                   | 63       |
| (P) Uehling and Steinbart. (xiv, 1895).....                                                     | 66       |
| Apparatus for Ascertaining Weight of. (P) Arndt. (xii, 1893).....                               | 1058     |
| Apparatus for Charging Liquids with:                                                            |          |
| (P) Levinstein. (v, 1886).....                                                                  | 36       |
| (P) Minto. (xi, 1892).....                                                                      | 506      |
| Apparatus for Charging, with Vapours. (P) Reichling. (viii, 1889).....                          | 869      |
| Apparatus for Compressing and Expanding. (P) Windhausen. (viii, 1889).....                      | 263      |
| Apparatus for Compressing Condensable. (P) Pulpert. (iv, 1885).....                             | 197      |
| Apparatus for Condensation and Liquefaction of. (P) Pullman and Lane. (xii, 1893).....          | 28       |
| Apparatus for Condensation of:                                                                  |          |
| (Lunge.) (vi, 1887).....                                                                        | 584      |
| (Lunge and Rohrmann.) (vi, 1887).....                                                           | 538      |
| Apparatus for Condensing or Heating. (P) Klein. (ix, 1890).....                                 | 849      |
| Apparatus for Cooling:                                                                          |          |
| (P) Boul. From Fischer. (vii, 1888).....                                                        | 554      |
| (P) Price. (xiii, 1894).....                                                                    | 1018     |
| Apparatus for Cooling Sulphurous. (P) Albert and others. (viii, 1889).....                      | 119      |
| Apparatus for Destroying Noxious. (P) Keating. (vi, 1887).....                                  | 222      |
| Apparatus for Detecting. (P) Shaw. (vii, 1889).....                                             | 425      |
| Apparatus for Detecting and Measuring Inflammable. (P) Tichman. (xiii, 1894).....               | 1052     |
| Apparatus for Detecting Explosive:                                                              |          |
| (P) Bosshardt. From Molas. (vii, 1888).....                                                     | 837      |
| (P) Swan. (vii, 1888).....                                                                      | 125      |
| Apparatus for Detecting Inflammable. (P) Fletcher. (xiii, 1894).....                            | 663      |
| Apparatus for Determination of Carbon Dioxide in Furnace. (x, 1891).....                        | 735      |
| Apparatus for Determining Density of. (Meslans.) (xiii, 1894).....                              | 64       |
| Apparatus for Directing Passage and Controlling Speed of. (P) Ross and others. (xii, 1893)..... | 659      |
| Apparatus for Distillation and Liquefaction of. (P) Puppelt and Rigg. (viii, 1889).....         | 970      |
| Apparatus for Drying and Washing. (Walter.) (iii, 1884).....                                    | 580      |
| Apparatus for Effecting Decomposition of. (P) Brock and others. (xiv, 1895).....                | 572, 572 |
| Apparatus for Ejecting or Withdrawing. (P) Edwards. From Kohrmann. (xi, 1892).....              | 422      |
| Apparatus for Expulsion of Noxious, from Solutions. (P) Bohm. (viii, 1889).....                 | 399      |
| Apparatus for Extracting Benzene from. (P) Coates. (iv, 1885).....                              | 488      |
| Apparatus for Extracting Tar and Ammonia from Blast Furnace. (P) Dempster. (iv, 1885).....      | 531      |
| Apparatus for Extraction of:                                                                    |          |
| (P) Cumliffe. (viii, 1889).....                                                                 | 970      |
| (P) Cumliffe and Lund. (vi, 1887).....                                                          | 814      |
| Apparatus for Generating and Hydrating. (P) Clark. From Maynard. (iv, 1885).....                | 213      |
| App. for Generating, from Liquids. (Thiele.) (viii, 1889).....                                  | 1010     |
| App. for Generation of. (Ulrich and Foerster.) (x, 1891).....                                   | 794      |
| Apparatus for Heating. (P) Mills. From Seile-Goujon. (x, 1891).....                             | 214      |
| Apparatus for Indicating Explosive. (P) Stern and Kaufmann. (ix, 1890).....                     | 81       |
| Apparatus for Indicating Weight or Volume of. (P) Lonsdon. From Krupp. (xii, 1893).....         | 745      |
| Apparatus for Inducing Complete Combustion of. (P) Chinnery. (vi, 1887).....                    | 651      |
| Apparatus for Lighting, Extracting, &c., Sewer. (P) Horton. (xiv, 1895).....                    | 767      |
| Apparatus for Manufacture of:                                                                   |          |
| (P) Cosh. (viii, 1889).....                                                                     | 534      |
| (P) Cryer. (x, 1891).....                                                                       | 528      |
| (P) Farinaux. (vi, 1887).....                                                                   | 500      |
| (P) Wood. (ix, 1890).....                                                                       | 1118     |
| Apparatus for Measuring and Delivering. (P) Thompson. From Taylor. (x, 1891).....               | 531      |
| Apparatus for Mixing and Regulating. (P) Hillischer. (viii, 1889).....                          | 767      |
| App. for Notifying Presence of. (P) Hardy. (xiii, 1894).....                                    | 1031     |
| Apparatus for Photometric Examination of. (P) Foster. (x, 1891).....                            | 244      |
| Apparatus for Production of. (P) Royon. (xi, 1892).....                                         | 812      |

| App. for Rapid Determin. of Combustible. (Pond.) (xiii, 1894)                                         | 544  |
| Apparatus for Recovering Ammonia from Various. (P) Wirth. From Philipp. (ii, 1883)                    | 477  |
| Apparatus for Regulating Flow of Compressed. (P) Clerkson and Spruce. (ix, 1890, 734; (xiv, 1895)     | 1036 |
| Apparatus for Removing and Purifying Noxious. (P) Smith. (ix, 1890)                                   | 882  |
| Apparatus for Rendering, Inocuous. (P) Wainwright. (xi, 1892)                                         | 22   |
| App. for Sampling Chimney. (Schmidt.) (ix, 1890)                                                      | 765  |
| App. for Saturating Liquids with. (P) Beins. (xiv, 1895)                                              | 469  |
| App. for Saturating with Vapours. (P) Banks. (xi, 1892)                                               | 508  |
| App. for Separating Dust, &c., from. (P) Simon. (ix, 1885)                                            | 623  |
| Apparatus for Separating Liquids or Solids from. (P) Jones. (x, 1891)                                 | 240  |
| Apparatus for Separation of Ammonia from Furnaces. (P) Chapman. (ii, 1884)                            | 415  |
| Apparatus for Treating by Liquids. (P) Edwards. From Lunce and Rohmann. (ix, 1890)                    | 516  |
| App. for Treating Fabrics, &c., with. (P) Remy. (x, 1891)                                             | 135  |
| Apparatus for Treating Granular Materials by. (P) Hasenclever. (viii, 1889)                           | 194  |
| App. for Treating Liquids with. (Hurter.) (xii, 1893)                                                 | 227  |
| App. for Treating Solids by:                                                                          |      |
| (P) Mond. (vii, 1888)                                                                                 | 823  |
| (P) Wise. From Solvay and Co. (ix, 1890)                                                              | 726  |
| Apparatus for Treating Solids, Semi-Solids, and Liquids with. (P) Melville. (xii, 1893)               | 1013 |
| Apparatus for Treating Substances with. (P) Burdakin. (xii, 1893)                                     | 812  |
| App. for Treating Textiles with. (P) Mather. (viii, 1889)                                             | 460  |
| Apparatus for Treatment of Noxious:                                                                   |      |
| (P) Lacey. (xii, 1893)                                                                                | 371  |
| (P) Makinson. (xi, 1892)                                                                              | 704  |
| Apparatus to Inject, into Liquids. (P) Brin's Oxygen Co. and Goble. (viii, 1889)                      | 759  |
| Arising from the Diffusion Battery, Combustible. (Dewald.) (xiii, 1894)                               | 749  |
| Blast Furnace, Obtaining Ammonia from. (P) Main and Galbraith. (iv, 1885)                             | 111  |
| Blast-Furnace, Utilisation of. (Arth.) (xiv, 1895)                                                    | 368  |
| Burning Inflammable Explosive. (P) Tyler and De Vesciau. (xiv, 1895)                                  | 793  |
| Capacity of Caoutchouc for Absorbing. (Hufner.) (viii, 1889)                                          | 55   |
| Carbon Dioxide in Mixtures of, Estimation of. (Blochmann.) (iii, 1884)                                | 456  |
| Carburisation of. (P) Bremie. (xiv, 1895)                                                             | 142  |
| Carriage of Compressed. (T.R.) (xiv, 1895)                                                            | 779  |
| Cause of Luminescence in Flames of Hydrocarbon. (Lewes.) (xiv, 1895)                                  | 738  |
| Chamber, Determin. of Nitric Oxide in. (Lunge.) (i, 1882)                                             | 11   |
| Changes of, by Dark Electrical Discharges. (P) Van der Steen and Schneller. (xiv, 1895)               | 493  |
| Charging Liquids with. (P) Schneible. (xiv, 1895)                                                     | 765  |
| Chemical Equilibrium of Solution of. (Van Berchem.) (ix, 1890)                                        | 549  |
| Coke-Oven, Apparatus for Obtaining Products of Distillation from. (P) Stroehmer and Scholz. (i, 1882) | 161  |
| Coke-Oven, Examination of Crude Benzene from. (Lunge and von Keller.) (xiv, 1895)                     | 143  |
| Coke-Oven, Recovery of Ammonia in. (Winkler.) (iii, 1884)                                             | 512  |
| Combustible, and Smoke, Analysis of. (Lunge.) (i, 1882)                                               | 13   |
| Combustible, Method and Apparatus for Producing. (P) Thwaite. (ix, 1890)                              | 168  |
| Combustible, Obtaining Ammonia Salts from. (P) Addie. From Addie. (iii, 1884)                         | 159  |
| Combustible, Obtaining, from Coal. (P) Mond. (iii, 1884)                                              | 236  |
| Combustible, Obtaining, from Fuel. (P) Mond. (xii, 1894)                                              | 968  |
| Combustible, Production and Purification of. (P) Sutherland. (iii, 1884)                              | 369  |
| Combustible, Production of. (P) Thwaite. (vii, 1888)                                                  | 116  |
| Combustion in Dried. (Baker.) (ix, 1885)                                                              | 268  |
| Combustion of, in Furnaces. (P) Harreaves. (xi, 1892)                                                 | 806  |
| Composition of Furnace. (Jurisch.) (xii, 1893)                                                        | 813  |
| Composition of Limiting Explosive Mixtures of, with Air. (Clowes.) (xiv, 1895)                        | 1024 |
| Condensation of, and Extraction of Zinc in Blast Furnace. (Hempel.) (xiv, 1895)                       | 277  |
| Condensers and Towers for. (P) Herman. (vii, 1888)                                                    | 845  |
| Condensing, and App. therefor. (P) Gamgee. (x, 1891)                                                  | 823  |
| Containing Ammonia, Treatment of. (P) Bolton and Wanklyn. (ii, 1883)                                  | 167  |
| Containing Sulphuretted Hydrogen, Treatment of. (P) Heaton. (x, 1891)                                 | 1006 |
| Cyanogen Compounds from, Recovery of. (P) Knublauch. (vii, 1888)                                      | 116  |
| Cyanogen from, Obtaining:                                                                             |      |
| (P) Dreischmidt. (xiv, 1895)                                                                          | 742  |
| (P) Leich. From Elser and Gasch. (x, 1891)                                                            | 926  |
| Cylinders for Containing, under Pressure. (P) Hesketh and Marett. (xiv, 1895)                         | 642  |
| Degree of Exhaustion of. (Jurisch.) (ix, 1890)                                                        | 506  |
| Dehydration of. (P) Mather. (xii, 1893)                                                               | 762  |
| Density of, Determin. of. (P) Flores and Shlans. (xiii, 1894)                                         | 378  |
| Density of, Means for Measuring. (P) Haddan. From Durr and Custodio. (xii, 1893)                      | 710  |
| Disposition of Matter in. (P) Lorrain. (vi, 1887)                                                     | 378  |
| Destructive Furnace, Method of. (P) Utley. (xii, 1893)                                                | 57   |
| Destructive Noxious, from Chemical Manufactures. (P) Bertram. (viii, 1889)                            | 814  |

## Gases—cont.

|                                                                                                                                                       |          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Desulphurisation of. (P) Hood and Salamon. (vii, 1888)                                                                                                | 617      |
| Desulphurising. (P) Lux. (i, 1882)                                                                                                                    | 335      |
| Development of Voltaic Electricity by Oxidation of. (Mond.) (ix, 1890)                                                                                | 42       |
| Diffusibility of, through Caoutchouc Membranes. (Reyher.) (xii, 1894)                                                                                 | 181      |
| Draught for Poisonous. (Hempel.) (iv, 1885)                                                                                                           | 612      |
| Drying of. (Vander Plaats.) (ix, 1890)                                                                                                                | 415      |
| Electrically Treating. (P) Hald. (xii, 1894)                                                                                                          | 528      |
| Enclosed in Coal and Coal-dust. (McConnell.) (xii, 1894)                                                                                              | 25       |
| Enriching, with Liquid Hydrocarbons. (P) Dvorkovitz. (xiv, 1895)                                                                                      | 796      |
| Erosive Power of Compressed. (Dauvergne.) (ix, 1890)                                                                                                  | 632      |
| Evolved from Steel Castings. (iii, 1884)                                                                                                              | 446      |
| Expanding. (P) Ball. (x, 1886)                                                                                                                        | 316      |
| Exploded by Incandescent Lamps. (vii, 1888)                                                                                                           | 557      |
| Explosion Temperatures of Mixtures of, Determination of. (Meyer and Münch.) (xi, 1893)                                                                | 1017     |
| Filling Cylinders with. (P) Parkinson. (x, 1891)                                                                                                      | 308      |
| Filtering Media for. (P) Candy. (x, 1886)                                                                                                             | 675      |
| Fixed, Means of Generating. (P) Lindsay. (x, 1886)                                                                                                    | 424      |
| For Metallurgical Purposes, Apparatus for Producing. (P) Shedlock and Meldrum. (ix, 1890)                                                             | 811      |
| From Bituminous Fuel, Producing. (P) Ross. (x, 1891)                                                                                                  | 824      |
| From Blast Furnaces, Examination of Tars Recovered in Condensation of. (Smith.) (ii, 1883)                                                            | 495, 500 |
| From Blast Furnaces, Process and Apparatus for Treating. (P) The Coltness Iron Co., Ltd., and Young. (ix, 1890)                                       | 1120     |
| From Blast Furnaces, Utilisation of Waste. (Schneider and Maces, Zurmahn, Belani, Alexander, Korting Bros., Young and Beilby, Ehrenwerth.) (iv, 1885) | 217      |
| From Blast Furnaces, Zinc and Lead in. (Vits.) (ix, 1890)                                                                                             | 512      |
| From Carbonisation of Coal, Utilising. (P) Dunlop. (xiv, 1895)                                                                                        | 261      |
| From Chance-Claus Sulphur Process, Treatment of Waste. (Kynaston.) (xii, 1893)                                                                        | 319      |
| From Coal, Obtaining. (P) Kenyon. (iii, 1884)                                                                                                         | 435      |
| From Coke Ovens, Treatment of. (P) Simon. From Carves. (iv, 1885)                                                                                     | 358      |
| From Coke Ovens, Utilisation of. (P) Nicholson. (iii, 1884)                                                                                           | 369      |
| From Combustion of Iron Pyrites, Composition of. (Scheurer-Kestner.) (iv, 1885)                                                                       | 457      |
| From Dynamite, Poisonous. (Charon.) (xi, 1892)                                                                                                        | 840      |
| From Furnaces in Harz Forests, Injurious Effects of. (Rouss.) (i, 1882)                                                                               | 29       |
| From Furnaces, Treating. (P) Day. (xi, 1892)                                                                                                          | 21       |
| From Hydrocarbon Oil and Water. (P) Darby. (ix, 1890)                                                                                                 | 275      |
| From Liquid Hydrocarbons, Manufacture of, and Apparatus therefor. (P) Burns. (vi, 1887)                                                               | 520      |
| From Mince Apparatus for Testing. (P) Shaw. (vi, 1887)                                                                                                | 751      |
| From Salted Furnaces, Analyses of. (Hunt.) (iii, 1884)                                                                                                | 91       |
| From the Distillation of Petroleum, &c., Utilising Hydrocarbon. (P) Beilby and McArthur. (vi, 1887)                                                   | 212      |
| Fuel Value of. (Payne.) (xii, 1893)                                                                                                                   | 1016     |
| Furnace, Obtaining Ammonia from. (P) Addie. (ii, 1883)                                                                                                | 264      |
| Furnace, Recovery of Sulphurous Acid from. (Hanisch and Schroeder.) (iii, 1884)                                                                       | 570      |
| Furnace, Separation of Ammoniacal Products and Tar from. (P) Mond. (x, 1886)                                                                          | 235      |
| Furnace, Sulphur from. (P) Hanisch and Schroeder. (iv, 1883)                                                                                          | 487      |
| Furnaces for Generation of Heating. (P) Blum. (xii, 1893)                                                                                             | 584      |
| Glass Vessels for Storing, Manufacture of. (P) Rylands. (x, 1891)                                                                                     | 927      |
| Graduation of Tubes for Measuring. (Berthelot.) (vii, 1888)                                                                                           | 645      |
| Heat Abstracted by Expansion of. (Lightfoot.) (v, 1886)                                                                                               | 139      |
| Heating of, by Electricity. (P) Donaldson. (xiii, 1894)                                                                                               | 529      |
| Hydrocarbon, Manufacture of. (P) Lake. From Fogarty. (iii, 1884)                                                                                      | 474      |
| Hydrocarbons from, Obtaining. (P) Friedlander and Quaschnig. (vi, 1887)                                                                               | 505      |
| Ignition Temperatures of Mixtures of. (Meyer and Freyer.) (xii, 1893)                                                                                 | 437      |
| Illuminating and Heating, Manufacture of:                                                                                                             |          |
| (P) Dismore. (xi, 1892)                                                                                                                               | 149      |
| (P) Fourness. (xi, 1892)                                                                                                                              | 149      |
| Inert, Obtaining of. (P) Mond and Fischelman. (viii, 1889)                                                                                            | 656      |
| In Lead Chamber, Distribution and Condensation of. (Mactear.) (iii, 1884)                                                                             | 224      |
| In Steel. (Müller.) (ix, 1885)                                                                                                                        | 676      |
| In Water, Krusler's Nitric Acid Apparatus for Extraction of Dissolved. (Robson.) (xi, 1892)                                                           | 504      |
| Influence of, on Porcelain Colours. (Danoar.) (xiv, 1895)                                                                                             | 484      |
| Injurious Action of. (Pettenkofer and Lehmann.) (vii, 1888)                                                                                           | 225      |
| Injury Done to Vegetation by Noxious. (Hamburger.) (iii, 1884)                                                                                        | 202, 342 |
| Kilns for Treating Waste. (P) Johnstone. (x, 1891)                                                                                                    | 771      |
| Legislation of Noxious. (Muspratt.) (First Proceedings)                                                                                               | 7        |
| Legislation Restraining Emission of Noxious. (Fletcher.) (xi, 1892)                                                                                   | 129, 306 |
| Light, Heat, and Power from certain, Production of. (P) Tatham. (ix, 1890)                                                                            | 171      |
| Lighting by Calciferous, and Apparatus therefor. (P) Macaulay-Cruikshank. From Reissig and others. (x, 1891)                                          | 453      |
| Liquefied. (T.R.) (vii, 1888)                                                                                                                         | 650      |

| PAGE                                                                                                                  | PAGE                                                                                                   |

| <b>Gases—cont.</b>                                                                                                    | <b>Gaseous—cont.</b>                                                                                   |
| Liquid Anhydrous Sulphurous Acid from Furnace and other. (P. Haensch and Schroeder. (ix. 1883).....                   | Mixtures, Temp. of Explosion of. Meyer. (xii. 1893).....                                               |
| Means for Operating Cocks and Valves of Cylinders containing. (P. Manchester Oxygen Co. and Jackson. (xii. 1893)..... | Pressures, Closure for Regulation of. P. Mills and Ellis. (xi. 1892).....                              |
| Method and App. for Producing. (P. Thwaite. (x. 1891).....                                                            | Products of Combustion. (P. Coan. Scheurer-Kestner.) (ix. 1885).....                                   |
| Methods of Treating Liquids with, compared. (Harter. (iv. 1885).....                                                  | Products of Combustion, Utilisation of. P. Biederman and Harvey. (iv. 1885).....                       |
| Mixing and Stratification of. (Leybold. (xii. 1893).....                                                              | Gas-lighting Apparatus, Regenerative. P. Bower and Thorp. (iii. 1884).....                             |
| Motion of, in Ducts and Towers. (Jurisch. (xii. 1894).....                                                            | Gasogenes, Compound for Use in. P. Gimschaw. (x. 1891).....                                            |
| Noxious, Preventing Escape of. (P. Kern. (xi. 1892).....                                                              | Gasometer, Spherical. Ehrenberg. (iv. 1887).....                                                       |
| Noxious, Use of Chamber Crystals for Decomposing. (P. Girard and Pabst. (i. 1882).....                                | Gassing Apparatus for Silica. P. Ideson. (x. 1892).....                                                |
| Obnoxious, Means for Destroying. (P. Baker. (xii. 1894).....                                                          | Gastrolabium. Jackson. (xiii. 1894).....                                                               |
| Occluded by Coke. (Somer and Lewis. (ii. 1883).....                                                                   | Gasworks Apparatus, Dimensions of. Reusser. (xiv. 1895).....                                           |
| Occluded in Coal. (Bedson. (vii. 1888).....                                                                           | Dry-valve Comminutor for. P. Wack. (ii. 1883).....                                                     |
| Of Blast Furnaces, Utilisation of. (P. Alexander and McCosh. (ii. 1882).....                                          | Evam. of Ammoniacal Liquor of. Dyson. (ii. 1883).....                                                  |
| Oil- and Water. Manufacture of. (P. Thwaite. (x. 1891).....                                                           | Experimental Data, Paris. (Deville. (xviii. 1889).....                                                 |
| Or Air, Apparatus for Treating Substances with. (P. Beck. From Downton. (viii. 1889).....                             | Hydraulic Mains for. P. Abel. From Anvoine. (v. 1886).....                                             |
| Oxidation and Chemical Properties of. (Phillips. (xiii. 1894).....                                                    | Treating Scent Lime from. P. Lask. (i. 1884).....                                                      |
| Passage of, from Pyrites Burners to Lead Chambers. (Scheurer-Kestner. (iv. 1885).....                                 | Utilisation of Residual Products of. Lewis. (v. 1886).....                                             |
| Phenomena of Oxidation and Chemical Properties of. (Phillips. (xiii. 1894).....                                       | Utilisation of Waste Lime from. P. Ramsome. (i. 1892).....                                             |
| Porous Surfaces for Absorption of. (P. Glew. (viii. 1889).....                                                        | Gauge for Liquids. P. Horley and Sedgley. (x. 1890).....                                               |
| Preparation of, for Analyses, and Apparatus therefor. (Ehrenberg. (vii. 1887).....                                    | Standard We. (xii. 1894).....                                                                          |
| Preventing, from Intermingling while passing through Liquids. (P. Hillard. (viii. 1894).....                          | With Self-Acting Closing Arrangement, Water. P. Sampnelli. (i. 1883).....                              |
| Producers, &c., for Manuf. of. (P. Dighton. (viii. 1889).....                                                         | Gauge-Glasses for Automatic Closing of Stop-Cocks, Arrangements in. P. Hoppner. (i. 1892).....         |
| Pumps for Compressing. (P. Labinal. (xv. 1895).....                                                                   | Of Boilers, Luminous Float for. P. Schlar and Bevend. (i. 1892).....                                   |
| Pumps for Condensable. (P) Palpert. From Doran. (iv. 1885).....                                                       | Gauges for Liquids. P. Hicks. (v. 1886).....                                                           |
| Pumps for Pumping and Compressing. (P) Murray. (viii. 1894).....                                                      | Guthrie's Investigations on Ferru-silicon and Iron. (Wedding. (vi. 1887).....                          |
| Purification of: (P) Andrews. (ix. 1890).....                                                                         | Gautier's Investigations on Ferru-silicon and Iron. (Wedding. (vi. 1887).....                          |
| (P) Solway. (viii. 1889).....                                                                                         | Gauge, Prop. of Carbolic and Iodoform. Duval. (v. 1888).....                                           |
| Purification of, and Apparatus. P. Gontard. (v. 1889).....                                                            | Preparing and Rendering Antiseptic. P. Richierne and Heuston. (x. 1891).....                           |
| Qualitative Reactions of. (Phillips. (xiii. 1894).....                                                                | Gay-Lussac Tower, Loss of Nitrogen by. (Lange and Noel. (iii. 1884).....                               |

|---------------------------------------------------------------------------------------------------------------------------------|------|
| Devitrification of. (x, 1891) .....                                                                                             | 464  |
| (Appert and Henrivaux.) (ix, 1890) .....                                                                                        | 293  |
| Diminution of Co-efficient of Expansion of. (Baudin.) (xii, 1893) .....                                                         | 786  |
| Effects of Atmosphere and Water on. (Foerster.) (xiii, 1894) .....                                                              | 518  |
| Electrical Conductibility of. (Foussereaux.) (i, 1882) .....                                                                    | 365  |
| Electrical Cutting of, during Manufacture. (i, 1882) .....                                                                      | 365  |
| Electro-deposition of Metal on. (P) Ford. From Pottier. (xi, 1892) .....                                                        | 1007 |
| Engelmann's Process for Decorating. (Appert.) (xii, 1894) .....                                                                 | 1137 |
| Etching on, by Photomechanical Processes. (Muller-Jacobs.) (ix, 1890) .....                                                     | 965  |
| Etching or Ornamenting. (P) Shaw. (vi, 1888) .....                                                                              | 847  |
| Etching upon: (P) Meth and Kreitner. (ix, 1890) .....                                                                           | 1037 |
| (Reintzer.) (v, 1886) .....                                                                                                     | 669  |
| (P) Retzlaff. (xiii, 1894) .....                                                                                                | 154  |
| Expansion of: (Chatenet.) (xiv, 1895) .....                                                                                     | 970  |
| (Schott.) (xi, 1892) .....                                                                                                      | 817  |
| Flattening. (P) Stevenson and Wilson. (i, 1882) .....                                                                           | 456  |
| For Chemical App., Composition of. (Weber.) (xi, 1892) .....                                                                    | 267  |
| For Optical and Scientific Purposes. (Schott.) (vii, 1888) .....                                                                | 846  |
| Furnace for Annealing Plate. (P) Gilles. (xiii, 1889) .....                                                                     | 333  |
| Furnaces: (P) Houchin. (i, 1882) .....                                                                                          | 158  |
| (P) Lurmann. (i, 1882) .....                                                                                                    | 503  |
| (P) Sievert. (xii, 1893) .....                                                                                                  | 834  |
| (P) Symott. (v, 1886) .....                                                                                                     | 100  |
| Furnace for Melting: (P) Bateson. (xiv, 1895) .....                                                                             | 1036 |
| (P) Frank. (ix, 1883) .....                                                                                                     | 43   |
| Furnaces for Production of. (P) Rylands. (xi, 1892) .....                                                                       | 1007 |
| Furnaces for Treating. (P) Thompson. (i, 1882) .....                                                                            | 410  |
| Gas Kilns for Burning. (P) Wilkinson. (iv, 1885) .....                                                                          | 535  |
| Gilding. (P) Pratt. (v, 1886) .....                                                                                             | 536  |
| Globes, Frosting or Obscuring. (P) Akoster. (xi, 1891) .....                                                                    | 368  |
| Goods and Salicylic Acid in Japan. (T.R.) (vii, 1888) .....                                                                     | 48   |
| Hardening. (Lubisch.) (i, 1882) .....                                                                                           | 503  |
| Hermetically Joining. (P) Doulton and Slater. (xiii, 1894) .....                                                                | 637  |
| Increased Importation of, into America. (ii, 1883) .....                                                                        | 320  |
| Industries of Germany. (T.R.) (xiv, 1895) .....                                                                                 | 1079 |
| Industry, Employment of Calcium Plumbate in. (Kassner.) (xiv, 1895) .....                                                       | 573  |
| Industry of Bohemia Plate. (xi, 1892) .....                                                                                     | 604  |
| Industry of Germany. (T.R.) (vi, 1887) .....                                                                                    | 308  |
| (xiv, 1895) .....                                                                                                               | 207  |
| Influence of Composition of, on Preservation of Microscopic Objects. (Weber.) (xii, 1893) .....                                 | 45   |
| Influence of Composition of, on Thermometers: (Weber.) (vii, 1888) .....                                                        | 438  |
| (Wiebe.) (v, 1886) .....                                                                                                        | 167  |
| Influence of Magnesia Mixture on. (De Koninck.) (xiv, 1895) .....                                                               | 691  |
| Interceptor for Distilling Purposes. (Muller.) (xii, 1893) .....                                                                | 624  |
| Kiln for Burning, &c. (P) Payne. (x, 1891) .....                                                                                | 1007 |
| Kilns for Annealing Plate. (P) Pilkington. (xi, 1892) .....                                                                     | 606  |
| Kilns for Firing. (P) Parfitt. (x, 1891) .....                                                                                  | 465  |
| Leans for Annealing. (P) Chance. (x, 1891) .....                                                                                | 548  |
| Leans or Annealing Furnaces for. (P) Bonta. (xi, 1892) .....                                                                    | 818  |
| Lined, Manufacture of Enamel. (P) Bohm. (xiii, 1894) .....                                                                      | 1198 |
| Lined Fittings for Glass-lined Tubing. (P) Rylands, Crowder and Morant. (ix, 1890) .....                                        | 725  |
| Lining Pipes with. (P) Herbert. (xiii, 1894) .....                                                                              | 154  |
| Lining Vessels or Tubes with. (P) Rylands and Hesselberg. (xi, 1892) .....                                                      | 818  |
| Machinery for Rolling Plate. (P) Walsh. (xi, 1892) .....                                                                        | 688  |
| Machinery for Working. (P) Pearce and Besson. (vi, 1887) .....                                                                  | 663  |
| Machines for Pressing. (P) Fahlst. (ii, 1883) .....                                                                             | 247  |
| -Making Material, Production of. (P) Walker. (xi, 1892) .....                                                                   | 240  |
| Manufacture, Cryolite and its Substitutes in. (Zsigmondy.) (viii, 1889) .....                                                   | 194  |
| Manufacture in Japan. (T.R.) (v, 1892) .....                                                                                    | 554  |
| Manufacture of: (P) Beurel. (v, 1886) .....                                                                                     | 536  |
| (P) Lewes. (xii, 1893) .....                                                                                                    | 446  |
| (P) Picard. (vi, 1887) .....                                                                                                    | 547  |
| (P) Richardson. (viii, 1889) .....                                                                                              | 621  |
| (P) Sowerby. (x, 1891) .....                                                                                                    | 465  |
| (P) Story and Punshon. (viii, 1889) .....                                                                                       | 196  |
| (P) Thomas. (vii, 1888) .....                                                                                                   | 35   |

| Pipes and Gutters, Manufacture of. (P) Sievert. (xii, 1893) .....                      | 518  |
| Pipes and Tubes, Apparatus for Moulding. (P) Thompson. From Gupitll. (xii, 1893) ..... | 603  |
| Plate and other, Manufacture of. (P) West. (xii, 1893) .....                           | 46   |
| Plate, Manufacture of. (P) Simon. (viii, 1889) .....                                   | 543  |
| Plate, Producing Clear. (P) Schluder and Verstandig. (xiv, 1895) .....                 | 866  |
| Plates, Apparatus for Manufacture of. (P) Thompson. From Pease. (xi, 1892) .....       | 163  |
| Plates, Manufacture of. (P) Lefevre and Michau. (xiv, 1895) .....                      | 752  |
| Plates, Sheets, and Films, Manufacture of. (P) Thompson. From Pease. (xi, 1892) .....  | 240  |
| Plating Clay with. (P) Thompson. From Clay Glass Tile Co. (xi, 1892) .....             | 818  |
| Polishers, Lead Poisoning among. (xii, 1893) .....                                     | 285  |
| Porcelain, Tin, &c., Painting on. (P) Michaelson. (viii, 1889) .....                   | 403  |
| -Pot. (P) Kane. (i, 1882) .....                                                        | 455  |
| Pressed Enamel on, Preparing a. (P) Preussler. (ii, 1883) .....                        | 282  |
| Printing Type. (T.R.) (xii, 1893) .....                                                | 299  |
| Producing Surfaces on, to Resemble Marble, &c. (P) Budd. (v, 1886) .....               | 327  |
| Purification of Beet-Juice and Molasses by Soluble. (P) Schott. (iii, 1884) .....      | 114  |
| Red. (Guignet and Magné.) (ix, 1890) .....                                             | 736  |
| Red, for Church Windows, Manufacture of. (Guignet and Magné.) (viii, 1889) .....       | 886  |
| Red, Manufacture of. (P) Haddan. From Schaffgotsch. (viii, 1889) .....                 | 708  |
| Rollers, &c., Means for Casting. (P) Rylands and others. (xii, 1893) .....             | 263  |
| Rose or Orange-Red Stained. (P) Welz. (xi, 1892) .....                                 | 241  |
| Rose-Red, Manufacture of. (P) Kralik. (xii, 1893) .....                                | 1034 |
| Scale of Hardness for Heated. (Nichols.) (xiv, 1895) .....                             | 158  |
| Sealing of Wires in. (P) Lake. From Tibbits. (xiii, 1894) .....                        | 545  |
| Sheet, Manufacture of. (P) Sowerby. (ix, 1890) .....                                   | 1037 |
| Silicate for Making, Obtaining. (P) Walker. (ix, 1891) .....                           | 643  |
| Silvering of. (P) Syer. (viii, 1889) .....                                             | 196  |
| Soldering. (x, 1891) .....                                                             | 629  |
| Solubility of. (Bohlitz.) (iv, 1885) .....                                             | 349  |
| Solvent Action of Water on. (Mylius and Foerster.) (x, 1891) .....                     | 464  |
| Substitute for: (P) Broeze. From Hansel. (xii, 1893) .....                             | 706  |
| (P) Hartley and Bleunkinsop. (xii, 1893) .....                                         | 772  |
| Suitable for Chemical Apparatus, Composition of. (Weber and Sauer.) (xii, 1893) .....  | 45   |
| Surfaces, Behaviour of, to Water. (Mylius and Foerster.) (xi, 1892) .....              | 181  |
| Surfaces, Coating and Tinting. (P) Leigh. (x, 1891) .....                              | 363  |
| Tank Furnaces for Manufacture of: (P) Chance and Co. and Scott. (xiv, 1895) .....      | 484  |
| (P) King and Little. (i, 1882) .....                                                   | 110  |
| (P) Thomas. (xi, 1892) .....                                                           | 1007 |
| Tanks or Boxes, Manuf. of. (P) Armstrong. (xi, 1892) .....                             | 605  |
| Tarnishing of, during Manufacture. (Moritz.) (ix, 1890) .....                          | 393  |
| Technology of. (viii, 1889) .....                                                      | 780  |
| (Zsigmondy.) (xii, 1893) .....                                                         | 1032 |
| Test by Colour Reactions for. (Mylius.) (viii, 1889) .....                             | 306  |
| Theory of Devitrification of. (Groeger.) (i, 1882) .....                               | 189  |
| Tiles, or Pottery, Ornamenting. (P) Doulton and Rix. (vii, 1888) .....                 | 324  |

| (P) Wise. From The Acetated Fuel Co. (x, 1891).....                                                | 824  |
| Apparatus for Converting into Gas, &c. (P) Huray. From Archer. (v, 1886).....                      | 148  |
| Apparatus for Distilling Liquid:                                                                   |      |
| (P) Dvorkovitz. (xii, 1893).....                                                                   | 438  |
| (P) Dvorkovitz and others. (xi, 1892).....                                                         | 152  |
| (P) Yeadon and Adgie. (xii, 1893).....                                                             | 439  |
| Apparatus for Gasifying Non-Gaseous. (P) Siemens. (xiii, 1894).....                                | 139  |
| Apparatus for Generating Gas from:                                                                 |      |
| (P) Berland. (i, 1882).....                                                                        | 397  |
| (P) Boulé. (iv, 1885).....                                                                         | 268  |
| (P) Marsh. (vi, 1887).....                                                                         | 590  |
| Apparatus for Manufacturing Gas from Fluid:                                                        |      |
| (P) Dvorkovitz. (xii, 1893).....                                                                   | 1018 |
| (P) Howell and Smith. (ix, 1890).....                                                              | 850  |
| (P) Meeze. (xi, 1887).....                                                                         | 719  |
| Apparatus for Mixing, with Earth for Fuel. (P) Thompson. From Leede and Omay. (iv, 1885).....      | 48   |
| Apparatus for Purifying. (P) Walker. (i, 1882).....                                                | 398  |
| Apparatus for Filtering Liquid. (P) Doty. (x, 1891).....                                           | 353  |
| Apparatus for Vaporising. (P) The Gas Lighting Company and Crookford. (xiv, 1895).....             | 20   |
| Apparatus for Vaporising and Burning. (P) Bussey. (vi, 1887).....                                  | 503  |
| Apparatus for Vaporising Liquid. (P) Owen. (xiv, 1895).....                                        | 561  |
| Appliances for Burning. (P) Wilson and Mason. (ix, 1890).....                                      | 924  |
| Burner for Liquid. (P) Peacock. (xiv, 1895).....                                                   | 19   |
| Burners for Heavy. (P) Thompson. From Huff. (xiv, 1895).....                                       | 710  |
| Burners for High-Boiling. (P) Schwarz and Huppertsberg. (i, 1882).....                             | 393  |
| Burning, and Apparatus therefor. (P) Thompson. From Mason and Wilson. (x, 1891).....               | 628  |
| Collecting Volatile Products from. (P) Byron, Wigan, and Bennett. (iv, 1885).....                  | 200  |
| Combination of, with Picric Acid. (Tilden and Forster.) (xii, 1891).....                           | 172  |
| Combustible Gases from Liquid, Production of. (P) Thwaite. (vi, 1888).....                         | 116  |
| Combustion of Liquid, with Water, Gas, or Steam. (P) Selwyn. (iv, 1885).....                       | 48   |
| Constant for Analysis of. (Crismor.) (xiv, 1895).....                                              | 1069 |
| Decomposition of. (Armstrong and Muller.) (v, 1886).....                                           | 374  |
| Distillation and Breaking up of Liquid. (P) Clark. (xiii, 1894).....                               | 381  |
| Distillation of:                                                                                   |      |
| (P) McGowan. (i, 1882).....                                                                        | 352  |
| (P) Picticker. (x, 1891).....                                                                      | 631  |
| Distill. of Liquid, and App. therefor. (P) Burns. (vi, 1887).....                                  | 590  |
| Distilling and Refining. (P) Ryeroff and Mason. (ix, 1890).....                                    | 456  |
| Enriching Gases by Liquid. (P) Dvorkovitz. (xiv, 1895).....                                        | 796  |
| Enrichment of Coal-Gas by. (Davis.) (v, 1886).....                                                 | 2    |
| Extraction of, from Coal-Tar. (P) Clark. (xii, 1894).....                                          | 797  |
| For Substitutes for Wax, Bleaching. (P) Huray. From Chemin. (iii, 1884).....                       | 163  |
| Formation of Higher Aromatic. (Boyen.) (viii, 1889).....                                           | 974  |
| Formed in Manufacture of Compressed Gas, Pyrogenic. (Brochet.) (xi, 1892).....                     | 596  |
| From American Petroleum. (Lemoine.) (ii, 1884).....                                                | 234  |
| From Coal-Gas, Volatile. (P) Drew. (iii, 1884).....                                                | 438  |
| From Tars and Oils from Blast Furnaces and Gas Producers, Production of. (P) Bell. (iv, 1885)..... | 531  |
| Furnaces for Burning. (P) Findlay. (ii, 1883).....                                                 | 264  |
| Furnaces for Burning Liquid. (P) Mundell and Gordon. (ii, 1883).....                               | 263  |
| Gaseous at Ordinary Temperatures, Absorption of. (Hasschilling.) (i, 1882).....                    | 398  |
| Gasification of Liquid. (Dvorkovitch.) (xii, 1893).....                                            | 403  |
| Generating Gas from Liquid, Method and Apparatus for. (P) Avery. (vi, 1887).....                   | 719  |
| Generating Gases from, and Apparatus therefor. (P) Thwaite. (x, 1891).....                         | 533  |
| Illuminating Power of. (Frankland.) (iv, 1885).....                                                | 267  |
| In American Petroleum. (Lemoine.) (iii, 1884).....                                                 | 514  |
| In Fats, Detection of. (Nitsche.) (iii, 1884).....                                                 | 322  |
| Incandescence Lamps for Liquid. (P) Marcus. (xiv, 1895).....                                       | 562  |
| Manufacture of Gas from Fluid:                                                                     |      |
| (P) Lewes. (xii, 1893).....                                                                        | 511  |
| (P) Meeze. (xii, 1888).....                                                                        | 115  |
| (P) Pinkney. (xiv, 1895).....                                                                      | 645  |
| Manufacture of Liquid. (P) Balfour and Lane. (v, 1886).....                                        | 522  |
| Manufacture of Oleaceous Material from. (P) Dahmen. (viii, 1889).....                              | 391  |
| Manuf. or Treatment of Mineral. (P) Banner. (vi, 1887).....                                        | 134  |
| Melting Points of Mixtures of. (Vignon.) (xi, 1892).....                                           | 235  |
| Method and Apparatus for Burning. (P) Hill and Brett. (xii, 1894).....                             | 139  |
| Method and Apparatus for Manufacture of. (P) Cattanaeh. (v, 1886).....                             | 40   |
| Methylation of. (Jacobsen.) (i, 1882).....                                                         | 101  |
| Mixing with Steam and Air. (P) Avery. (iii, 1884).....                                             | 473  |
| Motor Driven by Air and Liquid. (P) Etve and Lallement. (ii, 1883).....                            | 162  |
| Obtained by Compression of Petroleum Gas. (Williams.) (iii, 1881).....                             | 437  |

| Obtaining. (P) Davis. (iii, 1884).....                                                                       | 369  |
| Obtaining from Gases. (P) Friedlander and Quaglio. (vi, 1887).....                                           | 505  |
| Obtaining from Oils and Tars from Coke Ovens. (P) Bell. (iv, 1885).....                                      | 337  |
| Obtaining Gas from. (P) Schnell, Read, Warwick, and Derbyshire. (v, 1885).....                               | 450  |
| Occurrence of Solid, in Plants. (Abbott and Trimble.) (vii, 1888).....                                       | 757  |
| Of Essence of Valerian. (Oliviero.) (xii, 1894).....                                                         | 758  |
| Perhydrides of the Higher Aromatic. (Liebemann and Spiegel.) (viii, 1885).....                               | 451  |
| Preparation of, from Oils. (Redl.) (vi, 1887).....                                                           | 503  |
| Preventing Spontaneous Ignition of Liquid. (P) Richter. (xii, 1894).....                                     | 1192 |
| Producing Smokeless Flame from Liquid. (P) Lee and Lancaster. (xii, 1893).....                               | 1020 |
| Production of Light. (Kiebeck.) (vi, 1887).....                                                              | 282  |
| Production of Oil-Gas from Terpene Series of. (xiii, 1894).....                                              | 501  |
| Purification of Alcohol by. (Squire.) (viii, 1889).....                                                      | 441  |
| Recovery of, from Gas. (Davis.) (ii, 1883).....                                                              | 515  |
| Recovery of, from Sulphonic Acids. (Kelle.) (v, 1886).....                                                   | 317  |
| Refining. (Redl.) (vi, 1887).....                                                                            | 504  |
| Rendering Liquid, Non-Explosive. (P) Kirsch. (x, 1891).....                                                  | 926  |
| Reverse Action of Friedel and Crafts' Method of Preparing. (Jacobsen.) (iv, 1885).....                       | 270  |
| Saponifying. (P) Sahlstrom and Parr. (xiii, 1894).....                                                       | 139  |
| Separating Coal-Tar, from those of Petroleum. (Henriques.) (xiv, 1895).....                                  | 601  |
| Solid, in Petroleum. (Morton.) (i, 1882).....                                                                | 124  |
| Solid, in the Vegetable Kingdom. (Gutzeit.) (viii, 1889).....                                                | 142  |
| Storing Highly Volatile. (P) Thwaite. (xi, 1892).....                                                        | 512  |
| Treating. (P) Field. (v, 1885).....                                                                          | 449  |
| Treatment of Liquid. (P) Stringfellow. (x, 1891).....                                                        | 534  |
| Treatment of, to obtain various Products. (P) Wise and Schmeller. (xii, 1894).....                           | 160  |
| Treatment or Solidification of Liquid. (P) Ridsdale. (xii, 1893).....                                        | 363  |
| Use of, for Reducing Pyrites. (P) Thwaite and Pedder. (v, 1886).....                                         | 379  |
| Utilising Liquid. (Hill and Brett.) (xii, 1893).....                                                         | 588  |
| Volatile, from Coal and Shale Gas. (P) Drew. (iii, 1884).....                                                | 475  |
| Hydrocellulose and its Derivatives. (Girard.) (i, 1882).....                                                 | 316  |
| Treatment of. (Girard.) (i, 1882).....                                                                       | 159  |
| See also under Cellulose.                                                                                    |      |
| Hydrochloric Acid, Action of Dilute, on Starch. (Allihn.) (iii, 1884).....                                   | 323  |
| Acid, Action of Gaseous, on Burnt Pyrites. (Blattner and Kestner.) (xii, 1893).....                          | 925  |
| Acid, Action of Gaseous, on Platinum Metals. (Dudley.) (xiii, 1894).....                                     | 255  |
| Acid, Action of Isovaleraldehyde on Fuming. (Spady.) (v, 1886).....                                          | 162  |
| Acid, Action of, on Antimony. (Ditte and Metzner.) (xii, 1893).....                                          | 358  |
| Acid, Action of, on Antimony Sulphide. (Lang.) (v, 1886).....                                                | 30   |
| Acid, Action of, on Bismuth. (Ditte and Metzner.) (xii, 1893).....                                           | 358  |
| Acid, Action of, on Caffeine. (Schmidt.) (ii, 1883).....                                                     | 361  |
| Acid, Action of, on Product Calcination of Manganese Residues. (Reychler.) (xi, 1892).....                   | 34   |
| Acid, Action of, on Nitrosodimethylaniline. (Mohlau.) (v, 1886).....                                         | 597  |
| Acid, Action of, on Silver Mercurous Chloride. (Jones.) (xii, 1893).....                                     | 986  |
| Acid, Action of, on Solubility of Cuprous and Lead Chlorides. (Engel.) (vii, 1889).....                      | 883  |
| Acid, Action of, on Sucrose. (Weber and McPherson.) (xiv, 1895).....                                         | 498  |
| Acid, Action of, on Xanthine. (Schmidt.) (ii, 1883).....                                                     | 360  |
| Acid and Ammonia from Ammonium Chloride, Obtaining. (P) Mond. (vi, 1887).....                                | 140  |
| Acid and Chlorine, Estimation of, in Mixture. (Younger.) (viii, 1889).....                                   | 88   |
| Acid and Chlorine, Manufacture of. (P) Clark. From Daguin. (vii, 1889).....                                  | 194  |
| Acid and Chlorine, Manufacture of, from Magnesium Chloride. (Eschellmann.) (viii, 1889).....                 | 190  |
| Acid and Nitric Acid, Manufacture of Chlorine from. (P) Johnson. From the Verein Chem. Fab. (xiv, 1895)..... | 483  |
| Acid and Oxalic Acid, Relative Affinities of, for Ferric Oxide. (Lemoine.) (xii, 1893).....                  | 760  |
| Acid and Quinine, Compounds of. (Hesse.) (xi, 1892).....                                                     | 176  |
| Acid and Sulphuric Acid for Decomposition of Chlorides, &c. (P) Pedder. (xi, 1892).....                      | 815  |
| Acid, Apparatus for Producing Gaseous. (P) Wise. From Solvay and Co. (ix, 1890).....                         | 941  |
| Acid, Apparatus for Treating. (P) Hargreaves and Robinson. (ii, 1883).....                                   | 477  |
| Acid, Condensation of Butaldehyde with. (Kahn.) (v, 1886).....                                               | 161  |
| Acid, Condensation of, by Lunge-Rohmann Tower. (Lasche.) (xiv, 1895).....                                    | 804  |
| Acid, Conference of Manufacturers of. (T.R.) (viii, 1889).....                                               | 934  |
| Acid, Decomposition of Sodium Thiosulphate by. (Vaubel.) (viii, 1889).....                                   | 705  |
| Acid, Detection of. (Villiers and Fayolle.) (xiii, 1894).....                                                | 1091 |
| Acid, Detection of Arsenic in. (Hager.) (v, 1886).....                                                       | 617  |
| Acid, Detection of, in Vinegar. (Hager.) (v, 1886).....                                                      | 500  |

| Acid Free from Arsenic, Preparation of. (Beckurts.) (iv, 1885) .....                                               | 281  |
| Acid Free from Arsenic, Prod. of. (Hager.) (v, 1886) .....                                                         | 534  |
| Acid, Freeing Chlorine from. (Hampe.) (x, 1891) .....                                                              | 185  |
| Acid from Ammonia Soda Liquors. (P) Mond. (iii, 1884) .....                                                        | 259  |
| Acid from Ammonium Chloride. (P) Mond. (iii, 1884) .....                                                           | 259  |
| Acid, From Ammonium Chloride, and Apparatus therefor, Obtaining. (P) Bale. (ix, 1890) .....                        | 801  |
| Acid from Calcium Chloride, Preparation of. (Lunze.) (i, 1882) .....                                               | 107  |
| Acid from Calcium Chloride, Production of. (P) Twynam. (v, 1886) .....                                             | 32   |
| Acid from Furnace Gases. (P) Precht. (i, 1882) .....                                                               | 154  |
| Acid from Magnesium Chloride: (P) Randohr, Blumenthal and Co. (i, 1882) .....                                      | 154  |
| (P) Weldon. (iv, 1885) .....                                                                                       | 457  |
| Acid from Residues, Production of. (P) Lyte and Tatters. (ix, 1890) .....                                          | 1129 |
| Acid, Furnace for Manufacture of. (P) Black and Larkin. (iv, 1885) .....                                           | 212  |
| Acid Gas, Apparatus for Manufacture of Mixture of Air and. (P) La Soc. Pechiney et Cie. (xi, 1892) .....           | 1000 |
| Acid Gas, Condensation of. (Hurter.) (viii, 1889) .....                                                            | 861  |
| Acid Gas, Discussion on Hurter's Paper on Condensation of. (ix, 1890) .....                                        | 118  |
| Acid Gas, Injurious Action of. (Pettenger and Lehmann.) (vii, 1888) .....                                          | 225  |
| Acid Gas, Manufacture of Chlorine from. (P) Soc. A. R. Pechiney et Cie. (xi, 1892) .....                           | 259  |
| Acid Gas, Production of Chlorine from. (P) Donald. (vi, 1887) .....                                                | 822  |
| Acid Gas, Purification of Woollen Fabrics by. (ii, 1883) .....                                                     | 275  |
| Acid, How Selenium gets into. (Divers.) (iv, 1885) .....                                                           | 33   |
| Acid, Hydrogen and Chlorine from. (P) Kellner. (xi, 1892) .....                                                    | 239  |
| Acid, Ignition of Hydrogen Sulphide with. (Grey.) (i, 1882) .....                                                  | 364  |
| Acid in Chimney Vapours. (Davis.) (i, 1882) .....                                                                  | 214  |
| Acid in Organic Acids, Estimation of Free. (Bedson.) (xii, 1893) .....                                             | 119  |
| Acid in Plants, Formation of Free. (Detmer.) (iv, 1885) .....                                                      | 407  |
| Acid, Influence of Ammonia Soda Process on Value of. (Weldon.) (ii, 1883) .....                                    | 434  |
| Acid Manufacture in Germany. (Hasenclever.) (iii, 1884) .....                                                      | 633  |
| Acid, Manufacture of: (P) Carey, Gaskell, and Hurter. (iv, 1885) .....                                             | 117  |
| (P) Gamble. (viii, 1889) .....                                                                                     | 776  |
| (P) Lake. From The Kayser Patent Co. (xi, 1892) .....                                                              | 36   |
| (P) Prentice. (xiii, 1894) .....                                                                                   | 250  |
| (P) Solvay. (iv, 1885) .....                                                                                       | 345  |
| (P) Weldon. (i, 1882), 68, 69; (iv, 1885), 457, 498 .....                                                          | 675  |
| Acid, Manufacture of, and Apparatus therefor. (P) Bale. (vii, 1888) .....                                          | 498  |
| Acid, Manufacture of Chlorine from. (P) Weldon. (iv, 1885) .....                                                   | 767  |
| Acid, Manufacture of, from Potassium Salts. (P) Wise. From The Chem. Fab. Buckan. (x, 1891) .....                  | 172  |
| Acid, Manufacture of Gaseous. (P) Abel. From Hasenclever. (iii, 1884) .....                                        | 805  |
| Acid, Obtaining. (P) Buckse. (xiv, 1895) .....                                                                     | 706  |
| Acid, Obtaining Chlorine from. (P) Campbell and Boyd. (viii, 1889) .....                                           | 968  |
| Acid, Obtaining Continuous Supply of. (P) Walker. (xiv, 1895) .....                                                | 482  |
| Acid, Obtaining, from Acid Sulphates. (P) Campbell and Walker. (xiv, 1895) .....                                   | 533  |
| Acid, Obtaining Gaseous, from Solution of HCl. (P) Wise. From Solvay. (iv, 1885) .....                             | 458  |
| Acid, Obtaining, in Manufacture of Soda. (P) M'Dougall. (iv, 1885) .....                                           | 947  |
| Acid, Obtaining of. (P) Peniakoff. (xiii, 1894) .....                                                              | 437  |
| Acid or Chlorine from Calcium Chloride. (P) Bramley. (vii, 1888) .....                                             | 193  |
| Acid or Chlorine, Production of. (P) Clark. From Daguin. (viii, 1889) .....                                        | 272  |
| Acid, Prod. of Chlorine from. (P) Lorenz. (xiv, 1895) .....                                                        | 510  |
| Acid, Production of Chlorine from Gaseous: (P) De Wilde and Reyckler. (ix, 1890) .....                             | 865  |
| (P) Krause. (xiv, 1895) .....                                                                                      | 643  |
| Acid, Production of, in Glass Manufacture. (P) Walker. (x, 1891) .....                                             | 28   |
| Acid, Prod. of, in United States. (Martyn.) (iv, 1885) .....                                                       | 161  |
| Acid, Production of Strong. (P) Lyte and Steinhart. (xi, 1892) .....                                               | 184  |
| Acid, Proportion of Water to, on Igniting Mixtures of H, O, and Cl. (Hautefeuille and Margottet.) (ix, 1890) ..... | 454  |
| Acid, Purifying, for Manufacture of Chlorine. (P) Wigg. (i, 1882) .....                                            |      |

|-------------------------------------------------------------------------------------------------------------------------------------------|------|
| Acid, Reagent for Free Chlorine in. (Le Roy.) (ix, 1890) .....                                                                            | 651  |
| Acid, Recovery of, from Ferrous Chloride. (P) d'Andria. (xii, 1893) .....                                                                 | 263  |
| Acid, Removing Arsenic from. (Beckurts.) (v, 1886) .....                                                                                  | 534  |
| Acid, Results of Lunge-Rohmann Plate-Towers for Condensing. (Lunge.) (xiii, 1894) .....                                                   | 1034 |
| Acid, Saccharification of Wood-Gum by. (Councler.) (xii, 1893) .....                                                                      | 455  |
| Acid, Selenium in. (Davis.) (ii, 1883) .....                                                                                              | 157  |
| Acid, Separation of Arsenic by Methyl Alcohol and. (Friedheim and Michaelis.) (xiv, 1895) .....                                           | 887  |
| Acid, Separation of Arsenic, &c. from. (P) Whitehead and Gelstharp. (xiv, 1895) .....                                                     | 865  |
| Acid, Separation of Arsenic from. (P) d'Andria. (viii, 1889) .....                                                                        | 15   |
| Acid, Solubility of Active Principles of Uchonas in Dilute. (Landrin.) (viii, 1889) .....                                                 | 610  |
| Acid, Solubility of Calcium Sulphate in Dilute. (Lunge.) (iv, 1885) .....                                                                 | 31   |
| Acid Solution, Ferrous Oxide in. (Kessler.) (i, 1882) .....                                                                               | 516  |
| Acid, Solution of Chrome Iron Ore by. (Jannasch and Voetherr.) (x, 1891) .....                                                            | 1037 |
| Acid, Tanks for. (P) Owens. (xii, 1893) .....                                                                                             | 1030 |
| Acid, Testing, for presence of Sulphuric Acid. (Lunge.) (i, 1882) .....                                                                   | 16   |
| Acid Towers, Distribution of Liquid in. (Lunge.) (ix, 1890) .....                                                                         | 66   |
| Acid, Transport of. (P) Enzland. (xiv, 1895) .....                                                                                        | 750  |
| Acid, Treating Residual Liquid from Pickling Iron or Steel with. (P) Saunders. (ix, 1890) .....                                           | 292  |
| Acid, Treating, to obtain Chlorine. (P) Hargreaves and others. (vi, 1887) .....                                                           | 367  |
| Acid, Treating Water with. (Macnab and Beckett.) (v, 1886) .....                                                                          | 267  |
| Acid Vapours, Injurious Effect of, on Vegetation. (Konig.) (iv, 1885) .....                                                               | 540  |
| Acid, Volatility of Nickel in. (Schutzenberger.) (xi, 1892) .....                                                                         | 243  |
| Acids of different Strengths, Specific Gravity of. (Lunze and Marchlewski.) (x, 1891) .....                                               | 541  |
| See also under Muriatic Acid.                                                                                                             |      |
| Hydrochloride, Hydrastinine. (Merek.) (xi, 1892) .....                                                                                    | 545  |
| Hydrochlorides of the Chlorides. (Enzland.) (viii, 1889) .....                                                                            | 883  |
| Hydro-cinnamic Acid ( $\beta$ -Phenyl Propionic Acid). (xiii, 1889) .....                                                                 | 565  |
| Hydrocotone, a Constituent of the Coto Bark. (Ciancian and Silber.) (x, 1891) .....                                                       | 383  |
| Hydrocyanic Acid, Action of, on Calomel. (Fouquet.) (ix, 1890) .....                                                                      | 101  |
| Acid, Analytical Notes on. (Siebold.) (iii, 1884) .....                                                                                   | 456  |
| Acid, Detection of: (Autenrieth.) (xiii, 1894) .....                                                                                      | 843  |
| (Portmann.) (v, 1886) .....                                                                                                               | 679  |
| Acid, Estimation of. (Gregor.) (xiii, 1894) .....                                                                                         | 176  |
| Acid, Production of. (P) de Lambilly. (xii, 1894) .....                                                                                   | 38   |
| Hydrocyanosulphuric Acid, Constitution of. (Fischer and Jennings.) (xiii, 1894) .....                                                     | 142  |
| Hydro-Extractor. (P) Tolson. (xiv, 1895) .....                                                                                            | 259  |
| -Extractor, Simple Laboratory. (Kahlbaum.) (xiv, 1895) .....                                                                              | 387  |
| -Extractors, Cages of. (P) Collins and Kaye. (xi, 1892) .....                                                                             | 895  |
| -Extractors for Extracting Sugar Juice. (P) Mewburn. (xi, 1892) .....                                                                     | 931  |
| -Extractors with Continuous Action. (P) Strohlach. (iii, 1884) .....                                                                      | 111  |
| See also under Centrifugal Machines.                                                                                                      |      |
| Hydrofluoric Acid, Action of, on Crystallised Silicon. (Newth.) (xiv, 1895) .....                                                         | 1074 |
| Acid, Action of, on Gutta-Percha. (Hampe.) (x, 1891) .....                                                                                | 484  |
| Acid and Fluorides, Uses for. (ix, 1890) .....                                                                                            | 1055 |
| Acid and Lactic Treatment of Yeast. (Scheidner.) (xiv, 1895) .....                                                                        | 1056 |
| Acid, Apparatus for Preparing. (Hempel.) (iv, 1885) .....                                                                                 | 612  |
| Acid, Capacity of Yeast to Live in Media containing. (Sarel.) (xiii, 1894) .....                                                          | 653  |
| Acid, Compounds of, with Water. (Metzner.) (xiv, 1895) .....                                                                              | 364  |
| Acid, Etching Glass by. (Reinitzer.) (v, 1886) .....                                                                                      | 669  |
| Acid in Dresden. (T.R.) (vi, 1888) .....                                                                                                  | 701  |
| Acid, Purification of Yeast by. (Jorgensen and Holm.) (xii, 1893) .....                                                                   | 777  |
| Acid, Treating Yeast with. (Cluss.) (xiv, 1895) .....                                                                                     | 52   |
| Acid, Use of, in Distillation of Alcohol. (Schishkoff.) (xi, 1892) .....                                                                  | 627  |
| Acid, Use of, in Distilleries. (Vincent.) (xi, 1892) .....                                                                                | 626  |
| Acid, Use of, in Manufacture of Yeast. (Wittelschofer.) (xiv, 1895) .....                                                                 | 1056 |
| Hydrofluosilicic Acid, Apparatus for Preparing. (Hempel.) (iv, 1885) .....                                                                | 612  |
| Hydrogen, Absorption of, by Palladium. (Wilm.) (xi, 1892) .....                                                                           | 465  |
| Action of Nascent, upon Pyrrol. (Ciancian and Dennstedt.) (i, 1882) .....                                                                 | 398  |
| Action of, on Oxygen. (Dixon.) (v, 1886) .....                                                                                            | 370  |
| Action of Sulphuretted, on Zinc Sulphate. (Baubigny.) (viii, 1889) .....                                                                  | 216  |
| Addition of, to Tricyclic Systems. (Bamberger.) (xi, 1892) .....                                                                          | 23   |
| And Carbon Dioxide, Behaviour of Mixtures of, at High Temperatures. (Naumann and Pistor.) (v, 1886) .....                                 | 24   |
| And Carbonic Oxide, Combustion of. (Dixon.) (v, 1886) .....                                                                               | 370  |
| And Chlorine from Hydrochloric Acid. (P) Kellner. (xi, 1892) .....                                                                        | 239  |
| And Nitrogen, Obtaining Ammonia from, and Apparatus therefor. (P) Fell. From The American Ammonia Manufacturing Company. (ix, 1890) ..... | 392  |

|                                                                                                       | PAGE |

| And Steel Process, A New Direct. (Bromfield.) (i, 1882) .....                                                  | 323  |
| And Steel Production in 1890. (T.R.) (x, 1891) .....                                                           | 958  |
| And Steel, Prod. of, direct from Ore. (T.R.) (vi, 1887) .....                                                  | 755  |
| And Steel, Role of Foreign Bodies in. (Osmond.) (ix, 1890) .....                                               | 517  |
| And Steel Sheets, Preparing for Galvanising. (P) Davies. (viii, 1889) .....                                    | 898  |
| And Steel Slag, Production of Alkalies from. (P) Twynham. (viii, 1889) .....                                   | 399  |
| And Steel, State of Carbon in. (Ledebr.) (v, 1886) .....                                                       | 493  |
| And Steel Statistics. (T.R.) (ix, 1890) .....                                                                  | 568  |
| And Steel, Sulphur in, Determination of. (Archbutt.) (ix, 1890) .....                                          | 25   |
| And Steel, Sulphur in, Estimation of: (Campredon.) (xiv, 1895) .....                                           | 889  |
| (Haltensaur.) (x, 1891) .....                                                                                  | 797  |
| And Steel Surfaces, Coating for. (P) Thompson. From Wells. (vii, 1888) .....                                   | 633  |
| And Steel, Tempering. (P) Theodosoff. (viii, 1889) .....                                                       | 548  |
| And Steel, Treatment of, to Prevent Oxidation when Hot. (P) Lake. From Cummins and Coleman. (viii, 1889) ..... | 828  |
| And Steel Wire, Development of Manufacture of. (Bedson.) (xii, 1893) .....                                     | 1038 |
| And Tungsten Alloys, Manufacture of. (P) Guetat and Chavanne. (i, 1882) .....                                  | 154  |
| App. for Coating Hoops with Tin. (P) Johns. (x, 1891) .....                                                    | 291  |
| App. for Coating with Alloys. (P) Heathfield. (vi, 1887) .....                                                 | 504  |
| App. for Coating with Metals. (P) Heathfield. (vi, 1887) .....                                                 | 512  |
| App. for Coating with Zinc, &c. (P) Heathfield. (vi, 1887) .....                                               | 665  |
| Apparatus for Converting Cast, into Steel. (P) Bond and Whiteley. (ii, 1883) .....                             | 330  |
| Apparatus for Converting Crude, into Malleable Iron and Steel. (P) Becker. (ix, 1890) .....                    | 627  |
| Apparatus for Converting Crude, into Steel. (P) Bookwalter. (vii, 1888) .....                                  | 635  |

## Iron—cont.

|                                                                                                 |          |
|-------------------------------------------------------------------------------------------------|----------|
| App. for Estimation of Sulphur in. (Blum.) (xii, 1893) ..                                       | 63       |
| Apparatus for Galvanising. (P) Jones. (xi, 1892) ....                                           | 612, 614 |
| App. for Manuf. of Cast. (P) Allen and Duvy. (xiii, 1894) ..                                    | 815      |
| Apparatus for Pickling Surface of. (P) Gutensohn and James. (vii, 1889) .....                   | 201      |
| Apparatus for Separating. (P) Smith. (vii, 1888) .....                                          | 505      |
| Apparatus for Separating, from Bones. (P) Christy and Carter. (x, 1891) .....                   | 127      |
| Apparatus for Separating, from Paper Stock. (P) Lake. From Rising and Atkins. (x, 1891) .....   | 817      |
| Arsenic in, Determination of. (Grundahl.) (v, 1886) .....                                       | 547      |
| Arsenic in Metallic, Detect. of. (Sautermeister.) (x, 1891) ..                                  | 949      |
| Arsenic in Pig. Determination of. (Stead.) (xiv, 1895) ..                                       | 441      |
| Arsenides and Sulphides of, Working Auriferous and Argentiferous. (P) Probert. (iv, 1885) ..... | 288      |
| Articles, Examination of Tin-plated. (Pinette.) (xi, 1892) ..                                   | 51       |
| Balls, Fining Beer by. (Wiedring.) (xiv, 1895) .....                                            | 1057     |
| Basic Linings for Dephosphorisation of Pigs. (P) Jungham and Felsmann. (i, 1882) .....          | 325      |
| Baths for Toughening, &c. (P) Bates. (xiii, 1894) .....                                         | 645      |
| Brittleness of, after Corrosion. (Ledebr.) (vii, 1888) ....                                     | 35       |
| Carbide, Production of. (Muhlhauser.) (xiii, 1894) .....                                        | 35       |
| Carbohydrate from Carbon in Cast. (Zabudsky.) (i, 1882) ..                                      | 323, 388 |
| Carbon in. (Abel.) (iv, 1885) .....                                                             | 281      |
| Carbon in, Determination of: (Hempel.) (xii, 1894) .....                                        | 421      |
| (Volmer.) (xiv, 1895) .....                                                                     | 888      |
| (Weissmann.) (vii, 1888) .....                                                                  | 646      |
| (Wiborh.) (xii, 1893) .....                                                                     | 768      |
| (Wood.) (iii, 1884) .....                                                                       | 652      |
| Carbon in, Estimation of: (Blum.) (viii, 1889) .....                                            | 922      |
| (Konck.) (vii, 1888) .....                                                                      | 457, 633 |
| (Ledebr.) (xiii, 1894) .....                                                                    | 281      |
| Carbon in Malleable, Determination of. (Pettersson and Smith.) (xii, 1893) .....                | 1061     |
| Carbon in, Methods of Estimating. (Gottig.) (xiii, 1894) ..                                     | 1096     |
| Carbon in, Modifications of. (Ledebr.) (xii, 1893) .....                                        | 931      |
| Carbon in, Reliability of Methods of Determining. (Gottig.) (xii, 1894) .....                   | 421      |
| Carbon in, Volum. Determ. of. (Wiborh.) (vii, 1888) ....                                        | 235      |
| Carbon of Spiegel. (Rathke.) (x, 1891) .....                                                    | 485      |
| Carbonyl. (Berthelot.) (xi, 1892) .....                                                         | 909      |
| Carbonyl in Illuminating Gas. (Guntz.) (xi, 1892) .....                                         | 856      |
| Carburising Fluid. (P) Stead. (xi, 1892) .....                                                  | 694      |
| Cast, and Wrought, and Steel, Relative Oxidisability of. (Gruner.) (ii, 1883) .....             | 283      |
| Cast, Comparative Yield of, in England and Germany. (Weinlig.) (i, 1882) .....                  | 309      |
| Cast, Composition of. (Turner.) (vii, 1888) .....                                               | 200      |
| Cast, Condition of Silicon in. (xiv, 1895) .....                                                | 662      |
| Cast, Conversion of. (P) Reese. (ii, 1883) .....                                                | 180      |
| Cast, Conversion of, into Wrought-Iron. (Lebedieff.) (xi, 1892) .....                           | 245      |
| Cast, Converting, into Malleable Iron or Steel. (P) Hufty and Caldwell. (xiv, 1895) .....       | 581      |
| Cast, Cooling Curves and Tests for. (Keep.) (xiv, 1895) ..                                      | 889      |
| Cast, Decarburisation of. (Korting.) (i, 1882) .....                                            | 457      |
| Cast, Desulphurising Molten. (x, 1891) .....                                                    | 774      |
| Cast, Estimation of Silicon in. (Rubricius.) (xii, 1893) ..                                     | 868      |
| Cast, Formation of, in Zinc Muffles. (Jensch.) (xiii, 1894) ..                                  | 398      |
| Cast, Influence of Aluminium on. (Keep and others.) (vii, 1888) .....                           | 752      |
| Cast, Influence of Phosphorus on Composition of. (Kjellberg.) (xii, 1893) .....                 | 604      |
| Cast, Influence of Silicon on Properties of. (Turner.) (iv, 1885) .....                         | 677, 745 |
| Cast, Manufacture of. (P) Renshaw. (x, 1891) .....                                              | 553      |
| Cast, Method and Apparatus for Refining. (P) Wetter. (ii, 1883) .....                           | 319      |
| Cast, Prod. of Homogeneous. (P) Lencanhez. (xiv, 1895) ..                                       | 582      |
| Cast, Production of Malleable. (i, 1882) .....                                                  | 71       |
| Cast, Selective Alteration of Constituents of. (Turner.) (iv, 1885) .....                       | 595      |
| Cast, Silicon and Aluminium in. (Osmond.) (xi, 1892) ....                                       | 242      |
| Cast, Silicon and Sulphur in. (Turner.) (vii, 1888) .....                                       | 549      |
| Cast, Stirling's Toughened. (Turner.) (v, 1886) .....                                           | 292      |
| Cast, Strength of. (Turner.) (v, 1886) .....                                                    | 289      |
| Cast, Sulphur in. (Keep.) (xiii, 1894) .....                                                    | 524      |
| Cast, Testing of. (Ledebr.) (vii, 1888) .....                                                   | 529      |
| Cast, Tinning Articles of. (P) Boul. From Wolf, Netter, and Jacobi. (xiii, 1894) .....          | 42       |
| Cast, Treatment of. (P) Sugden. (xii, 1893) .....                                               | 360      |
| Castings, Making Malleable. (P) Townsend. (viii, 1889) ..                                       | 490      |
| Cement, Manufacture of. (P) Hardingham. From Grouvelle. (vii, 1888) .....                       | 211      |
| Changes Produced in, by Deformation in the Cold. (Charpy.) (xvii, 1894) .....                   | 40       |
| Chemistry of Foundry. (Turner.) (v, 1886) .....                                                 | 289      |
| Chloride in Oxalate Developer. (vii, 1888) .....                                                | 342      |
| Chloride Solutions, Inverting Action of French Official. (Herissey.) (xiv, 1895) .....          | 1653     |
| Chromates of. (Lepierre.) (xiv, 1895) .....                                                     | 372      |
| Chromic. (Mennier.) (ix, 1890) .....                                                            | 651      |
| Chromic, Artificial Production of. (Mennier.) (viii, 1889) ..                                   | 196      |
| Chromic, Manufacture of. (P) Sandahl, Bargate, and Phillips. (vi, 1887) .....                   | 511      |
| Chromic, in Quebec. (T.R.) (xiii, 1894) .....                                                   | 911      |
| Chromium and Aluminium, Basic Sulphocyanides of. (P) Hauff. (vii, 1888) .....                   | 207      |

|                                                                                           | PAGE     |

| Novel Properties of, and Manganese Some. (Hadfield.) (vii, 1888)                                    | 211      |
| Obtaining, from Liquid Acid Residues. (P) D'Andria. (ix, 1890)                                      | 860      |
| Occurrence and Production of, in the World. (vii, 1888)                                             | 850      |
| Or Iron Ores, Separation of, from Gangue. (P) Mills. From Edison. (xiii, 1893)                      | 988      |
| Or Low Steel, Materials for Converting, into High Grade Steel. (P) Bates. (ix, 1890)                | 811      |
| Or Steel, Alloys Containing. (P) Hall. (viii, 1889)                                                 | 199      |
| Or Steel, Alloys of Copper with, and another Metal. (P) Brin. (viii, 1889)                          | 897      |
| Or Steel and Nickel, Manufacture of Alloys of. (P) Schneider. (ix, 1890)                            | 193      |
| Or Steel, Coating, with Copper. (P) Prout and Murray. (viii, 1889)                                  | 987, 988 |
| Or Steel, Manufacture of. (P) Darby. (x, 1891)                                                      | 439      |
| Or Steel, Method and Apparatus for Manufacturing. (P) Sellar. (ix, 1890)                            | 1134     |
| Or Steel, Production of, from Ores. (P) Von Ehrenwerth. (ix, 1890)                                  | 811      |
| Or Steel, Protection of, from Oxidation. (P) Ewart. (viii, 1889)                                    | 406      |
| Or Steel, Treating Galvanised. (P) Grimshaw. (x, 1891)                                              | 451      |
| Or Steel, Treatment of Molten. (P) Love. (xiv, 1895)                                                | 879      |
| Ore Analyses of Chrome:                                                                             |          |
| (Venator and Etienne.) (vi, 1887)                                                                   | 386      |
| (Namiass.) (x, 1891)                                                                                | 486      |
| Ore Analysis, Tabular Scheme for. (Morgan.) (xiii, 1894)                                            | 1023     |
| Ore, Concentration of Magnetic. (P) Haddan. From Conkling. (ix, 1890)                               | 742      |
| Ore District of Bilbao. (i, 1882)                                                                   | 157      |
| Ore, Dressing Spathe, at Allevard. (Gronier.) (xiii, 1894)                                          | 1064     |
| Ore, Estimation of Chromium in Chrome. (Spüller and Kalmann.) (xiii, 1894)                          | 251      |
| Ore, Great Deposit of, in Newfoundland. (T.R.) (viii, 1889)                                         | 484      |
| Ore, Magnetic Concentration of. (Cleare.) (xii, 1893)                                               | 766      |
| Ore, Occurrence of Silver in. (i, 1882)                                                             | 111      |
| Ore, Pigments from. (P) Lake. From Brown. (v, 1886)                                                 | 35       |
| Ore, Prospects of the Supply of. (T.R.) (ix, 1890)                                                  | 562      |
| Ore, Sand, &c., Preparing for Reducing Furnace. (P) Bowring. (xii, 1893)                            | 694      |
| Ore Supply of Scandinavia. (T.R.) (xiii, 1894)                                                      | 675      |
| Ore, Swedish. (Schwarze.) (iii, 1884)                                                               | 522      |
| Ores, Apparatus for Reduction of, &c. (P) Danton. (x, 1891)                                         | 531      |
| Ores, Apparatus for Treating, and Burning the Fumes therefrom. (P) Conley and Lancaster. (ix, 1890) | 948      |
| Ores, Estimation of Arsenic and Phosphorus in. (Pattinson.) (xii, 1893)                             | 119      |
| Ores, Estimation of Ferric Oxide in. (Blum.) (vii, 1888)                                            | 456      |
| Ores, Estimation of Phosphorus in Titaniferous. (Baskerville.) (xii, 1893)                          | 1062     |
| Ores in Great Britain. (T.R.) (xii, 1893)                                                           | 959      |
| Ores of Serphos. (T.R.) (xiii, 1894)                                                                | 431      |
| Ores of Sinaloa. (Silliman.) (i, 1882)                                                              | 507      |

## Iron—cont.

|                                                                                              |          |
|----------------------------------------------------------------------------------------------|----------|
| Ores, Oxides, and Compounds, Preparing for Smelting:                                         |          |
| (P) McCulloch. (v, 1886)                                                                     | 328      |
| (P) Woodcock, Smith, and Mackey. (xi, 1892)                                                  | 754      |
| Ores, Prep. of Pulverised. (P) Thomlinson. (xiii, 1894)                                      | 889      |
| Ores, Reduction of:                                                                          |          |
| (P) Clark. From Thiebautmont. (iii, 1884)                                                    | 640      |
| (P) Lake. From Westman. (iv, 1885)                                                           | 678      |
| (P) Lash and Johnson. (ix, 1890)                                                             | 951      |
| Ores, The Smelting of, Chemically Considered. (Bell.) (ix, 1890)                             | 691      |
| Ores, Titration of. (Hempel.) (iv, 1885)                                                     | 419      |
| Ores, Treatment of. (P) Conley and Lancaster. (x, 1891)                                      | 261      |
| Oxidation and Corrosion of. (Thomson.) (xiii, 1894)                                          | 118      |
| Oxide and Alumina, Influence of, on Superphosphate. (Smetman.) (xiv, 1895)                   | 112, 242 |
| Oxide, Apparatus for Turning. (P) Marshall and Blahm. (xii, 1893)                            | 667      |
| Oxide, Coloration of (Clay by. (Seeger.) (xi, 1892)                                          | 749      |
| Oxide, Determination of. (Donath and Jeller.) (v, 1886)                                      | 507      |
| Oxide, Extraction of, from Galvanising Liquors. (P) Turner. (viii, 1889)                     | 780      |
| Oxide for Use as a Pigment. (P) Lyte. (xiii, 1894)                                           | 962      |
| Oxide from Copper Liquors. (P) Bird. (vii, 1888)                                             | 677      |
| Oxide, Furnace for Treating Spent. (P) McDougall. (iii, 1884)                                | 329      |
| Oxide in Mineral Phosphates and Manures. (Thomson.) (v, 1886)                                | 152      |
| Oxide, Manufacture of:                                                                       |          |
| (P) Bayley. (v, 1886)                                                                        | 240      |
| (P) Garraway. (xiv, 1895)                                                                    | 751      |
| (P) Hemmingsway. (xii, 1894)                                                                 | 163      |
| (P) Parnell. (i, 1882)                                                                       | 235      |
| Oxide, Obtaining, from Cupreous Pyrites. (P) Hargreaves and Robinson. (vii, 1888)            | 217      |
| Oxide, Obtaining, from Residual Liquors. (P) Wigg. Steele and Wigg. (v, 1886)                | 31       |
| Oxide, Obtaining, from Waste Liquors. (P) Hall. (xi, 1892)                                   | 613      |
| Oxide of, in Mineral Phosphates, Estimation of. (Smetman.) (xii, 1893)                       | 112      |
| Oxide of, in Phosphates, Determ. of. (Stutzer.) (ix, 1890)                                   | 218      |
| Oxide, Production of. (P) Davis. (xiv, 1895)                                                 | 157      |
| Oxide, Purification by. (Travers.) (v, 1886)                                                 | 426      |
| Oxide, Purification of Sewage by Waste. (P) Sacré and Grimshaw. (xi, 1892)                   | 933      |
| Oxide, Recovery of. (P) Lunze and Dewar. (xi, 1892)                                          | 433      |
| Oxide, Red, from Decomposed Iron Sulphate. (P) Terrell. (iii, 1884)                          | 414      |
| Oxide, Separation of Nickel from. (Gallbraith.) (i, 1882)                                    | 345      |
| Oxide, Use of, in Manufacture of Paints and Pigments. (P) Harris and Sacré. (xii, 1893)      | 936      |
| Oxide, Utilisation of. (P) Biabury. (x, 1891)                                                | 552      |
| Oxide, Utilisation of, in Extraction of Copper. (P) Kilpatrick and others. (xii, 1893)       | 172      |
| Oxides, Obtaining Sulphur and Arsenical Compounds from. (P) Robinson. (v, 1886)              | 32       |
| Oxides, Preparation of, and Apparatus therefor. (P) Jones. (vii, 1888)                       | 443      |
| Oxides, Preparing, from Ferrous Solutions. (P) Ramaze. (ix, 1890)                            | 630      |
| Oxides, Treatment of, for Smelting. (P) Mason. (iv, 1885)                                    | 352      |
| Oxidising the Protosalts of, to Persalts. (P) McCulloch. (xiv, 1895)                         | 805      |
| Oxygen and Carbon in, Determ. of. (Ledebur.) (i, 1882)                                       | 366      |
| Paint for Coating. (iv, 1885)                                                                | 227      |
| Painting of. (x, 1891)                                                                       | 524      |
| Peroxide, Manuf. of Salts of. (P) Faillard. (xi, 1892)                                       | 434      |
| Persalts of, Manufacture of. (P) Hermite and Dubose. (xii, 1893)                             | 452      |
| Persalts. See also under Ferrie.                                                             |          |
| Persulphate, Prod. of. (P) Dalton and Provis. (xiv, 1895)                                    | 503      |
| Phosphate, Manufacture of a Manure containing. (P) Powter. (ix, 1890)                        | 201      |
| Phosphate of, for Fertiliser, Treatment of. (P) Lake. From Goodale and Spring. (xii, 1893)   | 612      |
| Phosphate Precipitate, Comp. of. (Thomson.) (v, 1886)                                        | 153      |
| Phosphide, Extraction of Phosphorus Compounds from. (P) Thompson. From Imperatori. (v, 1886) | 102      |
| Phosphide in Basic Bessemer Slag. (Jensch.) (v, 1886)                                        | 451      |
| Phosphorus in, Determination of:                                                             |          |
| (Carnot.) (xii, 1893)                                                                        | 378      |
| (Smith.) (i, 1882)                                                                           | 202      |
| (Weissmann.) (ix, 1890)                                                                      | 169      |
| (Zimmermann.) (xii, 1893)                                                                    | 293      |
| Phosphorus in, Estimation of:                                                                |          |
| (Benzet.) (xiv, 1895)                                                                        | 390      |
| (Norris.) (ix, 1890)                                                                         | 553      |
| (Pattinson.) (xiv, 1895)                                                                     | 143      |
| (Vorwerk.) (vi, 1887)                                                                        | 357      |
| Phosphorus in, Influence of. (Schneider.) (vii, 1888)                                        | 125      |
| Phosphorus in, Reaction for Estimation of. (Osmond.) (vi, 1887)                              | 607      |
| Physical Influence of Elements on. (Arnold.) (xiii, 1894)                                    | 642      |
| Pig., Dephosphorisation of. (i, 1882)                                                        | 71       |
| Pig., Desulphuration of. (P) Rollet. (i, 1882)                                               | 324      |
| Pig., Desulphurisation of Liquid. (Vathaire.) (xiv, 1895)                                    | 489      |
| Pig., Estimation of Phosphorus in:                                                           |          |
| (Reinhardt.) (x, 1891)                                                                       | 796      |
| (Spüller and Kalmann.) (xiii, 1894)                                                          | 175      |
| Pig., heated in Charcoal, Behaviour of. (Ledebur.) (vi, 1887)                                | 370      |
| Pig., in the United States in 1888. (T.R.) (vii, 1888)                                       | 601      |
| Pig., Influence of a Heated Blast on. (Ledebur.) (vi, 1887)                                  | 548      |

|                                                                                         | PAGE |

|-----------------------------------------------------------------------------------------------------|----------|
| Filaments for Incandescent:                                                                         |          |
| (P) Lake, From Tibbits. (viii, 1889).....                                                           | 901      |
| (P) Mohrle. (xi, 1892).....                                                                         | 42       |
| For Kerosene Oil. (Aibegow and Dolinin.) (vii, 1888) ..                                             | 112      |
| For Liquid Hydrocarbons. Incandescence. (P) Marcus. (xiv, 1895).....                                | 562      |
| Gas, and Gas-evolving Apparatus. (P) Berliand. (i, 1882) 397                                        |          |
| Gases Exploded by Incandescence. (vii, 1888).....                                                   | 557      |
| Holders for Electric. (P) Hohnes. (vi, 1887).....                                                   | 734      |
| Incandescence Bodies for Gas. (P) Schneider. (xiii, 1894) 715                                       |          |
| Incandescent Electric:                                                                              |          |
| (P) Edmundson. (ix, 1890).....                                                                      | 520      |
| (P) Gardner, From Reid. (x, 1891).....                                                              | 146      |
| (P) Lake, From Van Choate. (viii, 1889).....                                                        | 805      |
| (P) Lorrain. (vi, 1887).....                                                                        | 517      |
| (P) Maxwell. (vi, 1887).....                                                                        | 755      |
| (P) Maxwell and Hughes. (v, 1886).....                                                              | 615      |
| (P) Mills. From Edison. (x, 1891).....                                                              | 839      |
| (P) Mills. From Holzer. (vi, 1887).....                                                             | 209      |
| (P) Smith. (xi, 1892).....                                                                          | 618      |
| Incandescent, for Liquid Fuel. (P) Friedlander and Mul-<br>ler. (xiv, 1895).....                    | 740      |
| Incandescent Gas:                                                                                   |          |
| (P) Charnoud. (xi, 1892).....                                                                       | 21       |
| (P) Hoskin. (xi, 1892).....                                                                         | 21       |
| (P) Tee. (xiv, 1895).....                                                                           | 141      |
| (P) Wenzel. (x, 1891).....                                                                          | 354      |
| Lighting and Safety. (ix, 1890).....                                                                | 272      |
| Mineral Oil. (Abel and Redwood.) (v, 1886).....                                                     | 409      |
| Petroleum. (Biel.) (iii, 1884).....                                                                 | 565      |
| Petroleum, Construction of. (Frankland.) (iv, 1885).....                                            | 387      |
| Regenerative Gas:                                                                                   |          |
| (P) Green and Walker. (v, 1886).....                                                                | 595      |
| (P) Siemens. (vi, 1887).....                                                                        | 539      |
| Regenerative Hydrocarbon. (Chandor and Nöltner.) (vi,<br>1887).....                                 | 590      |
| Regulator and Battery for Electric. (P) Medland. (vi,<br>1887).....                                 | 209      |
| Regulator for Electric Arc. (P) Gevard-Lescuyer. (i, 1882) 492                                      |          |
| Renewing Filaments of Electric. (P) Chapman. (xii,<br>1893).....                                    | 525      |
| Seal for Wires of Incandescent. (P) Walter. (x, 1891).....                                          | 840      |
| Substitute for Platinum in Incandescent. (Bolton.) (xiv,<br>1895).....                              | 136      |
| Treating Incandescents, for use with Gas. (P) Dellwik.<br>(x, 1891).....                            | 244      |
| Variations of Petroleum on Burning in. (Junker.) (ii,<br>1883).....                                 | 351      |
| Worked with High-boiling Hydrocarbons, Burners for.<br>(P) Schwarz and Huppertsberg. (i, 1882)..... | 393      |
| Lamp-Black, Apparatus for Making. (P) Binney. (xi, 1892) 171                                        |          |
| Manufacture, Avoiding Dangers of. (ix, 1890).....                                                   | 272      |
| Manufacture of:                                                                                     |          |
| (T.R.) (ix, 1890).....                                                                              | 567      |
| (P) Irvine. (xiii, 1894).....                                                                       | 532      |
| Lamp-Flames, Means for Increasing Illuminating Power of.<br>(P) Moss. (xii, 1893).....              | 916      |
| Lamp-Oil, Application of Disinfectants for Uses. (P) Watson<br>and Fulton. (iv, 1885).....          | 680      |
| Lamp-Shade, Spontaneous Combustion of a. (Dupre.) (xiii,<br>1894).....                              | 670      |
| Lamp-Shades, Spontaneous Combustion of. (xiii, 1894).....                                           | 670      |
| Lamy's "Conversion Colours," Report on. (Matthuch.) (viii,<br>1889).....                            | 43       |
| Lancashire Soda Test, The. (Tate.) (iii, 1884).....                                                 | 63       |
| Lancashire Watch Co., Visit to Factory of. (xii, 1893).....                                         | 576      |
| Land Cultivated without Manure, Exhaustion of. (Deherain.)<br>(ix, 1890).....                       | 306      |
| Reduction of Nitrates in Amble. (Deherain and Ma-<br>quenne.) (ii, 1884).....                       | 185      |
| Lanolin. (vii, 1888).....                                                                           | 340      |
| (P) Abel. (v, 1886).....                                                                            | 672      |
| (Levinstein.) (v, 1886).....                                                                        | 578      |
| And Anhydrous Lanolin, Preparation of. (P) Abel.<br>(vi, 1887).....                                 | 147      |
| And Grande Wool-Grease. (xiii, 1894).....                                                           | 529      |
| Anhydrous. (Merek.) (ix, 1890).....                                                                 | 544      |
| Compound, Preparation of a. (P) Thompson. From<br>Krause. (x, 1891).....                            | 471      |
| Extraction of. (P) Boulton. From Korschelt. (viii,<br>1889).....                                    | 290, 290 |
| Preparation of. (P) Jaffé and Darmstadter. (xi, 1892) ..                                            | 928      |
| Production of. (P) Brann and Liebreich. (ii, 1883).....                                             | 182      |
| Test for. (Vulpus.) (viii, 1889).....                                                               | 822      |

## Lard—cont.

|                                                                                          | PAGE     |
|------------------------------------------------------------------------------------------|----------|
| Adulteration of, with Cotton-Seed Oil. (Bujard and Wald-<br>bauer.) (viii, 1889).....    | 480      |
| Analysis of. (Amthor and Zink.) (xii, 1893).....                                         | 67       |
| Analysis of Steam-. (Goske.) (xii, 1893).....                                            | 469      |
| Analysis, Phosphomolybdic Acid Test for. (Tennille.)<br>(xiv, 1895).....                 | 513      |
| And Lard Adulteration. (Wiley.) (viii, 1889).....                                        | 641      |
| App. for Treating. (P) Hodges and Christy. (iv, 1885).....                               | 504      |
| British Trade in, in 1888. (T.R.) (viii, 1889).....                                      | 834      |
| Commercial Analysis of. (Schweitzer and Lungwitz.)<br>(xiii, 1894).....                  | 614, 708 |
| Cotton-Seed Oil in, Estimation of.                                                       |          |
| (Fairley and Cooke.) (ix, 1890).....                                                     | 1162     |
| (Gantter.) (xii, 1893).....                                                              | 629      |
| (Koninck.) (ix, 1890).....                                                               | 825      |
| Detection of Cotton-Seed Oil in:                                                         |          |
| (Asboth.) (ix, 1890).....                                                                | 418      |
| (Bishop and Ence.) (viii, 1889).....                                                     | 63       |
| (Crook.) (xii, 1893).....                                                                | 803      |
| (Gantter.) (xii, 1893).....                                                              | 629      |
| Detection of Vegetable Oils in. (Jenn.) (xiv, 1895).....                                 | 827      |
| Examination of. (Isbert and Venator.) (vii, 1888).....                                   | 527      |
| From Cotton-Seed Oil in America. (T.R.) (vii, 1888).....                                 | 244      |
| Manufacture of. (P) Martin. (i, 1882).....                                               | 163      |
| Oil, Analysis of. (Schweitzer and Lungwitz.) (xiv, 1895).....                            | 129      |
| Oil, Percentage of Iodine absorbed by, by the Hubl<br>Method. (Haines.) (x, 1891).....   | 1040     |
| Report on, from Breslan Analytical Station. (Fisher and<br>others.) (xii, 1893).....     | 556      |
| Solidifying Points of Fatty Acids of. (Prukenner.) (viii,<br>1889).....                  | 423      |
| Testing, for Cotton-Seed Oil and Beef Stearin. (Pattin-<br>son.) (viii, 1889).....       | 30       |
| Testing, for Fatty Oils. (Welmans.) (xi, 1892).....                                      | 518      |
| Lards: Detection of Cotton-Seed Oil. (Dupont.) (xiv, 1895).....                          | 828      |
| Quality of. (Engler and Rupp.) (x, 1891).....                                            | 801      |
| Testing of. (viii, 1889).....                                                            | 123      |
| Lasne and Benker's Process for Manufacture of Sulphuric<br>Acid. (Lange.) (i, 1882)..... | 107      |
| Latex of the Lacquer Tree. (Bertrand.) (xiii, 1894).....                                 | 1071     |
| Lathering Point in Hardness Determ. (Loges.) (iii, 1884).....                            | 652      |
| Latrines, Disinfection of, by Lime. (Puhl.) (ix, 1890).....                              | 643      |
| Laubenheimer's Reaction. (Odenheimer.) (iii, 1884).....                                  | 410      |
| Laudanidine: An Opium Alkaloid. (Hesse.) (xiv, 1895).....                                | 383      |
| Laudanine. (ix, 1890).....                                                               | 888      |
| (Goldschmidt.) (xii, 1893).....                                                          | 288      |
| Laundries, Compound for Use in. (P) Lawson. (viii, 1889).....                            | 203      |
| Laundry Blue. (P) Aumann. (viii, 1894).....                                              | 1209     |
| Blue, Disinfectant. (P) Duncombe. (i, 1882).....                                         | 516      |
| Blue, Manufacture of:                                                                    |          |
| (P) Hargreaves. (iii, 1884).....                                                         | 104      |
| (P) Knowles. (xi, 1892).....                                                             | 45       |
| Glaze, Manufacture of. (P) Conroy. (xiii, 1894).....                                     | 531      |
| Purposes, Apparatus for Softening Water for. (P) Bowers.<br>(iv, 1885).....              | 193      |
| Laurene. (Uhlhorn.) (ix, 1890).....                                                      | 963      |
| And Menthene. (Brühl.) (viii, 1889).....                                                 | 635      |
| Laurent's Naphthase. On the Eulhodines and. (Witt.) (vi,<br>1887).....                   | 213      |
| New Polarimeter. (Kanders.) (vi, 1887).....                                              | 835      |
| Laurium Mines in 1890. (T.R.) (x, 1891).....                                             | 393      |
| Lava, A Paraffin contained in Geades from Etna. (Silvestri.)<br>(ii, 1883).....          | 124      |
| Emamelling. (Gillet.) (ix, 1890).....                                                    | 393      |
| Occurrence of Crystallised Paraffin in. (Silvestri.) (i, 1882) 180                       |          |
| Lavas from Etna and Vesuvius, Analyses of. (Riccardi.)<br>(iv, 1885).....                | 128      |
| Lavandula Spica. (Bouchardat.) (xiii, 1894).....                                         | 60       |
| Lavender and Rosemary Oil, Examination of, for Excess.<br>(Eckenroth.) (vii, 1888).....  | 637      |
| Cultivation and Distillation of. (Sawyer.) (x, 1891).....                                | 478      |
| Occurrence of Camphene in Essence of. (Bouchardat.)<br>(xii, 1894).....                  | 756      |
| Oil:                                                                                     |          |
| (Bertram and Walbaum.) (xi, 1892).....                                                   | 838      |
| (Schummel.) (xiv, 1895).....                                                             | 986      |
| Lavoisier's Medal, Award of. (T.R.) (x, 1891).....                                       | 581      |

| Action of, in Colouring Aniline. (Werner.) (ix, 1890)....                                                                       | 278                                 | Quantitative Reaction for. (Benedikt and Bamberger.) (ix, 1890).....                                            | 1156 |
| Action of, in Preventing Putrefactive Decomposition and Inducing Formation of Hydrogen Peroxide. (Richardson.) (xii, 1893)..... | 553                                 | Sulphite Wood Liquor and. (Linsay and Tollens.) (xi, 1892).....                                                 | 835  |
| Action of, on Oils on Polarised. (Bishop.) (vi, 1887).....                                                                      | 750                                 | Tabacco Juice as a Reagent for. (Ihl.) (ix, 1890).....                                                          | 418  |
| Action of, on <i>Bacillus Anthracis</i> . (Marshall-Ward.) (xii, 1893).....                                                     | 472, 943                            | Lignite found in Argentina, Vanadiferous. (Kyle.) (xiii, 1894).....                                             | 738  |
| Action of, on Dyed Colours. (Hummel.) (x, 1891).....                                                                            | 832                                 | Hydrocarbon, Relation of Petroleum to. (Kraemer and Botcher.) (vi, 1887).....                                   | 504  |
| Action of, on Dyed Colours, Report of Committee on. (Hummel.).....                                                              | (xii, 1893), 822; (xiii, 1894), 803 | Obtaining Tar, Oil, &c. from. (P) Jensen. From Ziegler. (xii, 1893).....                                        | 136  |
| Action of, on Dyes. (Kischelt.) (xii, 1894).....                                                                                | 939                                 | Ovens for Charring. (P) Lippe. (i, 1882).....                                                                   | 142  |
| Action of, on Iodoform. (Dacomo.) (v, 1886).....                                                                                | 172                                 | Preparation of. (Ballabene.) (iv, 1885).....                                                                    | 366  |
| Action of, on Lead Bromide. (Norris.) (xiv, 1895).....                                                                          | 677                                 | Use of, in Austrian Blast Furnaces. (Von Tunner.) (i, 1882).....                                                | 367  |
| Action of, on Metastungstate of Soda. (Schloen.) (xiii, 1894).....                                                              | 388                                 | See also Brown Coal.                                                                                            |      |
| Action of, on Olive Oil. (Archbutt.) (v, 1886).....                                                                             | 312                                 | Lignocelluloses. (Hancock and Dahl.) (xiv, 1895).....                                                           | 897  |
| Action of, on Organic Compounds. (Klinger and Standke.) (x, 1891).....                                                          | 690                                 | Reaction of the, and Theory of Dyeing. (Cross and Devan.) (xii, 1893).....                                      | 104  |
| Action of, on Oxalic Acid. (Richardson.) (xiii, 1894).....                                                                      | 516                                 | Lignoceric and Arachidic Acid in Earth-Nut Oil. (Kneiling.) (vii, 1888).....                                    | 391  |
| Action of, on Phenol:                                                                                                           |                                     | Lignonin and Phenylhydrazine, Colour Reaction of. (Nickel.) (xii, 1893).....                                    | 869  |
| (Baehl.) (xiii, 1894).....                                                                                                      | 938                                 | Limic Absorption of, by Sea-Mud. (Müller.) (ix, 1890).....                                                      | 88   |
| (Richardson.) (xii, 1893).....                                                                                                  | 415                                 | Acetate of, Determination of Value of. (Blair.) (iv, 1885).....                                                 | 497  |
| Action of, on Phosphorus. (Pedler.) (ix, 1890).....                                                                             | 515                                 | Action of, on Castile, on Effluent Water. (Serich.) (vii, 1888).....                                            | 862  |
| Action of, on Silver Chloride:                                                                                                  |                                     | Action of, in Rendering Clay Flocculent. (Sachse and Becker.) (xiii, 1894).....                                 | 409  |
| (Baker.) (xi, 1892).....                                                                                                        | 634                                 | Action of, in the Dye-Bath. (Becke.) (v, 1885).....                                                             | 531  |
| (Bechamp.) (xi, 1892).....                                                                                                      | 266                                 | Action of, on Milk of, on Metals. (Schmeller.) (v, 1886).....                                                   | 493  |
| (Guntz.) (xi, 1892).....                                                                                                        | 179                                 | Action of, on Raffinose. (Lindet.) (ix, 1890).....                                                              | 748  |
| Aluminium Flash. (Villon.) (xi, 1892).....                                                                                      | 545                                 | Action of, on Salts of Ammonia, &c. (Lunge.) (ii, 1883).....                                                    | 514  |
| And Air, Action of, on Organic Comp. (Bidel.) (x, 1891).....                                                                    | 623                                 | And Cement, Manufacture of. (P) Mathey. (v, 1886).....                                                          | 328  |
| Apparatus for Measurement of Refractive Index of, in Liquids. (P) Féry. (xii, 1893).....                                        | 465                                 | And Cements, Manufacture of. (P) Heys. (viii, 1889).....                                                        | 120  |
| Apparatus for Producing. (P) Hudson. (xi, 1892).....                                                                            | 806                                 | And Cements, Shaking. (Le Chatelier.) (xiv, 1895).....                                                          | 575  |
| Apparatus for Producing Artificial, for Photography. (P) Johnson. (xi, 1892).....                                               | 634                                 | And Chlorine, Interaction of. (Veley.) (xiii, 1894).....                                                        | 250  |
| Apparatus for Producing Flash. (P) Redwood. (x, 1891).....                                                                      | 159                                 | And Copper Sulphate, Effect of, on Mildew. (Millardet and Gayon.) (v, 1886).....                                | 169  |
| Appliances for Producing, by Incandescence. (P) Heskin. (xi, 1892).....                                                         | 21                                  | And Magnesia in Plants. (Raumer.) (iii, 1884).....                                                              | 322  |
| Blowpipe Apparatus for Producing. (P) Pitt. From Knapp. (vi, 1887).....                                                         | 815                                 | And Mortar. (Letac and Vivien.) (xii, 1893).....                                                                | 1036 |
| Composition for Giving. (P) Lange. (xii, 1893).....                                                                             | 786                                 | And Phosphoric Acid in Bone Dust, Ratio between. (Looker-Campagne.) (vii, 1888).....                            | 222  |
| Determ. of Chemical Action of. (Lemone.) (x, 1891).....                                                                         | 863                                 | And of Sulphurous Acid for Preventing Mould during Malting, Use of. (xiv, 1895).....                            | 173  |
| Electric, in Powder Factories. (ii, 1883).....                                                                                  | 33                                  | Apparatus for Burning:                                                                                          |      |
| German Standard of. (T.R.) (xiv, 1895).....                                                                                     | 85                                  | (P) Taylor. (xi, 1892).....                                                                                     | 749  |
| Giving Power of Various Petroleum. (Thorne.) (iii, 1884).....                                                                   | 564                                 | (P) Tuflee. (vii, 1888).....                                                                                    | 325  |
| Influence of Carbonic Acid on Glass under Influence of. (Pfandler.) (iv, 1885).....                                             | 403                                 | App. for Calcining Hydraulic. (P) James. (ix, 1890).....                                                        | 73   |
| Influence of Incandescence Electric, on Wood-Cellulose Paper. (Wiesner.) (xi, 1892).....                                        | 596                                 | Apparatus for Decomposing Ammoniacal Salt Solutions by means of. (P) Rube, Engelcke, and Krause. (i, 1882)..... | 67   |
| Influence of, on Chemical Purification of Petroleum. (Zdoziecki.) (xiv, 1895).....                                              | 563                                 | Apparatus for Drying and Burning. (P) Felner and Ziegler. (xii, 1893).....                                      | 509  |
| Infl. of, on Germination of Seeds. (Cieslar.) (iv, 1885).....                                                                   | 410                                 | Apparatus for Manufacture of Chloride of. (P) Milnes. (xi, 1892), 907; (xiii, 1894), 1059                       | 262  |
| Influence of, on Reaction of Halogens on Aromatic Compounds. (Schraun.) (iv, 1885).....                                         | 398                                 | Apparatus for Obtaining. (P) Bull. (xii, 1893).....                                                             | 97   |
| Instrument for Measuring Diffuse Day. (Hurt.) (ix, 1890).....                                                                   | 370                                 | Apparatus for Preparing, for Treating Sewage. (P) Knowles. (ix, 1890).....                                      | 423  |
| Intensity of, from Various Illuminating Agents. (vi, 1887).....                                                                 | 716                                 | Apparatus for Preparing Milk of. (P) Johnson and Hutchinson. (v, 1886).....                                     | 348  |
| Intensity of Transmitted. (Bottomley.) (x, 1891).....                                                                           | 730                                 | App. for Treating Water with. (P) Howatson. (v, 1886).....                                                      | 39   |
| Magnesium Flash. (P) Haddan. From Engel. (xi, 1892).....                                                                        | 267                                 | App. for Turning. (P) Marshall and Blum. (xii, 1893).....                                                       | 667  |
| Magnesium, for Photographic Purposes. (P) Gaedlicke and Mithoe. (vi, 1887).....                                                 | 538                                 | As a Disinfectant. (Liborius.) (vii, 1888).....                                                                 | 333  |
| Magnesium Paper for Producing. (xiv, 1895).....                                                                                 | 1067                                | As Flux, Experiments on Blast Furnace with. (Cochrane.) (vii, 1889).....                                        | 890  |
| Measurement of Radiation of. (xiii, 1894).....                                                                                  | 428                                 | Bisulphite of, Use of, in Manufacture of Sugar. (i, 1882).....                                                  | 512  |
| New Standard of. (T.R.) (xiv, 1895).....                                                                                        | 527                                 | Borates of, Treatment of. (P) The Borax Company, Limited. (x, 1891).....                                        | 367  |
| Producing a Brilliant White. (P) Clamond. (ii, 1883).....                                                                       | 264                                 | -Burning, and Kilns therefor. (P) Bishop. (ix, 1890).....                                                       | 944  |
| Producing, by Magnesium. (P) Schirm. (x, 1891).....                                                                             | 38                                  | -Burning, Chamber Ovens for. (P) Arnold. (i, 1882).....                                                         | 233  |
| Producing Intense White. (P) Huray. From Clamond. (vii, 1888).....                                                              | 428                                 | Carbolate of, Manufacture of. (P) Austin. (iv, 1885).....                                                       | 240  |
| Production and Use of, and Apparatus therefor. (P) Willis and others. (xii, 1893).....                                          | 1020                                | Carbonate of, Analyses of Recovered. (Chance.) (vii, 1889).....                                                 | 170  |
| Prod. of, by Refractory Materials. (P) Rawson. (vi, 1887).....                                                                  | 538                                 | Carbonate of, from Chloride Liquors. (P) Wigg. (vii, 1888).....                                                 | 626  |
| Prod. of, from Certain Gases. (P) Tatham. (ix, 1890).....                                                                       | 171                                 | Carbonate of, Separation of Liquid from Waste. (P) Bolton and Wyde. (ii, 1883).....                             | 380  |
| Rendering Fabrics Sensitive to. (P) Junk. (xiii, 1894).....                                                                     | 173                                 | Carbonate of, Util. of Impure. (P) Sreedman. (viii, 1889).....                                                  | 778  |
| Resistance of Dyed Fibres to Action of. (Joffre.) (viii, 1889).....                                                             | 878                                 | Carbonate of, Utilising Waste, in Manufacture of Cement. (P) Hill. (xii, 1894).....                             | 235  |
| Standards of. (Dihidin).....                                                                                                    | (iv, 1885), 250; (vii, 1888), 367   | Carbonate of. See also under Calcium Carbonate.                                                                 |      |
| The So-called Auer. (xii, 1893).....                                                                                            | 915                                 | Caustic, as an Explosive. (Storey.) (i, 1882).....                                                              | 369  |
| Lighthouses, Electric Light in French. (i, 1882).....                                                                           | 139                                 | Caustic, Use of, in the Blast Furnace. (Bell.) (xiii, 1894).....                                                | 954  |
| Lighting, Apparatus for. (P) Mills. From Seigle-Goujon. (x, 1891).....                                                          | 244                                 | Cement, &c., Continuous Kilns for. (P) Bauchère. (xiv, 1895).....                                               | 486  |
| By Calciferous Gases, and Apparatus therefor. (P) Macaulay-Cruikshank. From Reissig and others. (x, 1891).....                  | 433                                 | Chemical Constitution of Chloride of. (Lunge and Naef.) (ii, 1883).....                                         | 327  |
| Electric, Position and Prospects of. (Holmes.) (iv, 1885).....                                                                  | 388                                 | Chloride of, and Analogous Compounds. (Lunge and Naef.) (ii, 1883).....                                         | 279  |
| Of Paris. (Fontaine.) (x, 1891).....                                                                                            | 36                                  | Chloride of, and Chloride of Lithium. (Kraut.) (i, 1882).....                                                   | 486  |
| Of Railway Carriages. (Putsch.) (i, 1882).....                                                                                  | 220                                 | Chloride of, Application of, for Bleaching Purposes. (P) Lunge. (ix, 1885).....                                 | 494  |
| Process for Electric. (P) Somzee. (i, 1882).....                                                                                | 491                                 | Chloride of, Determining Value of. (Lunge.) (v, 1886).....                                                      | 391  |
| Lightning Conductors, Construction of. (P) Godefroy. (i, 1882).....                                                             | 389                                 | Chloride of, Disinfecting Action of. (Nissen.) (ix, 1890).....                                                  | 643  |
| Ligneous Substances, Apparatus for Treating. (P) Lake. From Le Mye and de Peyster. (ix, 1885).....                              | 542                                 | Chloride of, Expts. on. (Boyer and Lurand.) (x, 1891).....                                                      | 925  |
| Ligni Campechani, Extractum. (Schweissinger.) (vi, 1887).....                                                                   | 149                                 | Chloride of, Manufacture of:                                                                                    |      |
| Lignin and Coal Oil. (Ihl.) (ix, 1890).....                                                                                     | 418                                 | (P) Opl. (iii, 1884).....                                                                                       | 108  |
| Colour Reaction of Hydrazine Sulphate with. (Nickel.) (xiii, 1894).....                                                         | 423                                 | (P) Solvay. (iv, 1885).....                                                                                     | 345  |
| Derivatives of. (Streich.) (xii, 1893).....                                                                                     | 1053                                | Chloride of, Manufacture of, and Apparatus therefor. (P) Solvay and Co. (ix, 1890).....                         | 198  |
| Ihl's Tests for. (Nickel.) (x, 1891).....                                                                                       | 575                                 |                                                                                                                 |      |

|--------------------------------------------------------------------------------------------------------|------|
| Chloride of, Packing:                                                                                  |      |
| (P) Needham. (x, 1891).....                                                                            | 642  |
| (P) Steele.....(i, 1882), 189; (ix, 1890).....                                                         | 862  |
| Chloride of, Pharm. Commission on. (iv, 1885).....                                                     | 687  |
| Chloride of, Process and Apparatus for Obtaining. (P) Higgs. (vi, 1887).....                           | 599  |
| Chloride of, Production of:                                                                            |      |
| (P) Cornett and others. (xii, 1893).....                                                               | 1031 |
| (P) Milnes. (xii, 1893).....                                                                           | 263  |
| Chloride of. <i>See also under</i> Bleaching Powder.                                                   |      |
| Chromate of, Applie. of, in Dyeing. (Wolff.) (ii, 1883)...                                             | 174  |
| Chromate of. <i>See also</i> Calcium Chromate.                                                         |      |
| Clearing Hides, Skins, &c. from. (P) Nesbit. (vi, 1887)...                                             | 601  |
| Composition of Calcined Lias. (Macadam.) (vii, 1888)...                                                | 90   |
| Conversion of Carbonate of, into Phosphate. (P) Lake. (iii, 1884).....                                 | 323  |
| Decomposing Cane Sugar by Boiling with. (Niedschlag.) (vi, 1887).....                                  | 668  |
| Defecation of Diffusion Juice with Slaked. (Mittelmann.) (xiii, 1894).....                             | 166  |
| Determination of. (Reitmar.) (viii, 1889).....                                                         | 821  |
| Determination of, in Gun Cotton. (Schjörning.) (xii, 1893).....                                        | 62   |
| Determination of, in Presence of Carbonates. (Lunge.) (i, 1882).....                                   | 55   |
| Disinfecting Latrines by. (Pfuhl.) (ix, 1890).....                                                     | 643  |
| Disinfection of Town Sewage Water by. (Pfuhl.) (xii, 1893).....                                        | 539  |
| Dissolving, out of Calcareous Minerals. (P) Cahen. (iv, 1885).....                                     | 117  |
| Employment of Basic Phosphate of, in Fodder. (Cohn.) (iv, 1885).....                                   | 231  |
| Extracting Sugar from Molasses by. (Degner.) (iii, 1884).....                                          | 323  |
| Freeing Skins, &c. from. (P) Hauff. (viii, 1889).....                                                  | 809  |
| From Gas Purifiers, Desulphurising. (P) Walker. (ix, 1890).....                                        | 49   |
| From Gasworks, Treating Spent. (P) Lake. (iii, 1884).....                                              | 233  |
| From Gasworks, Utilisation of Waste. (P) Ransome. (i, 1882).....                                       | 280  |
| Gas-Volumetric Analysis of Chloride of. (Lunge.) (ix, 1890).....                                       | 21   |
| Hydrate of, Revivification of. (P) Reid. (iv, 1885).....                                               | 582  |
| Hydrate of. <i>See also</i> Calcium Hydrate.                                                           |      |
| Impregnated with Saccharine Matter, Utilisation of. (P) Wass. (v, 1886).....                           | 674  |
| In Basic Slag, Mannurial Value of Free. (Jensch.) (vii, 1888).....                                     | 332  |
| In Raw Sugar, Importance of Definite Quantity of. (Strohmeyer.) (vii, 1888).....                       | 334  |
| In Soil, Influence of, on Vegetation. (Hilgard.) (vi, 1887).....                                       | 733  |
| In Soils, Estim. of. (Reverdin and Harpe.) (viii, 1889).....                                           | 735  |
| In Tanning Materials. (Petrovitch.) (viii, 1889).....                                                  | 992  |
| Infl. of, on Distillation of Coal. (Knublauch.) (vi, 1887).....                                        | 593  |
| -Kiln Gases, Analysis of. (Chance.) (vii, 1888).....                                                   | 171  |
| -Kiln, Sublimate deposited in Gas Delivery Tube of. (Gintl.) (iii, 1884).....                          | 520  |
| -Kilns:                                                                                                |      |
| (P) Dawson. From Quarez Frères. (xiii, 1894).....                                                      | 1062 |
| (P) Solvay. (vii, 1888).....                                                                           | 476  |
| -Kilns, Construction of. (P) Schott. (ii, 1884).....                                                   | 519  |
| -Kilns, Recovering Carbonic Acid Gas from. (P) Walker. (xi, 1892).....                                 | 686  |
| -Light, Jet Apparatus for. (P) Kershaw. (xii, 1893).....                                               | 746  |
| Limit of Decomposition of Sodium Carbonate by Means of. (Lunge and Schmid.) (v, 1886).....             | 240  |
| Manufacture of:                                                                                        |      |
| (P) Blyth. (xiv, 1895).....                                                                            | 659  |
| (P) Kemp. (iii, 1884).....                                                                             | 107  |
| Manuring Experiments with Precipitated Phosphate of. (iv, 1885).....                                   | 169  |
| Means for Removing, from Skins, &c. (P) Hauff. (viii, 1889).....                                       | 124  |
| Mixtures for Production of Artificial Stone, Manufacture of. (P) Weekwarth and Hoeft. (xiv, 1895)..... | 577  |
| Mud, Analysis of Recovered, by Schaffner-Hellwig Process. (ii, 1883).....                              | 208  |
| Mud, &c., Manipulation of. (P) Bolton and Bullough. (viii, 1889).....                                  | 779  |
| Mud, Manufacture of, into Cement. (Rigby.) (vii, 1888).....                                            | 361  |
| Mud, Manufacture of Whiting and Cement from. (P) Rigby. (vii, 1888).....                               | 568  |
| Mud, Obtaining Useful Products from. (P) Hutchinson. (x, 1891).....                                    | 787  |
| Mud Refuse, Use of, for Cement. (P) Rigby. (viii, 1889).....                                           | 462  |
| Mud Residue of Ammonia-Soda Process, Utilisation of. (P) Rigby. (viii, 1889).....                      | 620  |
| Mud, Treatment of Alkaline. (P) Simpson and Parnell. (i, 1882).....                                    | 321  |
| Obtaining Acetic Acid from Pyroligne of. (P) von der Linde. (xiv, 1895).....                           | 573  |
| -Osmose Process of Dubrunfaut Applied. (Puydt.) (ii, 1883).....                                        | 387  |
| Ovens for Burning. (P) Burchardt. (i, 1882).....                                                       | 189  |
| Part Played by, in Germination of Seeds. (Liebenberg.) (ii, 1883).....                                 | 351  |
| Permanganate of, as a Water Steriliser. (Bordas.) (xiv, 1895).....                                     | 767  |
| Phosphate of, and Sodium Sulphate, Preparation of. (P) Brunner and Zanner. (xi, 1892).....             | 816  |
| Phosphate, Apparatus for Enriching. (P) Cajo. (x, 1891).....                                           | 128  |
| Phosphate, Manufacture of Precipitated. (P) Weldon. From Lombard. (iii, 1884).....                     | 259  |
| Phosphate, Obtainment of Concentrated. (P) Simpson. (x, 1891).....                                     | 255  |
| Phosphate of, in Russia. (T.R.) (viii, 1889).....                                                      | 141  |

## Lime—cont.

PAGE

|                                                                                                   |                      |
|---------------------------------------------------------------------------------------------------|----------------------|
| Phosphate of, Obtaining. (P) Brunner and Zanner. (xi, 1892).....                                  | 37                   |
| Phosphate, Separating Substances from. (P) Shillito. From Haenschel and Schroeder. (v, 1886)..... | 666                  |
| Phosphate, Solid Non-deliquescent. (P) Abel. From Barbe. (iii, 1884).....                         | 414                  |
| Phosphate, Treatment of. (P) Simpson. (xi, 1892).....                                             | 238                  |
| Phosphates, Manufacture of Phosphorus, &c. from. (P) Folie-Desjardins. (x, 1891).....             | 642                  |
| Phosphates, Treatment of. (P) Justice. (iv, 1885).....                                            | 355                  |
| Phosphates, Treatment of Basic. (P) Johnson. From Crespel and Martin. (iii, 1884).....            | 173                  |
| Plumbate, Manufacture of Oxygen by Dissociation of. (Le Châtelier.) (xii, 1894).....              | 27                   |
| Precipitates of Aluminium Phosphate and Sulphate of. Manufacture of. (P) Hills. (iv, 1885).....   | 497                  |
| Preparation of, for Agricultural Purposes. (P) Browne. (iv, 1885).....                            | 131                  |
| Preventing Formation of Froth on Treating Ammonium Salts with. (P) (i, 1882).....                 | 232                  |
| Process and Furnace for Burning. (P) Justice. From Dietzsch. (v, 1886).....                       | 328                  |
| Process for Decolorising and Clearing Beet Juice. (P) Fritsche. (iv, 1885).....                   | 541                  |
| Process for Purification of Coal-gas. (Veley.) (iv, 1885).....                                    | 633                  |
| Process, Gas-making by Cooper's. (Wanklyn.) (iii, 1884).....                                      | 12                   |
| Process of Sewage Treatment. (Grimshaw.) (xi, 1892).....                                          | 5, 7                 |
| Purifying Sewage by, with a Salt of Iron. (P) Lockwood. (xii, 1893).....                          | 371                  |
| Raffinose of. (Beythien and Tollens.) (ix, 1890).....                                             | 310                  |
| Rapid Method of Estimating, in Schaffner Liquors. (Chance.) (ii, 1883).....                       | 210                  |
| Refuse, Treatment of, and Apparatus therefor. (P) Hargreaves and Robinson. (ix, 1890).....        | 290                  |
| Removal of Sugar from Molasses by. (Lefranc.) (vii, 1888).....                                    | 334                  |
| Removing, from Hides and Skins. (P) Hauff. (ix, 1890).....                                        | 85; (xiv, 1895), 170 |
| Removing Sulphate of, from Solutions of Starch Sugar. (P) Kunheim and Co. (i, 1882).....          | 30                   |
| Rendering, Weatherproof. (Pischer.) (ii, 1883).....                                               | 178                  |
| Residue, Plaster of Paris from. (P) Kerr. (xiii, 1894).....                                       | 888                  |
| Saccharate. (P) Hutton. (x, 1891).....                                                            | 781                  |
| Salts, German Trade in. (T.R.) (xiii, 1894).....                                                  | 1111                 |
| Separation of, from Crude Phosphates. (P) Lake. From Winkelhofer. (ii, 1883).....                 | 419                  |
| Separation of Strontia from. (Sidersky.) (ii, 1883).....                                          | 354                  |
| Silicate, Action of Charcoal in Sugar Factories on. (Pellet and Gavalowski.) (iv, 1885).....      | 410                  |
| Sludge, Control of, from Defecation of Beet Juice. (Levy.) (xiv, 1895).....                       | 499                  |
| Soaps, Formation of, in Steam Generators. (Vivien.) (xii, 1893).....                              | 346                  |
| Solubility of, in Calcium Chloride Solutions. (Lunge.) (xi, 1892).....                            | 882                  |
| Sucrates of. (Petit.) (xii, 1893).....                                                            | 776                  |
| Sulphate, Apparatus for Obtaining, from Residuals. (P) Wieg and others. (v, 1886).....            | 536                  |

| Oil, Thickening: (P) Haddan. From Schaal. (xii, 1893).....                                          | 529      |
| (P) Robinson. (ix, 1890).....                                                                       | 300      |
| Oil, Treating: (P) Bedford. (xiii, 1894).....                                                       | 406      |
| (P) Ford. (iii, 1884).....                                                                          | 181      |
| (P) Scollay. (xii, 1893).....                                                                       | 772      |
| Lint, Preparing and Rendering Antiseptic. (P) Tichborne and Henston. (x, 1891).....                 | 723      |
| Removal of, from Cotton-Seed. (Dudley.) (xi, 1892).....                                             | 619      |
| Lippmann's Method of Colour Photography. (Lumière.) (xiv, 1895).....                                | 65       |
| Liqueurs, Analysis of: (Mansfeld.) (xiv, 1895).....                                                 | 839      |
| (Schwarz.) (vii, 1888).....                                                                         | 459      |
| Colouring Matters for. (iii, 1884).....                                                             | 517      |
| Determination of Cane Sugar in. (Rathzen.) (vii, 1888).....                                         | 694      |
| Estimation of Fusel Oil in. (Traube.) (v, 1886).....                                                | 546      |
| Liquid, Alimentary. (P) Hooker. (x, 1891).....                                                      | 155      |
| Apparatus for Concentrating. (P) Allott. (iv, 1885).....                                            | 196      |
| Apparatus for Drawing Off. (P) Nalder and others. (xiv, 1895).....                                  | 352      |
| Apparatus for Drawing Off, from Sewage Tanks. (P) Bird. (xi, 1892).....                             | 630      |
| Apparatus for Measuring. (P) MacMahon. (ix, 1890).....                                              | 849      |
| Apparatus for Raising or Forcing. (P) Kestner. (xiii, 1894).....                                    | 241      |
| Apparatus for Registering Volumes of. (P) Bruce. (xiv, 1895).....                                   | 469      |
| For Insecticide Paint. (P) Jeyes. (x, 1891).....                                                    | 150      |
| For Producing Ice. (P) Varley and Gorman. (v, 1886).....                                            | 22       |
| For Renovating Textiles, &c. (P) Moret. (ix, 1890).....                                             | 805      |
| For Softening and Preserving Sawwood. (P) Ensor. (viii, 1889).....                                  | 468      |
| For Treating Negatives in Photography. (P) Beale. (x, 1891).....                                    | 159      |
| For Use as Fertiliser, Insecticide, &c. (P) Elliott. (xiii, 1894).....                              | 652      |
| Putrescent, Treatment of. (P) Sillar and The Native Guano Co., Ltd. (v, 1886).....                  | 614      |
| Refrigerating. (P) Wanner. (xii, 1894).....                                                         | 1181     |
| Removal of Test, from Extraction Apparatus. (Hertkorn.) (viii, 1889).....                           | 920      |
| Residual, from Pickling Iron or Steel, Treatment of. (P) Saunders. (ix, 1890).....                  | 292      |
| Self-Acting Apparatus for Raising. (P) Kestner. (xi, 1892).....                                     | 994      |
| Separators, Centrifugal. (P) Lundstrom and Burrell. (xiii, 1894).....                               | 21       |
| Wastes, Treatment of, and Apparatus therefor. (P) Nelson. (x, 1891).....                            | 626      |
| Liquids, Absorption of Gases by. (P) Muller. (xiv, 1895).....                                       | 15       |
| Aerators for Treating. (P) Andrew. (xi, 1892).....                                                  | 896      |
| Alcoholic, Manufacture of. (P) Takamine. (vii, 1888).....                                           | 397      |
| Alcoholic, Process and Apparatus for Purifying. (P) Boullanger and Schenvert. (x, 1891).....        | 562      |
| Alcoholic, Treatment of. (P) Mills and Barr. (x, 1891).....                                         | 265      |
| Analysing. (P) de Pass. From Gossart. (xi, 1892).....                                               | 712      |
| Analysis of Spirituous. (Mansfeld.) (xiv, 1895).....                                                | 830      |
| And Fats, Purification of. (P) Andre. (xiv, 1895).....                                              | 372      |
| And Gases, Apparatus for Mixing. (P) Priestman. (xiv, 1895).....                                    | 470      |
| And Gases, Apparatus for Treating. (P) Theisen. (xii, 1893).....                                    | 742      |
| And Gases, Treating Fibres with. (P) Gessler. (xi, 1892).....                                       | 680      |
| And Solids, Apparatus for Separating: (P) Danchel. (ix, 1890).....                                  | 377      |
| (Squire.) (ix, 1890).....                                                                           | 353      |
| And Solids, Mixing and Dissolving. (P) Hamilton. (xii, 1893).....                                   | 741      |
| And Solutions, Manufacture of Materials for Purifying and Decolorising. (P) Candy. (vii, 1888)..... | 41       |

| Apparatus for Absorption of Gases by. (P) Edwards. From Lunge and Rohrmann. (vi, 1887).....                          | 397      |
| Apparatus for Absorption of Gases or Vapours by. (P) Edwards. From Rohrmann and Miller. (v, 1886).....               | 423      |
| Apparatus for Acrating. (P) Stone. (xiii, 1894).....                                                                 | 655      |
| Apparatus for Ascertaining the Specific Gravity of. (P) Hicks. (viii, 1889).....                                     | 310      |
| Apparatus for Boiling and Evaporating Sugar and other. (P) Fletcher and Mathew. (viii, 1889).....                    | 571      |
| Apparatus for Burning. (P) Mills. From Seigle-Goujon. (x, 1891).....                                                 | 244      |
| Apparatus for Carbonating. (P) Riley. (iv, 1885).....                                                                | 535      |
| Apparatus for Charging, with Carbonic Acid Gas: (P) Foster. (vi, 1887).....                                          | 547      |
| (P) Levinstein. (v, 1886).....                                                                                       | 36       |
| Apparatus for Charging, with Gases. (P) Minto. (xi, 1892).....                                                       | 596      |
| Apparatus for Clarifying: (P) Dervaux. (xi, 1892).....                                                               | 451      |
| (P) Thorp. (x, 1891).....                                                                                            | 990      |
| Apparatus for Clearing and Purifying: (P) Lipscombe. (viii, 1889).....                                               | 563      |
| (P) Peschges. (xii, 1893).....                                                                                       | 1014     |
| Apparatus for Concentrating: (P) Carulla. (xii, 1893).....                                                           | 811      |
| (P) Deacon. From Maxwell. (xi, 1892).....                                                                            | 830      |
| (P) Foulis. (iv, 1885).....                                                                                          | 242      |
| (P) Guttman. (xii, 1893).....                                                                                        | 1014     |
| (P) Roeckner. (ix, 1890).....                                                                                        | 921      |
| (P) Thompson. From Wirth. (x, 1891).....                                                                             | 750, 750 |
| Apparatus for Condensation of Gases by. (Lunge and Rohrmann.) (vi, 1887).....                                        | 538      |
| Apparatus for Condensing or Heating. (P) Klein. (ix, 1890).....                                                      | 849      |
| Apparatus for Containing Volatile Inflammable. (P) Dilletot. (xi, 1892).....                                         | 806      |
| Apparatus for Continuous Evaporation of: (P) Egells. (iii, 1884).....                                                | 469      |
| (P) Harlock. (xiii, 1894).....                                                                                       | 23       |
| Apparatus for Controlling Flow of. (P) Wendt. (xii, 1893).....                                                       | 134      |
| Apparatus for Conveying. (P) Rylands and Horner. (x, 1891).....                                                      | 36       |
| Apparatus for Cooling: (P) Boulton. From Fischer. (vii, 1888).....                                                   | 554      |
| (P) Elworthy. (xi, 1892).....                                                                                        | 260      |
| (P) Popper. (ix, 1890).....                                                                                          | 168      |
| (P) Price. (xiii, 1894).....                                                                                         | 1018     |
| (P) Webb. (xiii, 1894).....                                                                                          | 378      |
| (P) Webb and Siddle. (xii, 1893).....                                                                                | 615      |
| Apparatus for Cooling and Evaporating. (P) Worssam. (xiii, 1894).....                                                | 269      |
| Apparatus for Cooling, by Air. (ix, 1890).....                                                                       | 1024     |
| Apparatus for Cooling, Heating, and Drying. (P) Shaw and Rushton. (xi, 1892).....                                    | 230      |
| Apparatus for Cooling or Heating. (P) Reichling. (viii, 1889).....                                                   | 869      |
| Apparatus for Cooling or Warming. (P) Baker. (xiii, 1894).....                                                       | 713      |
| Apparatus for Decomposition of. (P) Baily and Guthrie. (xiii, 1894).....                                             | 818      |
| Apparatus for Determining Sp. Gr. of. (Raikow and Prodonaw.) (vi, 1887).....                                         | 147      |
| Apparatus for Disinfecting, by Electrolysis. (P) Hermite and others. (vii, 1888).....                                | 764      |
| Apparatus for Distillation and Purification of Ammoniacal. (P) Chevalet. (vi, 1887).....                             | 397      |
| Apparatus for Distilling: (P) Cotton and Garrett. (xi, 1892).....                                                    | 148      |
| (P) Fouché. (xiii, 1894).....                                                                                        | 714      |
| (P) Lake. From Mallet and Pagniez. (iv, 1885).....                                                                   | 195      |
| (P) Lawrence and Garton. (ix, 1890).....                                                                             | 43       |
| (P) Morris and Edney. (xiii, 1894).....                                                                              | 504      |
| Apparatus for Distilling, Separating, &c., Mixed. (P) Barbier. (xii, 1893).....                                      | 602      |
| Apparatus for Distributing, over Surfaces. (P) Claus. (v, 1886).....                                                 | 94       |
| Apparatus for Drawing off and Transporting Sterilised. (P) Imray. From Calbern, Pitz, and Consorten. (xi, 1892)..... | 173      |
| Apparatus for Drawing off Viscous. (P) Sack. (ix, 1890).....                                                         | 849      |
| Apparatus for Drying. (P) Beyer. (xiv, 1895).....                                                                    | 13       |
| Apparatus for Electrolytic Treatment of. (P) Browne. (xii, 1893).....                                                | 1043     |
| Apparatus for Electrolytic Treatment of Sewage and other Impure. (P) Webster. (vii, 1888).....                       | 764      |
| Apparatus for Evaporating: (P) Fletcher. (vii, 1888).....                                                            | 686      |
| (P) Forstreuter. (xii, 1893).....                                                                                    | 662      |
| (P) Foster. (x, 1891).....                                                                                           | 683      |
| (P) Garton and Lawrence. (ix, 1890).....                                                                             | 727      |
| (P) Gant and Clapp. (viii, 1889).....                                                                                | 868      |
| (P) Harburn. (x, 1891).....                                                                                          | 684      |
| (Hempel.) (ix, 1890).....                                                                                            | 165      |
| (P) Laberie. (vi, 1887).....                                                                                         | 554      |
| (P) McNeil. (xiv, 1895).....                                                                                         | 172      |
| (P) McPhail and Simpson. (xiv, 1895).....                                                                            | 351      |
| (P) Mirrlees and Ballingall. (xi, 1892), 895; (xii, 1893).....                                                       | 510      |
| (P) Morison. (ix, 1890).....                                                                                         | 593      |
| (P) Morrell and Fromherz. (xii, 1894).....                                                                           | 577      |

## Liquids—cont.

|--------------------------------------------------------------------------------------------------------|------|
| Apparatus for Evaporating—cont. (P) Penke. (xiii, 1894).....                                           | 39   |
| (P) Robertson and Ballingall. (x, 1891).....                                                           | 821  |
| (P) Slater. (viii, 1889).....                                                                          | 970  |
| (P) Theisen. (ix, 1890).....                                                                           | 922  |
| (P) Wahl. (i, 1882).....                                                                               | 219  |
| (P) Watson and Robertson. (viii, 1889), 530, 531; (x, 1891).....                                       | 528  |
| (P) Wild. (x, 1891).....                                                                               | 127  |
| (P) Wilson. (x, 1891).....                                                                             | 822  |
| Apparatus for Evaporating and Cooling. (P) Scott. (xiii, 1894).....                                    | 23   |
| Apparatus for Evaporating, by Steam. (P) Latham and Guyot. (xiii, 1894).....                           | 713  |
| Apparatus for Evaporating Saccharine: (P) Herbst. (i, 1882).....                                       | 415  |
| (P) Stewart. (xi, 1892).....                                                                           | 1018 |
| Apparatus for Examining, by Transmitted Light. (P) Lovibond. (vii, 1888).....                          | 234  |
| Apparatus for Expelling, from Solids. (P) Price. (ix, 1890).....                                       | 593  |
| Apparatus for Expressing. (P) Lake. From La Societe Anonyme de Compressur Jourdan. (x, 1891).....      | 1017 |
| Apparatus for Extracting: (Hohle.) (xi, 1892).....                                                     | 959  |
| (Karbatow.) (xiii, 1894).....                                                                          | 978  |
| Apparatus for Filtering: (P) Birch. (xi, 1891), 61; (xi, 1892).....                                    | 364  |
| (P) Capillary. (ix, 1891).....                                                                         | 239  |
| (P) Drummond. (xiii, 1894).....                                                                        | 377  |
| (P) Mackay. (x, 1891).....                                                                             | 528  |
| (P) Santurio. (xii, 1893).....                                                                         | 660  |
| (P) Thompson. From Stehlik. (x, 1891).....                                                             | 448  |
| (P) Thompson. From Williamson. (xi, 1892).....                                                         | 509  |
| (P) Vassel. (ix, 1890).....                                                                            | 273  |
| (P) Vickess. (vi, 1887).....                                                                           | 537  |
| Apparatus for Filtering Alcoholic and Gaseous. (P) Gehrke. (xi, 1892).....                             | 833  |
| Apparatus for Filtering, under Pressure. (P) Krix. (xii, 1893).....                                    | 1015 |
| Apparatus for Filtration and Purification of. (P) Boulton. From de Mol and Wilbaux. (xiv, 1895).....   | 168  |
| Apparatus for Forcing and Drawing. (P) Spencer and Lord. (viii, 1889).....                             | 380  |
| Apparatus for Freezing. (P) Bowley. (xi, 1892).....                                                    | 992  |
| Apparatus for Gauging Depth of. (P) Horley and Sedgley. (ix, 1890).....                                | 168  |
| Apparatus for Generating Gas or Vapour from. (P) Dheyne, De Nydpruck, and De la Hault. (ix, 1890)..... | 796  |
| Apparatus for Generating Gases from. (Thiele.) (viii, 1889).....                                       | 1010 |
| Apparatus for Heating: (P) Browne. From Fromm and others. (v, 1886).....                               | 244  |
| (P) Fudicker. (xiii, 1894).....                                                                        | 1181 |
| (P) Kirkaldy. (x, 1891).....                                                                           | 990  |
| (P) Mills. From Seigle-Goujon. (x, 1891).....                                                          | 244  |
| Apparatus for Heating and Concentrating. (P) Kleemann. (xiii, 1894).....                               | 1018 |
| Apparatus for Heating and Cooling: (P) Lawrence and others. (xiv, 1895).....                           | 854  |
| (P) Richmond. (xii, 1893).....                                                                         | 742  |
| Apparatus for Heating, by Electricity. (P) Crompton and Dowling. (xiii, 1894).....                     | 256  |
| Apparatus for Heating or Evaporating: (P) Herz. (xii, 1893).....                                       | 436  |
| (P) Morison. (xiii, 1894).....                                                                         | 622  |
| Apparatus for Heating or Vaporising. (P) Henneberg. (xiii, 1894).....                                  | 713  |
| Apparatus for Heating under Pressure. (P) Squire. (xiv, 1895).....                                     | 13   |
| Apparatus for Imparting Predetermined Temperature to. (P) Herson. (xiv, 1895).....                     | 951  |
| Apparatus for Improving Alcoholic. (P) Martin. (xii, 1893).....                                        | 941  |
| Apparatus for Injecting Gases into. (P) Brim's Oxygen Co. and Goble. (viii, 1889).....                 | 759  |
| Apparatus for Maturing Alcoholic. (P) Martin. (xii, 1893).....                                         | 54   |
| Apparatus for Measurement of the Refractive Index of Light in. (P) Ferry. (xii, 1893).....             | 465  |
| Apparatus for Mixing: (P) Boulton, Haywood, and Gabbett. (ix, 1890).....                               | 44   |
| (P) Bradbury and Colbrook. (x, 1891).....                                                              | 990  |
| (P) Julien. (xiii, 1894).....                                                                          | 787  |
| Apparatus for Mixing, with Carbonic Acid. (P) Brunler and Rommenholler. (vi, 1887).....                | 599  |
| Apparatus for Mixing, with Liquids and Solids. (P) Johnson and Hutchinson. (xi, 1892).....             | 596  |
| Apparatus for Oxidising Oleaginous. (P) Martin. (xii, 1893).....                                       | 941  |
| Apparatus for Passage of, through Filter Beds. (P) Bohm. (viii, 1889).....                             | 271  |
| Apparatus for Pasteurisation of. (P) Kuhn. (viii, 1889).....                                           | 719  |
| Apparatus for Producing and Containing Aerated. (P) Hatton. (xii, 1893).....                           | 704  |
| Apparatus for Purification of: (P) Brownlow. (xi, 1892).....                                           | 769  |
| (P) Ebeling. (xiv, 1895).....                                                                          | 1056 |
| (P) Johnson. From La Societe G. Boone et J. Norv. (vi, 1887).....                                      | 537  |
| (P) Macnab. (v, 1886).....                                                                             | 368  |
| (P) Oliphant. (viii, 1889).....                                                                        | 58   |
| (P) Wagner and Marr. (xiii, 1894).....                                                                 | 751  |

| Apparatus for Separating Solid Impurities from. (P) Howatson. (iv, 1885)                           | 736  |
| Apparatus for Separating Solids from:                                                              |      |
| (P) Maenab and Donald. (vi, 1887)                                                                  | 814  |
| (P) Sawrey and Collett. (vii, 1888)                                                                | 831  |
| (P) Seaton. (viii, 1889)                                                                           | 270  |
| (P) Smith. (v, 1886)                                                                               | 387  |
| Apparatus for Separating Vapours from. (P) Murrie. (v, 1886)                                       | 468  |
| Apparatus for Separating Volatile. (P) Pontallie. (xi, 1892)                                       | 230  |
| Apparatus for Separation of, from Gases. (P) Jones. (x, 1891)                                      | 240  |
| Apparatus for Softening, &c. (P) Fitzmaurice. (vii, 1893)                                          | 55   |
| Apparatus for Sterilising:                                                                         |      |
| (P) Murray. From Calberia, Fitz, and Consorten. (xi, 1892)                                         | 258  |
| (P) Laurent. (xiv, 1895)                                                                           | 351  |
| (P) Ortmann and Herbst. (xiii, 1891)                                                               | 137  |
| (P) Thiel. (xii, 1893)                                                                             | 539  |
| (P) Trundle. (xii, 1893)                                                                           | 942  |
| Apparatus for Straining. (P) Squire. (xiv, 1895)                                                   | 791  |
| Apparatus for Subjecting to Centrifugal Action. (P) Murray. From Berzli. (xi, 1892)                | 337  |
| Apparatus for Supplying Carbonic Acid Gas to. (P) Hunter. (viii, 1889)                             | 719  |
| Apparatus for Supplying to Series of Electric Batteries. (P) Jeanty. (xi, 1892)                    | 617  |
| Apparatus for Testing and Sampling. (P) Mackie. (iv, 1885)                                         | 511  |
| Apparatus for Testing Relative Volumes of Mixed. (P) Laidlaw. (x, 1891)                            | 822  |
| Apparatus for Treating:                                                                            |      |
| (P) Fryer. (x, 1891)                                                                               | 239  |
| (P) Robertson and Murreles. (ix, 1890)                                                             | 1115 |
| (P) Wright. (ix, 1890)                                                                             | 1115 |
| Apparatus for Treating by Gases:                                                                   |      |
| (P) Bardekin. (xii, 1893)                                                                          | 812  |
| (Hunter.) (xii, 1893)                                                                              | 227  |
| (P) McVilly. (xii, 1893)                                                                           | 1013 |
| Apparatus for Treating Fibres by. (P) Miller. (xiii, 1891)                                         | 884  |
| Apparatus for Treating Gases by. (P) Edwards. From Lunze and Rohrmann. (ix, 1890)                  | 510  |
| Apparatus for Treating Granular Substances with. (P) Abel. From Langen and Hundhausen. (vii, 1888) | 835  |
| Apparatus for Treating Textiles with. (P) Mather. (viii, 1889)                                     | 460  |
| Apparatus for Vaporisation of:                                                                     |      |
| (P) Allison. From The National Salt and Chemical Co. (x, 1891)                                     | 451  |
| (P) Spencer. (xi, 1892)                                                                            | 174  |
| Apparatus for Warming or Muffling. (P) Neale. (ix, 1890)                                           | 757  |
| Apparatus for Weighing out. (Lungwitz.) (xiii, 1891)                                               | 838  |
| Apparatus to drive off Volatile Constituents of. (P) Walker. (vii, 1888)                           | 834  |
| Boiling by Electric Current. (P) Schiff. (xii, 1893)                                               | 1042 |
| Burette Float for Opaque. (Rey.) (x, 1891)                                                         | 949  |
| Carbonating Method for. (P) Hadden. From The Ferry Manufacturing Co. (xiv, 1895)                   | 135  |
| Carbonic Acid for Filtration of. (d'Arsonval.) (x, 1891)                                           | 717  |
| Centrifugal Apparatus for Separating:                                                              |      |
| (P) Lake. From Anderson. (vii, 1888)                                                               | 834  |
| (P) Marks. From Societe E. Wauquier et Fils. (xiv, 1895)                                           | 641  |
| Charcoal for Purifying, Manufacture of. (P) Burns. (vi, 1887)                                      | 515  |
| Charging and Combining with Carbonic Acid Gas. (P) Lake. From Adam. (xiv, 1895)                    | 291  |
| Charging and Sealing Vessels containing. (P) Maenab and Dickson. (xiii, 1891)                      | 929  |
| Charging with Carbonic Acid Gas. (P) Landerer. (xii, 1893)                                         | 538  |
| Charging with Gas. (P) Lake. From Catlin, Sweetland, and Cox. (ix, 1890)                           | 44   |
| Charging with Gases. (P) Schneible. (xiv, 1895)                                                    | 765  |
| Clarification and Preservation of. (P) Evans. (xiii, 1891)                                         | 827  |
| Clarifying and Filtering. (P) Hulsner and Rohrig. (xiv, 1895)                                      | 134  |
| Clarifying Method of. (P) Roekner. (i, 1882)                                                       | 465  |
| Clarifying of Fermented. (P) Jericka and Ezsimann. (viii, 1889)                                    | 472  |
| Closing Devices for Vessels containing Inflammable. (P) Daniel. (x, 1891)                          | 243  |

|                                                                                        | PAGE |

| Composition for Absorbing. (P) Burkel and Osterwald. (xi, 1892)                        | 176  |
| Composition for Preserving. (P) Pickles. (xiii, 1894)                                  | 1083 |
| Concentrating Method and Apparatus for. (P) Leviustein. (xi, 1893)                     | 156  |
| Concentration of. (P) Bolton and Wyle. (viii, 1889)                                    | 884  |
| Condensing Gases by, and Apparatus therefor. (Lunge.) (vi, 1887)                       | 584  |
| Containing Carbonic Acid, Vessels for Transporting. (P) Nitykowski. (i, 1882)          | 464  |
| Containing Suspended Matter, Corrections in Titrating. (xii, 1891)                     | 762  |
| Continuous Rectif. of Volatile. (P) Barbet. (i, 1882)                                  | 421  |
| Corrections in Titrating. (Lenoble.) (xii, 1894)                                       | 762  |
| Decolorising Powder for Dark-coloured. (Gawalowsky.) (viii, 1889)                      | 538  |
| Decomposition of, by contact with Powdered Silica. (Gore.) (xiii, 1894)                | 428  |
| Defecators for Saccharine and Other. (P) Harvey. From Cornish. (viii, 1889)            | 298  |
| Dehydration of Volatile. (P) Mather. (xii, 1893)                                       | 762  |
| Desulphurising. (P) Lux. (i, 1882)                                                     | 335  |
| Deter. of Chloral or Chloroform in. (Schwarz.) (vii, 1888)                             | 773  |
| Determ. of Density of Spirituous. (Blarez.) (x, 1891)                                  | 669  |
| Disinfection of Impure. (P) Hermitte and others. (vii, 1888)                           | 764  |
| Dissipating Froth of Boiling. (P) Heckmann. (i, 1882)                                  | 331  |
| Distillation of:                                                                       |      |
| (P) Coyle, Andrews, and others. (vii, 1888)                                            | 631  |
| (P) Pielstickler. (x, 1891)                                                            | 314  |
| Distillation of Alcoholic:                                                             |      |
| (P) Béchoux. (v, 1886)                                                                 | 613  |
| (P) Leslie. (viii, 1889)                                                               | 812  |
| Distill. of Viscous. (P) Dewar and Redwood. (x, 1891)                                  | 455  |
| Distilling Method and Apparatus for. (P) Hovgaard. (viii, 1889)                        | 760  |
| Distilling, Purifying, and Concentrating. (P) Mallet and Pagniez. (viii, 1889)         | 462  |
| Drums for Carrying, Manufacture of. (P) Cox. (x, 1891)                                 | 528  |
| Electrical Treatment of. (P) Wagner and Marr. (xiv, 1895)                              | 280  |
| Employment of Critical Temperature of, to test Purity of. (Pictet.) (xiv, 1895)        | 505  |
| Evaporating. (P) Mathieu. (ii, 1883)                                                   | 126  |
| Evaporating and Concentrating:                                                         |      |
| (P) Cerar. (xiv, 1895)                                                                 | 762  |
| (P) Newton. From Nobel. (iv, 1885)                                                     | 211  |
| Evaporating Method and Apparatus for. (P) Cooper. (xii, 1893)                          | 29   |
| Evaporating or Condensing. (P) Branson and Nield. (ix, 1890)                           | 593  |
| Fermented, Manufacture of, and Apparatus therefor. (P) Lake. From Goller. (x, 1891)    | 379  |
| Fermenting, Process for:                                                               |      |
| (P) Lubbock. (ii, 1883)                                                                | 357  |
| (P) Salomon. (x, 1891)                                                                 | 378  |
| Filling Sterilised, into Vessels. (P) Fitzpatrick. From Nethass and others. (xi, 1892) | 250  |
| Filter for:                                                                            |      |
| (P) Koelner. (x, 1891)                                                                 | 472  |
| (P) Seitz. (xiv, 1895)                                                                 | 259  |
| Filtering:                                                                             |      |
| (P) Bell. (v, 1886)                                                                    | 105  |
| (P) Chamberland. (xiv, 1895)                                                           | 767  |
| Filtering Media for. (P) Candy. (v, 1886)                                              | 675  |
| Filtering Method and Apparatus for:                                                    |      |
| (P) Ferand. (xii, 1893)                                                                | 812  |
| (P) Santurio. (xii, 1893)                                                              | 511  |
| Filtration and Purification of. (P) Lorrain. (v, 1886)                                 | 105  |
| Filtration of, Study of the. (Deherain.) (xii, 1893)                                   | 739  |
| Filtration of Viscid, by Korting's Steam-jet Aspirator. (vi, 1887)                     | 537  |
| For Dyeing, Printing, &c., Black. (P) Groth. From Collin and Errani. (vii, 1888)       | 434  |
| For Flashing Purposes, Apparatus for Mixing. (P) Adler. (xi, 1892)                     | 668  |
| Freezing or Refrigerating, and Apparatus therefor. (P) Csete. (v, 1886)                | 158  |
| From Pickling Metals, Utilising. (P) Vlasto. (vi, 1887)                                | 823  |
| Funnels for:                                                                           |      |
| (P) Payne. (ix, 1890)                                                                  | 167  |
| (P) Richardson. (xi, 1892)                                                             | 596  |
| Funnels for Filtering. (P) Kroecker. (xii, 1893)                                       | 915  |
| Heating Method and Apparatus for. (P) Watkinson. (xi, 1892)                            | 317  |
| Hydrostatic App. for Treating. (P) Spence. (xii, 1894)                                 | 713  |
| In Kees, App. for Observing Quality of. (P) (i, 1882)                                  | 487  |
| Inexplosible Can for Inflammable. (P) Shillito. (xi, 1892)                             | 895  |
| Instruments for Determining Specific Gravity of. (P) Fletcher. (xi, 1892)              | 635  |
| Kestner's Compressed Air Elevator for. (Biver.) (xiv, 1895)                            | 34   |
| Law of Inflammable. (T.R.) (x, 1891)                                                   | 395  |
| Manure from Waste, Manufacture of. (P) Hartland. (vii, 1888)                           | 131  |
| Material for Filtering and Decolorising. (P) Thompson. (vii, 1888)                     | 580  |

| Maturing Alcoholic. (P) Crawford. (vi, 1887)                                                                               | 221            |
| Means for Filtering. (P) Stroh. (xiv, 1895)                                                                                | 951            |
| Means for Oxidising, by Electricity. (P) Webster. (vii, 1889)                                                              | 441            |
| Means for Purification of. (P) Buhning. (vii, 1888)                                                                        | 835            |
| Measure and Funnel for. (P) Brown. (ix, 1890)                                                                              | 43             |
| Measures or Gauges for. (P) Hicks. (ix, 1886)                                                                              | 652            |
| Meter for Estimating Volume and Density of. (P) Bedout. (xii, 1893)                                                        | 510            |
| Methods of Treating, with Gases. (Hurter.) (vi, 1887)                                                                      | 707            |
| Methods of Treating, with Gases, Compared. (Hurter.) (iv, 1885)                                                            | 659            |
| Mixture for Purifying Foul. (P) Whalley. (xiii, 1894)                                                                      | 656            |
| Of Different Densities, Separation of. (P) Samuelson. (ix, 1890)                                                           | 167            |
| Of Low Boiling Temperature, Generation of Motive Power by. (P) Gamgee. (i, 1882)                                           | 438            |
| Or Semi-Liquids, Apparatus for Rapidly Cooling. (P) Spong. (xii, 1893)                                                     | 615            |
| Or Solids, Machine for Mixing. (P) Smith. (viii, 1889)                                                                     | 379            |
| Oxidation of Matter in. (P) Lorrain. (vi, 1887)                                                                            | 377            |
|                                                                                                                            | (ix, 1890), 97 |
| Porous Surfaces for Absorption of. (P) Glew. (viii, 1889)                                                                  | 338            |
| Precipitation of Matter in. (P) Lorrain. (v, 1886)                                                                         | 388            |
| Preserving?                                                                                                                |                |
| (P) Casse. (xiv, 1895)                                                                                                     | 592            |
| (P) Thwaite. (v, 1886)                                                                                                     | 671            |
| Presses for Expression of. (P) Mitchell. (xii, 1893)                                                                       | 772            |
| Prevention of Bumping in Boiling. (Gernhardt.) (xiii, 1894)                                                                | 838            |
| Propagation of the Explosive Wave in. (Berthelot.) (x, 1891)                                                               | 384            |
| Pumps for. (P) Vielweg. (x, 1891)                                                                                          | 908            |
| Purification and Filtration of. (P) Smith and Wild. (v, 1886)                                                              | 105            |
| Purification of:                                                                                                           |                |
| (P) Beloe. (viii, 1889)                                                                                                    | 97             |
| (P) Burns. (vi, 1887)                                                                                                      | 833            |
| (P) Lawrence. (xiv, 1895)                                                                                                  | 982            |
| (P) Meldrum. (xiii, 1894)                                                                                                  | 413            |
| (P) Schott. From Lortzing. (viii, 1889)                                                                                    | 473            |
| (P) Watson. (xi, 1892)                                                                                                     | 364            |
| Purification of, Magnetically and by Electrolysis. (P) Harris. (xiv, 1895)                                                 | 371            |
| Purification of Spirituous and other. (P) Boulton. From Hume. (xii, 1893)                                                  | 369            |
| Purification of Waste:                                                                                                     |                |
| (P) Adeney and Parry. (xiii, 1894)                                                                                         | 831            |
| (P) Davis and Aitken. (vii, 1888)                                                                                          | 338            |
| Purifying Alcoholic, by Ozone. (P) Mewburn. From Teillard. (vi, 1887)                                                      | 531            |
| Purifying, and App. therefor. (P) Mylius. (x, 1891)                                                                        | 1021           |
| Purifying and Clarifying Tannine. (P) Fontenilles and Bagnenier Desormeaux. (xii, 1893)                                    | 1045           |
| Raising, and Apparatus therefor. (P) Mactear. From Kolb. (vi, 1887)                                                        | 39             |
| Receiver for Volatile. (P) Beach. (viii, 1889)                                                                             | 1009           |
| Regenerative Burner for Evaporating. (Hempel.) (vii, 1888)                                                                 | 379            |
| Regulating Discharge of, from Tanks. (P) Strype. (xiii, 1894)                                                              | 1180           |
| Regulation of Supply of, to Refrigerating Apparatus. (P) Lightfoot. From Gesellschaft fur Linde's Eismaschinen. (xi, 1892) | 668            |
| River Pollution by Trade. (Hartland.) (vi, 1887)                                                                           | 358            |
| Sampling of Viscid. (Watts.) (v, 1886)                                                                                     | 211            |
| Separating Micro-Organisms and Germs from. (P) Shillito. From Moller. (v, 1886)                                            | 39             |
| Separating Solids from:                                                                                                    |                |
| (P) Johnson. From Boinholdt and Glatz. (xii, 1893)                                                                         | 435            |
| (P) Squire. (ix, 1890)                                                                                                     | 273            |
| Separating Solids from, Method and Apparatus for. (P) Huels. (viii, 1889)                                                  | 694            |
| Separation of Asparagin from. (Leplay.) (ii, 1883)                                                                         | 44             |
| Separation of, from Solids:                                                                                                |                |
| (P) Huels. (ix, 1890)                                                                                                      | 592            |
| (P) Raleigh. (xiv, 1895)                                                                                                   | 135            |
| Separation of, from Waste Products. (P) Bolton and Wyld. (ii, 1883)                                                        | 380            |
| Separation of Mixed, Systematic. (P) Comp. Ind. des Procédes Roual Pictet. (i, 1882)                                       | 419            |
| Softening and Purification of. (P) Maignen. (vi, 1887)                                                                     | 222            |
| Spraying Devices for Cooling. (P) Hanford. (xi, 1892)                                                                      | 833            |
| Stability and Instability of Viscous. (Basset.) (xii, 1893)                                                                | 552            |
| Steam Pan for Boiling. (P) Fletcher. (xiv, 1895)                                                                           | 736            |
| Sterilisation of Alimentary. (Kuhn.) (xiii, 1894)                                                                          | 1133           |
| Sterilising. (P) Hartz and Deisenhofer. (xii, 1893)                                                                        | 1051           |
| Sterilising, and Apparatus therefor:                                                                                       |                |
| (P) Mylius. (x, 1891)                                                                                                      | 1021           |
| (P) Popp and Becker. (xii, 1893)                                                                                           | 943            |
| (P) Rouart. (x, 1891)                                                                                                      | 846            |
| Sterilising, Process and Apparatus for. (P) Popp and Becker. (xii, 1893)                                                   | 704            |
| Storing Volatile. (P) Stewart and Charlton. (vii, 1888)                                                                    | 495, 495       |
| Strainers for. (P) McEwen. (x, 1891)                                                                                       | 240            |
| Tanks for Storage of Volatile. (P) Timmis. (xiii, 1894)                                                                    | 788            |

## Liquids—cont.

| PAGE                                                                                  |          |
|---------------------------------------------------------------------------------------|----------|
| Titration of Alkaline, containing Chlorine. (Ullmann.) (xii, 1893)                    | 867      |
| Transport of Corrosive. (ix, 1890)                                                    | 272      |
| (T.R.) (ix, 1890)                                                                     | 567      |
| Treating Ammoniacal. (Grabin.) (vii, 1888)                                            | 557      |
| Treating Substances with Purifying. (P) Langer. (ix, 1886)                            | 233      |
| Treating, with Air or Gases. (P) Massey-Mainwaring and Edmunds. (v, 1886)             | 105      |
| Treatment of. (P) Wilson and French. (vii, 1889)                                      | 112      |
| Treatment of Contaminated. (P) Scott-Moncreiff. (vi, 1892)                            | 705      |
| Treatment of Corrosive or Poisonous. (P) (McDonnell.) (xii, 1894)                     | 156      |
| Treatment of Foul. (P) Hallett. (vi, 1887)                                            | 672      |
| Treatment of, with Gases. (P) Meldrum. (xiv, 1895)                                    | 950      |
| Used in Photography, Apparatus for Keeping in Motion. (P) Hunter. (x, 1891)           | 1028     |
| Vacuum Apparatus for Evaporation or Refrigeration of. (P) Hambrecht. (iv, 1885)       | 530      |
| Valves for. (P) Cripps. (xiii, 1894)                                                  | 508      |
| Vaporisation of. (P) Boulton. From Penchen and Clarke. (xiii, 1894)                   | 380      |
| Vessels for Containing Volatile. (P) Mallet. (xiv, 1895)                              | 506      |
| Vessels for Evaporating. (P) Fletcher. (xiv, 1895)                                    | 736      |
| See also under Fluids and Solutions.                                                  |          |
| "Liquor Ammoniac," Testing of. Hertkorn. (vi, 1892)                                   | 457      |
| Liquor, Apparatus for Decolourising Saccharine. (P) Lake. From Matheson. (v, 1886)    | 104      |
| App. for Incinerating Black. (P) Goodall. (x, 1891)                                   | 267      |
| Apparatus for Regulating Spent, from Distillatory Apparatus. (P) Schwab. (x, 1891)    | 626      |
| Apparatus for Supplying Carbonic Acid Gas to. (P) Stephenson. (x, 1891)               | 265      |
| App. for Treating Ammoniacal. (P) Green. (viii, 1889)                                 | 193      |
| Apparatus for Treating and Bottling Fermented Malt. (P) Kersenbrock. (xii, 1893)      | 283      |
| Bleaching and Disinfecting, Manufacture of. (P) Hermite. (vii, 1888)                  | 321      |
| Boiled off, from the Stripping of Raw-Silk. (Silbermann.) (xiv, 1895)                 | 270      |
| Cock for Charging Air and, Combined into Stills, &c. (P) Harvey. (vi, 1887)           | 649      |
| Defecation and Filtration of Dilutions. (Mittelman.) (xiii, 1894)                     | 265      |
| Malt, Manuf. of. (P) Kirschbaum and others. (xii, 1893)                               | 283      |
| Of Chlorine Stills, Estimation of Acid in Residual. (Hart.) (i, 1882)                 | 308      |
| Supply of, to Ammonia Stills. (P) Meldrum. (xii, 1893)                                | 155      |
| Treatment of Waste Acid, from Starch Factories. (Schütz.) (v, 1886)                   | 612      |
| Liquors, Acid, Estimation of Tannins in. (Bartel.) (x, 1891)                          | 863      |
| Acid Fermentation in Tanning. (Haclem.) (xii, 1894)                                   | 650      |
| Acid, Treatment of Waste. (P) Turner. (ix, 1890)                                      | 950      |
| Acidity of Malt. (Jones.) (ix, 1890)                                                  | 313      |
| Addition of Kola to Potable. (P) Simpson and Cox. (x, 1891)                           | 651      |
| Aerating. (P) Chittenden. (v, 1886)                                                   | 674      |

| Maize. (Bauml.) (iii, 1884).....                                                         | 528  |
| Making. (P) Weschler. (ii, 1883).....                                                    | 357  |
| Manufacture of, and Apparatus therefor: (P) Johnson. From Saladin. (xii, 1893).....      | 458  |
| (P) Lake. From Free. (vi, 1887).....                                                     | 145  |
| Manufacture of Bread with Extract of. (P) Paterson. (xii, 1893).....                     | 284  |
| Manufacture of Colour. (P) Thomson. From Schmied. (xi, 1892).....                        | 833  |
| -Mashing and Extracting Apparatus. (P) Clemenson. (xiv, 1895).....                       | 879  |
| -Mashing Apparatus. (P) Money. (xi, 1892).....                                           | 833  |
| Method and Apparatus for Preparation of. (P) Seney. (iv, 1885).....                      | 238  |
| Method of Mashing. (P) Seitz. (i, 1882).....                                             | 158  |
| Nitrogen Compounds in. (Bumser and Fries.) (iv, 1885).....                               | 543  |
| Nitrogenous Constituents of. (Sykes.) (x, 1891).....                                     | 718  |
| Nitrogenous Substances in. (Lüntner.) (iii, 1884).....                                   | 528  |
| Nutrient and Medicinal Substance from. (P) Marshall. (vi, 1887).....                     | 145  |
| Oxalic Acid Contained in. (Siewert.) (iii, 1884).....                                    | 184  |
| -Powder, Production of Dietary. (P) Leerbeck and Hohn. (vi, 1887).....                   | 557  |
| Preparation of: (P) Boult. From The Société Générale de Maltose. (x, 1891).....          | 561  |
| (P) Genge. (xiii, 1894).....                                                             | 412  |
| (P) Johnson. From Golov. (i, 1882).....                                                  | 75   |
| (P) Reininghaus. (ix, 1890).....                                                         | 463  |
| Preparation of Materials for. (P) Abel. From Kiderlen and others. (viii, 1889).....      | 130  |
| Preparation of Wort from. (P) Rach. (x, 1891).....                                       | 910  |
| Production of: (P) Haddan. From Hackman. (iv, 1885).....                                 | 133  |
| (P) Hof. From Rubsam. (ix, 1890).....                                                    | 758  |
| Production of Colour. (P) Hof. From Rubsam. (xi, 1892).....                              | 628  |
| Ready-formed Sugars in, Estim. of. (Jais.) (xiii, 1894).....                             | 53   |
| Ready-formed Sugars of. (Ehrlich.) (xii, 1894).....                                      | 895  |
| Respiration of, on the Malting Floor. (Jansch.) (xii, 1894).....                         | 1078 |
| Rasting and Blending. (Krikorian.) (xii, 1893).....                                      | 55   |
| Saccharification of. (Windisch.) (xiv, 1895).....                                        | 764  |
| Saccharification of Amylaceous Substances by. (P) Cuisinier. (v, 1886).....              | 331  |
| Saccharose in, Estimation of. (Julowetz.) (xiv, 1895).....                               | 54   |
| Soluble Carbohydrates of. (Dull.) (xii, 1883).....                                       | 854  |
| Substitute Produced from Starchy Substances. (P) Sullivan and Valentin. (vii, 1888)..... | 446  |
| Temperature in Bunks of Stored. (xiv, 1895).....                                         | 668  |
| Treatment of. (P) Schnell. (iv, 1885).....                                               | 414  |
| Treatment of Amylaceous Substances with. (P) Inray. From Cuisinier. (iv, 1885).....      | 237  |
| Treatment of Ground, for Brewing. (P) Birrell. (viii, 1889).....                         | 996  |
| Wheat. (Heinzelmann.) (viii, 1889).....                                                  | 298  |
| Wort, Analysis of. (Heron.) (vii, 1888).....                                             | 271  |
| Wort and Beer: Determination of Dry Substance in. (Ehon.) (xiv, 1895).....               | 691  |
| Effect of Drying on Composition of. (Matz.) (viii, 1889).....                            | 299  |
| Yield of, by Mashing. (Reinke.) (vi, 1887).....                                          | 734  |
| Malts, Influence of Cane Sugar on Valuation of. (Prior.) (xii, 1894).....                | 1080 |
| Malta, Opportunities for Trade in. (T.R.) (viii, 1889).....                              | 653  |
| Maltase and Dextrinase, Diastase a Mixture of. (Wijsman, Junior.) (ix, 1890).....        | 752  |
| Malting Apparatus: (P) Andrew. (i, 1882).....                                            | 379  |
| (P) Bollman. (x, 1891).....                                                              | 844  |
| Apparatus for Pneumatic. (P) Leaker. (xi, 1892).....                                     | 1022 |
| Chemistry of: (Behrend.) (iv, 1885).....                                                 | 412  |
| (Lüntner.) (xii, 1893).....                                                              | 854  |
| Employment of Sulphurous Acid in. (Kukla.) (xiii, 1894).....                             | 968  |
| Influence of Ferruginous Water in. (Kukla.) (xiii, 1894).....                            | 1080 |
| Pneumatic System of. (vii, 1888).....                                                    | 687  |
| Prevention of Mould forming during. (xiv, 1895).....                                     | 173  |
| Process of. (P) Tilden. (xii, 1893).....                                                 | 855  |
| Processes. (Stutzer.) (x, 1891).....                                                     | 940  |
| Saladin's Pneumatic System of. (Sauer.) (vii, 1888).....                                 | 336  |
| Use of Air in. (Stopes.) (ix, 1890).....                                                 | 314  |
